#### QUESTION 1

Using file virtualization, what can the ARX do for customers?

- A. Match data to the most appropriate tier of storage (e.g. critical data on tier 1 storage; older data on secondary storage tier).
- B. All of the above.
- C. Move individual files or entire file systems in real-time without disruption of down-time.
- D. Automate many storage management tasks such as storage tiering, dynamic capacity balancing, and non-disruptive data migration.

Correct Answer: B

---

#### QUESTION 2

A company deploys F5 load balancers to manage number of secure applications. The company needs to centrally manage certificates. Which F5 product provides this functionality?

- A. BIG IQ
- B. GTW
- C. iHeath
- D. LTM

Correct Answer: A

---

#### QUESTION 3

The SNMP monitor can collect data based on which three metrics? (Choose three.)

- A. packet rate
- B. memory utilization
- C. content verification
- D. current connections E. hops along the network path

Correct Answer: ABD

---

#### QUESTION 4

When can a single virtual server be associated with multiple profiles?

- A. Never. Each virtual server has a maximum of one profile.
- B. Often. Profiles work on different layers and combining profiles is common.
- C. Rarely. One combination, using both the TCP and HTTP profile does occur, but it is the exception.
- D. Unlimited. Profiles can work together in any combination to ensure that all traffic types are supported in a given virtual server.

Correct Answer: B

---

#### QUESTION 5

An administrator wants to insert per-session data in a users browser so that user requests are directed to Which session persistence method should the administrator use? the same session

- A. SSL persistence
- B. Source address persistence
- C. destination address persistence
- D. cookie persistence

Correct Answer: D

<https://support B.com/csp/article/K83419154>

---

#### QUESTION 6

When choosing Fundamental as the Policy Builder security policy type, BIG-IP ASM will learn and enforce the following components? (Choose two.)

- A. Attack signatures
- B. Global parameters
- C. HTTP protocol compliance
- D. URLs and meta characters

Correct Answer: AC

---

#### QUESTION 7

When initially configuring the BIG-IP system using the config utility, which two parameters can be set. (Choose two.)

- A. the netmask of the SCCP

- B. the IP address of the SCCP
- C. the port lockdown settings for the SCCP
- D. the netmask of the host via the management port
- E. the IP address of the host via the management port
- F. the port lockdown settings for the host via the management port

Correct Answer: DE

---

### QUESTION 8

If the BIG-IP device is NOT always located between the client and the server, it will NOT provide full optimization and security.

- A. True
- B. False

Correct Answer: A

---

### QUESTION 9

Which three methods can be used for initial access to a BIG-IP system. (Choose three.)

- A. CLI access to the serial console port
- B. SSH access to the management port
- C. SSH access to any of the switch ports
- D. HTTP access to the management port
- E. HTTP access to any of the switch ports
- F. HTTPS access to the management port
- G. HTTPS access to any of the switch ports

Correct Answer: ABF

---

### QUESTION 10

A request is sent to the BIG-IP ASM System that generates a Length error violation. Which of the following length types provides a valid learning suggestion? (Choose three.)

- A. URL

- B. Cookie
- C. Response
- D. POST data
- E. Query string

Correct Answer: ADE

---

#### **QUESTION 11**

The production version of BIG-IP Virtual Edition is limited to 200 Mbps throughput.

- A. True
- B. False

Correct Answer: B

The production version of BIG-IP Virtual Edition can be at 25Mbps / 200Mbps / 1Gbps / or 5Gbps throughput served and maybe higher in the next versions.

---

#### **QUESTION 12**

What is a disadvantage of running a visualized load balancer?

- A. more expensive than a hardware load balancer
- B. slower than a hardware load balancer
- C. less reliable than a hardware load balancer
- D. does not support high availability

Correct Answer: B

---

#### **QUESTION 13**

Tightening is a feature of which type of entity?

- A. Explicit URLs
- B. Attack signatures
- C. Flow login URLs
- D. Wildcard parameters

Correct Answer: D

**QUESTION 14**

BIG-IP ASM is requesting automatic signature updates from the F5 update service

Who is considered the server in this communication?

- A. BIG-IP
- B. User A
- C. F5 update Service
- D. web application

Correct Answer: C

---

#### QUESTION 15

An administrator finds a new vulnerability in a web application and needs to rapidly mitigate the threat. Which F5 feature provides this functionality?

- A. iCall
- B. iRules
- C. iSession
- D. iControl

Correct Answer: B
