QUESTION 1

Which is the correct sequence of steps in the Design process?

- A. Articulate the vision, understand the problem, identify the Redwood Page templates to use. add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- B. Understand the statement, articulate the problem, identify the Redwood Page templates to use. add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- C. Articulate the vision, identify the Redwood Page templates, understand the problem, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- D. Understand the problem, articulate the vision, identify the Redwood Page templates to use. add the detail and refine the design, specify the design for development, and monitor engagement in the real world

Correct Answer: D

The correct sequence of steps in the Design process is: Understand the problem Articulate the vision Identify the Redwood Page templates to use Add the detail and refine the design Specify the design for development Monitor engagement in the real world This is the recommended process for designing with Redwood, as it helps you to create user interfaces that are aligned with your vision, goals, and requirements. It also helps you to leverage the Redwood design system, templates, patterns, and components to ensure consistency, usability, and accessibility. QUESTION 2

How many instances of Oracle Visual Builder Studio are provisioned with your Oracle Fusion Cloud Applications Tenancy?

- A. Multiple - for each DEV instance in your tenancy
- B. None - you need to provision one manually
- C. One - mapped to your production Fusion Apps instance
- D. One - mapped to a TEST instance of Fusion Apps in your tenancy

Correct Answer: C

When you subscribe to Oracle Fusion Cloud Applications, you get one instance of Oracle Visual Builder Studio provisioned with your Oracle Fusion Cloud Applications Tenancy. This instance is mapped to your production Fusion Apps

instance and allows you to create and deploy extensions for your Fusion Apps pages. You can also use this instance to access other instances of Fusion Apps in your tenancy by creating sandboxes for them .

QUESTION 3

Which page template is NOT a transactional page template?

- A. Gantt page template
- B. Foldout layout page template
- C. Guided process page template
- D. Advanced create and edit page template

Correct Answer: B

A transactional page template is a type of page template that supports creating, updating, or deleting data in Fusion Cloud Apps. It usually consists of a form or a table with input fields, buttons, and validations. Some examples of transactional page templates are Gantt page template, Guided process page template, and Advanced create and edit page template. A foldout layout page template is not a transactional page template because it does not support data manipulation. It is a type of page template that displays information in a collapsible panel on the side of the page.

QUESTION 4

What is the minimum and maximum number of steps that can be configured on a Guided process?

- A. Minimum 1 and maximum 50
- B. Minimum 1 and maximum 10
- C. Minimum 4 and maximum 10
- D. Minimum 2 and maximum 25

Correct Answer: B

A Guided process is a component that guides users through a series of steps to complete a task or a workflow. A Guided process can have a minimum of one step and a maximum of 10 steps. Each step can have a label, an icon, an optional description, and an optional action. A Guided process can also have optional buttons for navigation or completion. Therefore, option B is the correct answer. References: [Guided Process Component], [oj-sp-guided-process]

QUESTION 5

Which three patterns are used in the Redwood Reference App? (Choose three.)

- A. Start Page
- B. Dashboard Landing Page
- C. Vertical Foldout
- D. Welcome Page

E. Smart Filter and Search

F. Data Grid Page

Correct Answer: ABE

This question tests your knowledge of the Redwood patterns that are used in the Redwood Reference App, which is a sample application that showcases the Redwood design system and the best practices for creating engaging user

interfaces with Visual Builder Studio. The correct answer is A, B, and E, because these are the three patterns that are used in the Redwood Reference App. The other options are incorrect, because they are not patterns, but components or

templates that can be used in different contexts.

Here is a brief description of each pattern:

Start Page: This pattern is used to provide an overview of the app's functionality and allow users to start a task or a workflow. It consists of a header with a title and subtitle, a primary action button, and a grid of cards with icons and labels.

Dashboard Landing Page: This pattern is used to display key performance indicators (KPIs) and a dashboard grid with information visualizations that highlight and explain business performance. It consists of a header with a title and subtitle,

a primary action button, an in-flow back button, and a dashboard grid with charts, gauges, or tables.

Smart Filter and Search: This pattern is used to enable users to filter and search data based on various criteria and see the results in a table or a list. It consists of a header with a title and subtitle, a smart filter bar with input fields and chips,

an optional search bar with suggestions, and a data grid or list with pagination and sorting.
