QUESTION 1

Which type of additional drivers does the Windows 10 installation phase prompt for?

A. Video

B. Network

C. Use

D. Storage

Correct Answer: D

You might be prompted for the mass storage device driver.

When installing Windows 10, you might see one of the following error messages:

References: http://windows.microsoft.com/en-us/windows7/windows-7-installation-problem-hard-drive-not-found

QUESTION 2

After installing a new device driver for a SCSI device adapter, you can no longer access an external SCSI hard disk. The computer is running Windows Server 2016.

You need to access the data as quickly as possible.

What should you do first?

A. roll back the device driver

B. replace the SCSI adapter

C. restart the computer

D. uninstall the device driver

Correct Answer: A

QUESTION 3

You work as a Server Administrator for company Inc. You are responsible for troubleshooting various issues that come in on a day-to-day basis from the local and remote locations.

Which of the following tools will you use to determine the time and type of the problem occurred in a particular system?

A. Task Manager

B. Performance Monitor

C. Event Viewer

D. Resource Monitor

Correct Answer: C

In order to determine the time and type of the problem occurred in a particular system, you should use the Event Viewer.

The Event Viewer allows checking of the log of multiple servers.

Diagnostic logging helps in figuring out problems on several servers (with the databases on those servers), and for the diagnostic logging, the user can view event logs with the Event Viewer in Windows or the Web Event Viewer in SharePoint

Central Administration.

Incorrect Answers:

A: A task manager is a program used to provide information about the processes and programs running on a computer, as well as the general status of the computer. It can also be used to terminate processes and programs, as well as change the processes priority. The task manager is most commonly accessed by pressing the buttons Control-Alt-Delete. Task manager also displays all the services that are currently running as well as those that were stopped. All information\\'s about the services such as Process ID and their group if they are applicable.

B: Performance Monitor is a Windows tool that monitors system and network resources. It is used to get statistical data about hardware and software components of a server.

D: Resource Monitor is a suite of administration tools designed to provide a quick overview of a single user interface. It acts as a mediator between the Cluster service and the resource dynamic link library. It can be launched from the start menu or from the Task Manager using the Performance tab. Resource Monitor can be accessed by searching in the Reliability and Performance monitor.

QUESTION 4

Which file extension indicates a Hyper-V virtual disk file?

A. . xml

B. . vhd

C. ,vud

D. . vsd

Correct Answer: B

QUESTION 5

Your network is set up as an Active Directory Domain Services (AD DS) domain. You have a single domain controller that runs a Server Core installation of Windows Server 2016.

You need to back up the Active Directory.

Which command should you use?

A. Mqbkup

B. Wbadmin

C. Ntbackup

D. Ntdsutil

Correct Answer: A

References: https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/mqbkup

QUESTION 6

Which of the following is a web server application and set of feature extension modules created by Microsoft for use with Microsoft Windows?

A. Secure Sockets Layer

B. File Transfer Protocol

C. Internet Information Services

D. World Wide Web

Correct Answer: C

Internet Information Services (IIS) is a web server application and set of feature extension modules created by Microsoft for use with Microsoft Windows. It is the world\'s second most popular web server in terms of overall websites behind the industry leader Apache HTTP Server.

Incorrect Answers:

A: The Secure Sockets Layer (SSL) is a commonly-used protocol for managing the security of a message transmission on the Internet. SSL has recently been succeeded by Transport Layer Security (TLS), which is based on SSL. SSL uses a program layer located between the Internet\'s Hypertext Transfer Protocol (HTTP) and Transport Control Protocol (TCP) layers. URLs that require an SSL connection start with https: instead of http:.

B: File Transfer Protocol (FTP) is a standard network protocol used to copy a file from one host to another over a TCP/IP-based network, such as the Internet. FTP is built on a client-server architecture and utilizes separate control and data connections between the client and server applications, which solves the problem of different end host configurations (i.e., Operating System, file names). FTP is used with user-based password authentication or with anonymous user access.

D: The World Wide Web is abbreviated as WWW and commonly known as the Web. It is a system of interlinked hypertext documents that can be accessed through the Internet. With WWW, anyone can view Web pages that contain text, images, videos, and other multimedia and navigate between them using hyperlinks.

QUESTION 7

What type of server serves HTML files to clients?

A. web server

B. FTP server

C. SMB server

D. application server

Correct Answer: A

The World Wide Web is a system of interlinked hypertext documents known as web pages that can be viewed with a web browser such as Internet Explorer. Those pages are provided by a web server.

QUESTION 8

You have installed iSCSI Initiator to enable block-based storage area networks in the network infrastructure of your organization. For security reasons, you need to configure authentication protocols in the network.

Which of the following protocols will you use with iSCSI Initiator? Each correct answer represents a complete solution. (Choose two.)

A. CHAP

B. IPSec

C. PAP

D. MS-CHAP

Correct Answer: AB

iSCSI Initiator supports the Challenge Handshake Authentication Protocol (CHAP) and Internet Protocol security (IPSec) protocols. So, you can configure only these two protocols with iSCSI Initiator in network infrastructure.

QUESTION 9

By default, what port does a web server use?

A. 80

B. 8080

C. 489

D. 21

Correct Answer: A

When you view web pages, you are connecting to the web server using TCP port 80.

QUESTION 10

What is the minimum permission needed to print to a printer and to manage your own print jobs?

A. Print

B. Manage this Printer

C. Manage Documents

D. Full Control

Correct Answer: A

The Print permission allows users to send documents to the printer. Users automatically have the permission to manage their print jobs.

QUESTION 11

You need to restart the print spooler on a Windows Server 2016 server. Which tool should you use?

A. Devices and Printers

B. The Device Manager

C. Printer Properties

D. The Services console

Correct Answer: D

You can restart a service from the Services applet (available in Administrative Tools).

QUESTION 12

Which of the following are the types of disk partitioning styles supported by Windows Server 2016? Each correct answer represents a complete solution. (Choose two.)

A. Interactive Partition

B. Master Boot Record

C. GUID Partition Table

D. Server Core Partition

Correct Answer: BC

Windows Server 2016 supports the following two types of partitioning styles:

Master Boot Record (MBR): MBR is the partitioning style that allows up to four primary partitions per disk.

GUID Partition Table (GPT): GPT is the partitioning style that allows up to 128 partitions on each disk.

Incorrect Answers:

A, D: Server core and interactive are types of installation techniques.

QUESTION 13

What is the recommended share permission and NTFS permission you should assign to a folder that you shared?

A. Full Control

B. Read

C. Write

D. List Folder and Execute

Correct Answer: A

As with NTFS, you can allow or deny each share permission. To simplify managing share and NTFS permissions, Microsoft recommends giving Everyone Full Control at the share level, and then controlling access via NTFS permissions.

QUESTION 14

To protect a server in case of a blackout, you should use a/an:

A. Uninterruptible Power Supply.

B. Dedicated surge protector.

C. Power Supply Unit.

D. Redundant power supply.

E. Hot-swappable power supply.

F. Line conditioner.

Correct Answer: A

QUESTION 15

What happens to a file\'s permissions if you copy it from one volume to another?

A. The file will have the permissions as before.

B. The file will acquire the permissions of the target folder.

C. The file will acquire the permissions of the source folder.

D. The file will have no permissions.

Correct Answer: B

If a folder or file is copied, the new folder or file will automatically acquire the permissions of the drive or folder to which

it is being copied.
