#### QUESTION 1

Which XenMobile deployment option would pose the greatest security risk?

- A. SSL Bridge at the NetScaler load balancing tier with the XenMobile Server in the Demilitarized Zone (DMZ).
- B. SSL Bridge at the NetScaler load balancing tier with the XenMobile Server on the internal network segment.
- C. SSL Offload at the NetScaler load balancing tier with the XenMobile Server in the Demilitarized Zone (DMZ).
- D. SSL Offload at the NetScaler load balancing tier with the XenMobile Server on the internal network segment.

Correct Answer: B

---

#### QUESTION 2

A Citrix Engineer deployed XenMobile Mail Manager in a Proof of Concept (POC) environment; however, the connection test fails.

What are two possible causes for this connection test failure? (Choose two.)

- A. There are no ActiveSync devices in the environment.
- B. The service account used lacks the correct permissions.
- C. The limit on maximum number of supported ActiveSync devices has been reached.
- D. The environment has unsupported ActiveSync devices.

Correct Answer: AB

---

#### QUESTION 3

Which certificate is required to configure ShareFile User Provisioning?

- A. xms.domain.com- server certificate
- B. Apple Push Notification service (APNs) certificate
- C. Third-party SSL Listener certificate
- D. xms.domain.com - SAML certificate

Correct Answer: D

---

#### QUESTION 4

What should a Citrix Engineer configure in order to ensure Apple Push Notification service (APNs) works with outbound proxy communications?

- A. Enable outbound proxy communication for APNs communication through the XenMobile Web console.
- B. Enable outbound proxy communication for APNs communication through the XenMobile Server command-line interface.
- C. Enable then deploy the XenMobile proxy policy to user devices.
- D. Enable outbound XenMobile proxy communication on the NetScaler.

Correct Answer: B

---

#### QUESTION 5

Scenario: A Citrix Engineer in a XenMobile deployment is in the process of implementing ShareFile Enterprise with Security Assertion Markup Language (SAML) support using Microsoft Active Directory Federation Services (ADFS). The Active Directory team has installed and configured ADFS and has provided the engineer with the information needed to configure ShareFile Enterprise and enable SAML Single Sign-On.

Which three pieces of information must the engineer configure for SAML in ShareFile Enterprise? (Choose three.)

- A. Login URL
- B. Logout URL
- C. X.509 Certificate
- D. IDP Issuer/ Entity IP
- E. ShareFile Issuer / Entity ID
- F. SP-Initiated SSO Certificate
- G. SP-Initiated Authentication context

Correct Answer: ACE

---

#### QUESTION 6

A Citrix Engineer is configuring access to an existing XenDesktop environment.

Which three settings should the engineer configure in the XenApp/XenDesktop section of the XenMobile Server? (Choose three.)

- A. The legacy PNAgent site path
- B. The IP address of the XenDesktop Delivery Controller
- C. The XenDesktop site name
- D. The path to Receiver for Web site
- E. The FQDN of the StoreFront Server

F. The port used to connect to StoreFront

Correct Answer: AEF

---

### QUESTION 7

A Citrix Engineer created an Automated Action to determine when a device has been rooted or jailbroken and needs to customize the text of the email that users receive when NOT in compliance.

How could the engineer customize the text of the email that users receive?

- A. Add text to an Ad Hoc notification.
- B. Change the Notification Server settings.
- C. Edit the corresponding Notification Template.
- D. Modify the text in the Automated Action Policy.

Correct Answer: C

---

### QUESTION 8

Scenario: A Citrix Engineer needs to create a ShareFile mobile application default security policy that includes the following requirements:

- PIN to access ShareFile content
- Set files to automatically be removed after 30 days
- Allow external applications to open downloaded files outside of the ShareFile application
- 

Enable offline access to files

The engineer has NOT integrated ShareFile with the App Controller.

Which device security mode should the engineer set as the default security setting?

- A.  
Offline
- B.  
Secure
- C.  
Custom
- D.

Standard

Correct Answer: C

---

#### QUESTION 9

Scenario: A Citrix Engineer added a new XenMobile Server to a cluster. After making this change, users report sporadic connectivity issues to the Worx Store.

Which step should the engineer take to address this issue?

- A. Add the IP address of the new cluster member to the service group member configuration.
- B. Create a new NetScaler Gateway session policy.
- C. Create a new NetScaler Gateway clientless access policy.
- D. Add the node ID to the server ID field in the service group member configuration.

Correct Answer: D

---

#### QUESTION 10

Scenario: XenMobile has been selected as the new mobility solution for an organization. The organization currently has a Citrix XenApp environment with remote access provided through NetScaler ICA Proxy. A Citrix Engineer needs to redesign the email access solution for remote users and the organization requires that the new solution integrate with the native iOS Mail.

Which component should be implemented to meet the requirements outlined in the scenario?

- A. WorxMail
- B. Secure Mobile Gateway
- C. XenMobile Mail Manager
- D. XenMobile NetScaler Connector

Correct Answer: D

---

#### QUESTION 11

A Citrix Engineer is configuring access to a XenApp/XenDesktop environment.

Which file must the engineer define a relative path to within the XenMobile Server Console?

- A. default.htm
- B. config.xml
- C. web.config

D. index.asp

Correct Answer: B

---

#### QUESTION 12

In which two ways could a Citrix Engineer confirm an Apple Push Notification service (APNs) certificate expiration? (Choose two.)

- A. XenMobile Console notifications
- B. Certificate details within the internet browser
- C. iOS agent notification
- D. APNs notification template

Correct Answer: AD

---

#### QUESTION 13

Which two components are required in order for a Citrix Engineer to use the MDX Toolkit to wrap Windows Phone applications for production use? (Choose two.)

- A. Command-line tools
- B. Enterprise certificate from Symantec
- C. Android Developer Tools and Android SDK
- D. Application enrollment token
- E. A keystore certificate

Correct Answer: BD

---

#### QUESTION 14

Scenario: A Citrix Engineer must provide remote users with access to their corporate e-mail from their mobile devices.

The engineer must ensure remote users' mobile devices meet the following requirements:

-

Mobile devices require a PIN for corporate email.

-

Mobile devices cannot be jailbroken.

-

Mobile devices must be enrolled to XenMobile Device Manager.

-Only iOS devices will have access to corporate email.

Which component should the engineer include in the solution to enforce the requirements outlined in the scenario?

- A. WorxMail
- B. App Controller
- C. TouchDown mail client
- D. XenMobile NetScaler Connector

Correct Answer: D

---

#### QUESTION 15

A Citrix Engineer needs to push native email profiles and configurations to user devices.

Which XenMobile macros could the engineer use to automate email provisioning of native email clients on user devices?

- A. {user.username} {user.mail}
- B. (User.username) (User.mail)
- C. %user.username %user.mail
- D. #user.username #user.mail

Correct Answer: A
