QUESTION 1

To organize hosts into logical arrangements what is important to configure on Cascade Profiler?

- A. Host Baseline Profiles
- B. Custom Port Definitions
- C. Host Groupings
- D. Mitigation Configuration

Correct Answer: C

QUESTION 2

What types of filters are supported by a capture job on the Cascade Shark appliance?

- A. BPF filters
- B. Pilot filters
- C. WireShark display filters
- D. Riverbed filters

Correct Answer: A

QUESTION 3

You can export a report in Cascade Pilot: A. Only in PDF format.

- B. Only if a View is applied on a trace file.
- C. For a single chart display from an applied View.
- D. For any on-screen displays resulting from one or more applied Views.

Correct Answer: D

QUESTION 4

On Cascade Profiler, Why would you want to create a generic group encompassing the 0.0.0.0/0 definition?

- A. There is no reason to create this definition.
- B. This definition can be used to look for all hosts on the network that are not in other groups.

- C. This definition can be used to identify hosts that have incorrect IP address assignments.
- D. This definition can be used to look for all hosts on the internal network that are not in other groups within the same group type.
- E. This definition can be used to look for all hosts on the internal network that are not in other groups in any group type.

Correct Answer: D

QUESTION 5

How do you set the time zone of a Cascade Shark appliance?

- A. From the Basic Settings page of the Cascade Shark appliance Web Interface.
- B. From the Advanced Settings page of the Cascade Shark appliance Web Interface.
- C. With the CLI command "set timezone".
- D. From the Settings menu of Cascade Pilot.

Correct Answer: A

QUESTION 6

A SPAN port or Port Mirror is:

- A. A technique used to send Flow data from a switch or router.
- B. A technique used to copy packet data traversing a switch or router to a packet capture device from a passively monitoring port on the switch or router.
- C. A technique used to connect into a live link in a network using a network-tap in order to send all packet data traversing the live link to a packet capture device.
- D. A technique for placing a link on a switch or router in loopback mode for troubleshooting purposes.

Correct Answer: B

QUESTION 7

Within Cascade Pilot, trace clips represent:

- A. A time selection on a trace file.
- B. A time selection on a Capture Job.

- C. A selection of packets stored for a Capture Job.
- D. A copy of packets stored for a Capture Job.

Correct Answer: B

QUESTION 8

Which of the reports for monitoring Services include an Event List including Event IDs of the underlying alerts that were triggered from policy violations?

- A. Overall Service Performance Report
- B. Service Performance Report
- C. Service Incident Report
- D. All three of the reports above include an Event List
- E. None of the three reports above include an Event List. Only an Event report will generate Event Lists

Correct Answer: C

QUESTION 9

How do you verify that the Cascade Profiler has been successfully installed and configured?

- A. Go to the Dashboard page and verify that the graphs display data.
- B. Go to the System->Information page and assure that all status indications (System and Component, DNS Server) are displaying OK.
- C. Go to the System->Devices/Interfaces page and assure that each data source that is expected to be available is listed and that no status indicators are red.
- D. Go to the Reports->Traffic page. Near the bottom of the Report Criteria section, click Run now. Verify that a traffic report is displayed.
- E. All of the Above

Correct Answer: E

QUESTION 10
