QUESTION 1

A Citrix Administrator would like to use an existing monitor script included in NetScaler for load balancing TFTP services in a Provisioning Services deployment.

Which monitor type should the administrator choose in order to complete the task?

- A. ARP
- B. USER
- C. TCP-ECv
- D. UDP-ECv

Correct Answer: B

QUESTION 2

Scenario: A Citrix Administrator would like to delegate administration of the Citrix NetScaler to a Microsoft Active Directory group called ICitrix-NetScaler-Admins. The group already exists in Active Directory. The Citrix-NetScaler-Admins group must have full-control permission on the Citrix NetScaler to perform their tasks. The administrator has successfully configured an LDAP authentication server and authentication policy. The authentication policy is already globally bound. How should the administrator proceed on the Citrix NetScaler?

- A. Create an AAA User called Citrix-NetScaler-Admins and select IExternal Authentication.
- B. Create a group called Citrix-NetScaler-Admins. Make the group a member of the operator command policy.
- C. Create a group called Citrix-NetScaler-Admins. Make the group a member of the superuser command policy.
- D. Create an AAA group called Citrix-NetScaler-Admins. Create an ALLOW authorization policy and bind it to the Citrix-NetScaler-Admins AAA Group.

Correct Answer: C

QUESTION 3

Scenario: A company is considering using NetScaler appliances to load balance existing secured web servers. The company compliance policy does NOT allow any alterations of the SSL sessions between clients and web servers. Which option should a Citrix Administrator configure on the NetScaler virtual server to meet the needs of the company?

- A. SSL vPN
- B. SSL Bridge
- C. SSL Offload
- D. SSL Renegotiation

Correct Answer: B

QUESTION 4

Which two IP addresses are required for a new NetScaler Gateway installation when using the First-Time Setup Wizard? (Choose two.)

- A. Client IP (CIP)
- B. virtual IP (vIP)
- C. Subnet IP (SNIP)
- D. NetScaler IP (NSIP)

Correct Answer: AB

QUESTION 5

A Citrix Administrator needs to mask the server name used by a web server, without exposing the web server virtual directory structure.

Which policy should the administrator use to complete this task?

- A. Responder
- B. Content Filtering
- C. Content Switching
- D. URL Transformation

Correct Answer: D

QUESTION 6

What should a Citrix Administrator configure in a session profile so that users are able to use WorxWeb on their mobile devices?

- A. SSL vPN
- B. ICA Proxy
- C. Secure Browse
- D. Clientless Access

Correct Answer: C

QUESTION 7

Scenario: Two NetScaler Gateway virtual servers are configured on a NetScaler appliance. Each NetScaler Gateway virtual server is used to enable secure remote access to dedicated XenDesktop sites for separate divisions: Division A: NetScaler Gateway: NG-A XenDesktop Controller: DDC-A Division B: NetScaler Gateway: NG-B XenDesktop Controller: DDC-B Each XenDesktop site is placed in its own Active Directory. Firewalls prevent any communication between the divisions.

An administrator should configure the Secure Ticket Authority on the NetScaler for Division B, without causing any configuration issues for NG-A, by binding . (Choose the correct option to complete the sentence.)

- A. DDC-B to NG-A
- B. DDC-B to NG-B
- C. DDC-B to NG-A and DDC-A
- D. DDC-A and DDC-B to a load-balancing virtual server

Correct Answer: B

QUESTION 8

When a user launches a published version of Notepad, the user receives the following error message:

```
\\'Cannot connect to the Citrix XenApp server.SSL Error: The proxy denied access to 10; STA393B6A5D1088; 9764757E39D0BEBB0BFC66E9EE146FF4 port 1494.\\'
```

What could be the cause of this error message?

- A. Web Interface CANNOT reach the XML broker.
- B. Web Interface CANNOT reach the XenApp server.
- C. NetScaler Gateway CANNOT reach the XenApp server.
- D. NetScaler Gateway CANNOT reach the Secure Ticket Authority server.

Correct Answer: D

QUESTION 9

Scenario: An organization currently has three different web servers for accessing Japanese, French and English languagewebpages, and management has requested that a single URLbe used instead.This site

also needs to meet these requirements:

Users should access one web page and URL for all languages.

One IP address should be used for all client connections.

Users should be automatically sent to the correct language-specific web content.

What should the Citrix Administrator configure on the NetScaler to accomplish all requirements?

- A. Content switching virtual server.
- B. Policy-based routing to send users to the correct resources.
- C. Content Filtering with language-based policies to detect each language.
- D. A Responder policy with Inon-addressable load balancers to conserve IPs.

Correct Answer: A

QUESTION 10

Scenario: A Citrix Administrator is required to set up SSL Offloading for all virtual servers. External communication will come in as HTTPS traffic. Communication from the NetScaler to backend web servers will be over HTTP.

In which two ways can the administrator set the protocol to meet the requirements? (Choose two.)

- A. Service Type. SSL
- B. Service Type. TCP
- C. Service Type. HTTP
- D. virtual Server Type. SSL
- E. virtual Server Type. HTTP
- F. virtual Server Type. SSL TCP

Correct Answer: CD

QUESTION 11

Scenario: An administrator plans to publish 2010 Outlook Web Access through Citrix NetScaler AAA and allow users to authenticate using domain credentials and their RSA tokens. Users must also have the ability to change the password when it has expired. The administrator should configure for user authentication and for RSA token authentication. (Choose the correct set of options to complete the sentence.)

- A. LDAP; LDAPS
- B. SAML; RADIUS
- C. LDAPS; RADIUS
- D. RADIUS;RADIUS

Correct Answer: C

QUESTION 12

While logged on to the NetScaler Configuration Utility, a Citrix Administrator notices that CPU utilization is higher than expected.

What should the administrator configure to receive notification of this event in the future, when the administrator is NOT logged on?

- A. Auditing
- B. SNMP Trap
- C. SNMP view
- D. AppFlow Logging

Correct Answer: B

QUESTION 13

An administrator is planning a NetScaler Gateway implementation and must ensure that users are only allowed to access the company resources if a specific file is present on the endpoint device they connect from.

Which component should the administrator include within the plan?

- A. An SSL Offload virtual server
- B. A double-hop NetScaler Gateway virtual server
- C. A Basic mode NetScaler Gateway virtual server
- D. A SmartAccess mode NetScaler Gateway virtual server

Correct Answer: D

QUESTION 14

An administrator maintains a NetScaler environment that includes Secure Ticket Authority servers configured with custom ports.

Which two Secure Ticket Authority address formats could the administrator configure when using custom ports on the NetScaler Gateway virtual server? (Choose two.)

- A. http:jjSTA1jcitrixjctxsta.dll

- B. http:jjSTA1.company.com:port
- C. http:jj10.10.10.1:portjcitrixjctxsta.dll
- D. http:jjSTA1.company.com:portjvpnjindex.html

Correct Answer: BC

QUESTION 15

Scenario:An administratorhas configuredLDAPS authentication, butusersare unable tolog onto theNetScaler Gateway virtual server. The same users are able to log on to other systems. Which action could the administrator take to troubleshoot this issue?

- A. Run telnet ldapsrv.example.com 389 from a PC.
- B. Run telnet from a LDAPS server to the NSIP address.
- C. Run telnet ldapsrv.example.com 636 from the NetScaler shell.
- D. Run telnet ldapsrv.example.com:636 from the NetScaler command-line interface.

Correct Answer: C
