**QUESTION 1**

Using the enrollment functionality, how can your client enroll a single student in a class with a grading basis of Audit?

A. By creating a separate class section with a separate Audit grading basis from the course and enrolling the student in this class

B. By creating an audit grade entry for use in entering grades on the roster

C. By assigning a positive service indicator to the student, specifying the class that has been chosen for audit

D. By enrolling the student using Quick Enroll and overriding the course grading basis to Audit

E. By creating a student attribute, specifying the class the student has chosen to audit

Correct Answer: C

**QUESTION 2**

What would prevent a user from assigning a program, plan, or subplan to a prospect?

A. Last Prospect Date for the program, plan, or subplan being greater than Admit Term for an applicant record

B. The prospect lacking security access to the program, plan, or subplan

C. Last Prospect Date for the program, plan, or subplan being less than or equal to Admit Term for the prospect record

D. The program, plan, or subplan being unavailable for the selected Admit Type

E. The program, plan, or subplan being unavailable for the selected Recruiting Center

Correct Answer: B

**QUESTION 3**

Which four data fields are populated from an applicant\\'s data to the prospect record if they do not already contain a value?

A. Application number for the career and program

B. Address

C. Last School Attended

D. Graduation Date

E. Region

Correct Answer: ABCE

**QUESTION 4**

After a course that is built in the Course Catalog is scheduled as a class section, which, two data values can be changed at the class section level?

A. The course components that are defined for the course

B. Course Attribute

C. Enrollment Group

D. Meeting Pattern

E. Title of the course

Correct Answer: B

**QUESTION 5**

A student requests an official transcript in Self Service. What action must take place in order to generate and print the transcript?

A. An administrative user must generate and print the existing transcript request either through Request Transcript Report or the Process Transcript component.

B. The student can generate and print the transcript after the request has completed successfully.

C. An administrative user must generate the request and the request will be completed in Self Service for the student to print.

D. The student request process requests and generates the transcript, but it must be printed administratively.

E. The administrative user is notified through the student request process and the administrative user must then request, generate, and print the transcript.

Correct Answer: B

**QUESTION 6**

Your client has created a new course in the Course Catalog but cannot retrieve this course in the Browse functionality or in the Schedule of Classes. Which two steps should you first perform in order to troubleshoot this issue?

A. Ensure that the effective date in the Course Catalog is a date far enough in the past to be viewed in past-dated tables.

B. Ensure that the effective date in the Schedule of Classes is a date far enough in the past to be viewed in past-dated tables.

C. Ensure that the status of the course is set to Active.

D. Ensure that a user has security access to the appropriate Academic Organization.

E. Ensure that a user has security access to the Campus where the course will be conducted.

Correct Answer: BD

---

QUESTION 7

Your client wishes to restrict faculty members from entering a W grade for students in the grade roster. How can this be accomplished?

A. Create a grading scheme that does not contain a W grade and assign it to the course.

B. In the Schedule of Classes, give the faculty member access to only approve the grade roster.

C. In the Grade Scheme table, specify that a faculty member cannot grant a W grade.

D. Create a placeholder grade in the grading scheme that a faculty member can grant until a W is placed administratively.

E. Instruct faculty members to leave grades blank for students who are likely to earn a W.

Correct Answer: A

---

QUESTION 8

A class at your client s institution requires a student to enroll in a lecture and one laboratory from a selection of two laboratories. An exception arises in which a particular student should be permitted to enroll in a third laboratory outside of the initial selection criteria specified by the class. How should you achieve this exception while still ensuring that some record is kept in the system?

A. Enroll the student administratively by using Quick Enroll and select the Requirement Designation override.

B. Enroll the student through the administrative Enrollment screen.

C. Enroll the student administratively by using Quick Enroll and select the Permission override.

D. Enroll the student administratively by using Quick Enroll and select the Class Links override.

E. Enroll the student administratively by using Quick Enroll and select the Requisites override

Correct Answer: A

---

QUESTION 9

Your client wants to build a course that has separate lecture, laboratory, and discussion sections. How would you achieve this?

A. Build one course with a single course ID and a component each for the lecture, laboratory, and discussion sections.

B. Build three individual courses with their own course IDs.

C. Schedule three lecture sections and specify the type of class in Class Notes.

D. Create one course ID with three offerings: one for lecture, one for laboratory, and one for discussion.

E. Build one course ID and assign course attributes for each class component.

Correct Answer: C

---

**QUESTION 10**

Which statement is true about the ability of an institution to modify delivered address usage values, for example, Home?

A. The address usage values are translate values, and can be modified.

B. None of the delivered address usage values can be modified.

C. The address usage values are translate values, and can be modified, except Business and Home.

D. The only delivered address usage value is Home, which cannot be modified; other usage values must be created individually.

E. The address usage values are translate values, and can be modified, except Home and Mail.

Correct Answer: D

---

**QUESTION 11**

Your client wants to avoid duplicate application entry by initiating a Search/Match warning each time an

application is entered and saved based on institutional criteria.

How should you achieve this?

A. Set the appropriate level by using the App1 on File Warning criteria.

B. Use a permission list to limit which applications can be saved by which users.

C. Use row-level security under SetupSACR to limit the applications that can be saved.

D. Use the Search/Match functionality to ensure that the warning appears automatically.

E. Create a security role to limit the users that can save certain applications.

Correct Answer: C

---

**QUESTION 12**

Which statement is true about developing Search/Match parameters?

A. If the search parameter is less detailed, users receive more search results.

B. If the search parameter is more detailed, users receive fewer search results.

C. It does not matter how detailed the search parameters are; the number of search results remain the same,

D. If the search parameter is more detailed, users receive more search results.

E. If the search parameter is less detailed, users receive fewer search results.

Correct Answer: C

## QUESTION 13

Is it required for an institution to implement Program Enrollment if they want to implement Activity Management?

A. Yes, Program Enrollment must be implemented for Activity Management to be used.

B. No, the institution can implement Activity Management without Program Enrollment.

C. No, but the institution cannot implement Program Enrollment without Activity Management.

D. Yes, but only certain items from Program Enrollment are needed for Activity Management to function.

E. Yes, but only certain functions from Activity Management are required for Program Enrollment to function.

Correct Answer: E

## QUESTION 14

How would you limit the transcripts that can be requested and generated by certain administrative users?

A. By building a permission list, specifying the users that can generate the transcripts

B. By using Transcript Report and Transcript Type security for each user under the SetupSACR navigation

C. By specifying security restrictions on the Transcript Type definition page

D. By building a security role for generating particular transcripts

E. By creating a different transcript type for each set of users

Correct Answer: A

## QUESTION 15

Your client wants to avoid loading duplicate information when deploying test files. How would you achieve this?

A. By writing a query to identify loaded files

B. By deleting test score files after using them

C. By purging the table between loading files

D. By creating a unique test ID for each process

E. By restricting security to the load process

Correct Answer: C
