QUESTION 1

Which of the following statements are NOT true about stored procedure replication?

A. Request functions are replicated from the primary to the replicate database.

B. Use sp_setrepproc to mark a stored procedure for replication.

C. Request functions cannot be executed in a Warm Standby environment.

D. Request functions do not require a subscription.

Correct Answer: A

QUESTION 2

In the Replication Server System, where is replication halted on a transaction affecting a table that does not have an associated subscription?

A. Inbound queue

B. Outbound queue

C. Materialization queue

D. Primary database

Correct Answer: A

QUESTION 3

If you create your subscription without a materialization method, which of the following is correct?

A. Creation of subscription will fail

B. Materialization will fail

C. Automatic Atomic Materialization will be chosen

D. Automatic Nonatomic Materialization will be chosen

Correct Answer: C

QUESTION 4

ERSSD works with which of the following operating system files? (Choose 3)

A. Database root file

B. Configuration file

C. Transaction Log mirror file

D. Error Log file

E. Transaction Log file

Correct Answer: ACE

QUESTION 5

What happens if a table in a non-Warm Standby environment is marked for replication and no Replication Definition exists? (Choose 2)

A. Replication Server writes an error to errorlog and the DSI is suspended.

B. The rep agent will shut down.

C. Transaction remains in inbound queue.

D. The data is sent to Replication Server and then discarded.

E. The data is sent to Replication Server and then replicated.

F. Replication Server writes an error to the errorlog each time a transaction is received from that table.

Correct Answer: DF

QUESTION 6

The Stable Device

A. Must be a raw partition.

B. Consists of two queues, one inbound and one outbound.

C. Is cleared of transactions at each shutdown.

D. Includes a queue for subscription materialization.

Correct Answer: D

QUESTION 7

How many stored procedures are needed to implement round trip function replication?

A. One

B. Two

C. Three

D. Four

Correct Answer: C

QUESTION 8

Which statement is CORRECT about dump marker?

A. It dumps all transactions into a Stable Device.

B. It instructs ASE to write a dump marker to the log when dump begins.

C. It dumps all transactions for primary database and truncates the log.

D. It instructs Replication Server to write a dump marker in the Stable Device.

Correct Answer: B

QUESTION 9

Which of the following tables contain the Replication Server exception log? (Choose 3)

A. Rs_systext

B. Rs_excepthdr

C. Rs_msgs

D. Rs_locater

E. Rs_exceptscmd

F. Rs_recovery

Correct Answer: ABE

QUESTION 10

Which of the following configuration options determines which transactions are placed with a given DSI-EXEC thread?

A. Dsi_num_large_xact_threads

B. Dsi_num_threads

C. Dsi_partitioning_rule

D. Dsi_serialization_method

Correct Answer: C

QUESTION 11

Which option is used to start Replication Server in standalone mode?

A. -S

B. -K

C. -M

D. -C

Correct Answer: C

QUESTION 12

Which of the following are TRUE about articles? (Choose 2)

A. Must contain a reference to an existing Replication Definition in the same primary database

B. Must be defined in the replicate database where the associated subscription will be created

C. May contain a WHERE clause that limits the selection of data from a table referenced in the associated Replication Definition

D. Once created, can be utilized in any publication definition that references it

E. Must contain all column names included in the searchable columns of the associated Replication Definition

Correct Answer: AC

QUESTION 13

Which thread sorts transaction log records into serialized transactions?

A. DIST

B. SQM for an inbound queue

C. SQM for an outbound queue

D. SQT

Correct Answer: D

QUESTION 14

Which thread performs function string mapping?

A. SQM

B. DSI

C. DSI EXEC

D. RSI

Correct Answer: C

QUESTION 15

A Replication Server CANNOT be quiesced when? (Choose 3)

A. Tere are no materialization queues.

B. Otbound DSI queues have been applied and acknowledged.

C. Rutes have been suspended.

D. Otbound DSI connections have been suspended.

E. Te RSSD dataserver has been shut down.

F. Tere are either no transactions or only open transactions on the inbound queues.

Correct Answer: CDE
