- E. Business continuity plan

Correct Answer: E

QUESTION 4

What is the purpose of resource isolation?

- A. To reduce the level of broadcast traffic on physical segments.
- B. To ensure that anyone accessing a resource has appropriate integrity.
- C. To automate the creation of access control lists and Trusted Computing Bases.
- D. To enforce access controls, and clearly separate resources from each other.
- E. To make people buy more computers than they really need.

Correct Answer: D

QUESTION 5

A new U.S. Federal Information Processing Standard specifies a cryptographic algorithm. This algorithm is used by U.S. government organizations to protect sensitive, but unclassified, information.

What is the name of this Standard?

- A. Triple DES
- B. Blowfish
- C. AES
- D. CAST
- E. RSA

Correct Answer: C

QUESTION 6

Which of the following represents a valid reason for testing a patch on a nonproduction system, before applying it to a production system?

- A. Patches may re-enable services previously disabled.
- B. Patches are a kind of virus.
- C. Patches always overwrite user data.
- D. Only patches on vendor-pressed CDs can be trusted.
- E. Patches usually break important system functionality.

Correct Answer: A

QUESTION 7

To protect its information assets, ABC Company purchases a safeguard that costs \$60,000. The annual cost to maintain the safeguard is estimated to be \$40,000. The aggregate Annualized Loss Expectancy for the risks the safeguard is expected to mitigate is \$50,000. At this rate of return, how long will it take ABC Company to recoup the cost of the safeguard?

- A. ABC Company will never recoup the cost of this safeguard.
- B. Less than 7 years
- C. Less than 3 years
- D. Less than 1 year
- E. Less than 5 years

Correct Answer: B

QUESTION 8

Public servers are typically placed in the _____, to enhance security.

- A. Restricted Entry Zone
- B. Open Zone
- C. Internet Zone
- D. Demilitarized Zone
- E. Public Entry Zone

Correct Answer: D

QUESTION 9

A _____ attack uses multiple systems to launch a coordinated attack.

- A. Distributed denial-of-service
- B. Teardrop
- C. Birthday
- D. FTP Bounce
