### QUESTION 1

You have installed the Gadget server and are trying to register new gadgets for your site. When using the Admin UI, you do not see the asset type FW\_CSGadget listed in the search list, although this asset type is correctly enabled for your site. You can see "Find CS-Based Gadget" in the Start Menu for this asset type and it has been assigned "Any Role." Other asset types for the site can be searched but not FW\_CSGadget.

What could be the reason?

- A. By default, the Admin UI does not allow you to find non-structural assets.
- B. The gadget has not been properly registered.
- C. The default language of the gadget is mismatched.
- D. When registering the gadget, Show Gadget was not selected.
- E. The XML registration of the gadget is corrupted.

Correct Answer: B

---

### QUESTION 2

When creating a user in the WEMinterface, what are the minimum fields that are required?

- A. Name
- B. Email
- C. ACLs
- D. Groups
- E. Password
- F. Assign user to a site

Correct Answer: C

---

### QUESTION 3

Given: `http://host:port/servlet_context_path/ContentServer?pagename=name_of_page`

In the preceding URL, which two legal values does name\_of\_page represent?

- A. externally callable name of a template
- B. SiteEntry
- C. CSElement name

D. fully qualified page asset name with URL encoding

Correct Answer: BD

---

#### QUESTION 4

Which two administrative capabilities are included on the Admin tab in the Admin interface?

A. User Generated Content

B. User Profile

C. Publishing

D. Segment Creation

E. In-Context editing

Correct Answer: BE

---

#### QUESTION 5

What is wrong with the following code fragment?

```
<div id="container"> <div class="content">
<insite:calltemplate slotname="HelloSlot" tname="HelloDetail"
variant="HelloDetail/Detail" args="c,cid" />
</div>
<div class="side-bar">
<insite:calltemplate slotname="HelloSlot" tname="HelloSideBar"
variant="HelloSideBar/Detail" args="c,cid" />
</div></div>
```

A. Nothing. This code fragment will work as expected.

B. The slot name HelloSlot cannot be repeated for any given content management site.

C. The template name Detail cannot be repeated for any given content management site.

D. The insite:calltemplate tag has a syntax error. The Argument field, which is a required argument, is missing.

Correct Answer: D

---

#### QUESTION 6

What are the basic required components to make the Contribution User Interface usable?

A. users (including their ACLs and roles) and the data model

---

- B. users (including their ACLs and roles) and auxiliary user interfaces
- C. a data model, auxiliary user interfaces, and a JSP page template
- D. users, a data model, and a workflow

Correct Answer: B

---

#### QUESTION 7

You are responsible for a small marketing website that was built WebCenter Sites that consists of page assets and page templates. The site is fully cached and does not use an uncachedSiteEntry wrapper. The Marketing department has requested that you make the site responsive such that visitor experience is good even when you web pages are viewed on other devices, including tablets and mobile phones. You are tasked with designing an inexpensive solution that does not impact performance, add more hardware, change the asset model, or impact the contributor's current workload or the process that creates the web pages.

What would you do to address their requirements?

- A. Refactor your page templates to use a third party JavaScript or CSS framework such as Foundation 3 or CSS3 media queries.
- B. Add browser detection logic to an uncached JSP SiteEntry wrapper, which then dispatches to one of three different page templates: one designed specifically for computers, one for tablets, and one for mobile phones. No third party framework is used.
- C. Create three different contribution sites, one for each device, and map them to a specific subdomain, such that all "mobile.xxx.com" requests get forwarded to the mobile site, all "tablet.xxx.com" requests get forwarded to the tablet site, and so on. No third party framework is used.
- D. Install an additional WebCenter Sites mobility server environment.

Correct Answer: A

---

#### QUESTION 8

Which one of the following accurately describes WebCenter Sites?

- A. an Records Management solution with smart WYSIWYG authoring, a preview environment, and publication workflows
- B. a Content Management System (CMS) that is complete with a delivery platform, to manage multiple business sites
- C. a .NET development platform with a high performance caching architecture
- D. a commerce site management solution to deliver multichannel, multibrand, and multilingual websites

Correct Answer: C

---

#### QUESTION 9

Which four are fundamental terms in WebCenter Sites that are represented in the Contributor UI?

- A. asset
- B. page
- C. templates
- D. roles
- E. clickstream
- F. search engine optimization

Correct Answer: ACEF

---

#### QUESTION 10

Which statement is true about approval dependencies?

- A. Asset dependencies are stored in the AssetRelationTree table.
- B. Asset dependencies and composition dependencies are calculated independently.
- C. Collection and recommendation assets have a dependent query asset.
- D. Basic assets have only one type asset dependency relationship.

Correct Answer: B

---

#### QUESTION 11

By default, SiteCapture can be used to crawl an instance of WebCenter Sites. Identify two tasks that SiteCapture performs.

- A. It makes PDFs of the captured site.
- B. It archives a site in a zip file with metadata, HTML, JavaScript, and blobs.
- C. It saves only the pages that were changed to the SiteCapture file system.
- D. It crawls the site as different users.

Correct Answer: AC

---

#### QUESTION 12

In a default installation, which three users exist in the SystemUsers table?

- A. Fwadmin
- B. csuser
- C. ContentServer
- D. DefaultReader
- E. SatelliteServer

Correct Answer: BCE

---

### QUESTION 13

You are deploying WebCenter Sites using Oracle technology. Which two components are required for a Sites installation?

- A. Oracle Database
- B. Oracle WebLogic Server
- C. Oracle Coherence
- D. Oracle Identity Manager
- E. Oracle WebCenter Content

Correct Answer: BD

---

### QUESTION 14

Given this scenario: A flex family is created with two flex asset types, one parent asset type, one parent definition asset type, and one flex definition asset type.

Which statement is true?

- A. For every flex definition, you must create a corresponding start menu.
- B. It is possible to assign a specific flex definition asset type to a specific flex asset type within the flex family creation wizard forms.
- C. A flex definition asset can be assigned to a particular flex asset type within the flex definition asset creation form.
- D. By default, any flex definition can be assigned to a flex asset within a specific flex family at the time of creation.

Correct Answer: D

---

### QUESTION 15

Which database does the Jumpstart Kit use?

- A. MySQL
- B. HyperSQL
- C. Sybase
- D. Oracle Express
- E. TimesTen

Correct Answer: E
