QUESTION 1

Your company uses Windows 10 Work Folders on personal devices. The devices are all registered in Microsoft Intune.

You need to enforce the following security requirements on the personal devices:

Company data can be removed if an employee is terminated. Company data cannot be accessed if a device is lost or stolen.

What should you do?

- A. Enable selective wipe, and enforce a lock screen and password
- B. Enable selective wipe, and secure files transfers with SSL
- C. Enable selective wipe, and enforce encryption
- D. Enforce encryption and enforce a lock screen and password

Correct Answer: C

*

Microsoft Intune provides selective wipe, full wipe, remote lock, and passcode reset capabilities. A selective wipe to remove only company data.

*

Encryption on Mobile Devices can be managed with Configuration Manager and Intune

Reference: Help protect your data with remote wipe, remote lock, or passcode reset using Microsoft Intune <https://technet.microsoft.com/en-us/library/jj676679.aspx> Reference: Managing Encryption on Mobile Devices with Configuration Manager and Intune <http://blogs.technet.com/b/pauljones/archive/2014/08/04/managing-encryption-on-mobile-devices-with-configuration-manager-and-intune.aspx>

QUESTION 2

Your company needs a service that eliminates a single point of failure on any provisioned service.

Which feature can Microsoft Azure offer to lower the probability of a failure that disrupts business operations?

- A. HDInsight
- B. scalability
- C. high availability
- D. backup

Correct Answer: C

A highly available cloud application implements strategies to absorb the outage of the dependencies like the managed services offered by the cloud platform's capabilities, this approach

permits

the application to continue to exhibit the expected functional and non-functional systemic characteristics.

Incorrect answers:

Not A: Azure HDInsight deploys and provisions Apache Hadoop clusters in the cloud, providing a software framework designed to manage, analyze, and report on big data with high reliability and availability.

Reference: Disaster Recovery and High Availability for Azure Applications

<https://msdn.microsoft.com/en-us/library/azure/dn251004.aspx>

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

In order to install Microsoft Intune client software on a computer, you need to be a member of that computer's "Administrators" group. Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If

the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. Remote Management users
- C. Power users
- D. Remote Desktop users

Correct Answer: A

The account that installs the Intune client software must have local administrator permissions to that computer.

Reference: Requirements for Microsoft Intune <https://technet.microsoft.com/en-us/library/dn646950.aspx>

QUESTION 4

You are setting up the networking for a single-site motel. For three different classes of users, you need to specify the most privileged network segment each can access.

Match each network to the class of users that can access it.

Instructions: To answer, drag the appropriate network from the column of the left to the class of users on the right. Each network may be used once, more than once, or not at all. Each correct match is worth one point.

Select and Place:

Network

Private network
Public network
Extranet

Answer Area

Guests	Network
Employees	Network
Business Partners	Network

Correct Answer:

Network

Answer Area

Guests	Public network
Employees	Private network
Business Partners	Extranet

*

Guest have only public access.

*

Only the Employees have access to the private network.

*

An extranet is a private network that uses Internet technology and the public telecommunication system to securely share part of a business's information or operations with suppliers, vendors, partners, customers, or other businesses. Reference: <http://en.wikipedia.org/wiki/Extranet>

QUESTION 5

This question requires that you evaluate the underlined text to determine if it is correct.

When you access a file located on a shared resource, the "most restrictive" permissions take precedence.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

- A. No change is needed.
- B. ACL
- C. NTFS
- D. share

Correct Answer: A

When using share permissions and NTFS permissions together, if there is a conflict in the configuration, the most restrictive permission prevails.

Reference: <http://www.ntfs.com/ntfs-permissions-combined.htm>

QUESTION 6

This question requires that you evaluate the underlined text to determine if it is correct.

You are setting up your home network. All devices on your home network connect through a wireless access point.

To share media files between your computer running Windows 10 and your video game system, you should create a public network.

Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

- A. No change is needed
- B. an extranet
- C. a VPN connection
- D. a private network

Correct Answer: D

References: <https://www.howtogeek.com/245982/WHATS-THE-DIFFERENCE-BETWEEN-PRIVATE-AND-PUBLIC-NETWORKS-IN-WINDOWS/>

QUESTION 7

This question requires that you evaluate the underlined text to determine if it is correct.

You manage Windows 8.1 desktop and laptop computers in your university\\'s computer lab.

The university\\'s IT team recently implemented an active directory environment.

You need to join the desktop and laptop computers to a new Active Directory domain.

You should use the "Network and Internet" Control Panel applet to achieve this goal.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

- A. No change is needed
- B. User Accounts
- C. Administrative Tools
- D. System

Correct Answer: D

Join a domain, workgroup, or homegroup

1.

Open System by swiping in from the right edge of the screen, tapping Search (or if you're using a mouse, pointing to the upper-right corner of the screen, moving the mouse pointer down, and then clicking Search), entering System in the search box, and tapping or clicking System.

2.

Under Computer name, domain, and workgroup settings, click Change settings. You might be asked for an admin password or to confirm your choice.

3.

Click Network ID and follow the steps on your screen.

Reference: <http://windows.microsoft.com/en-us/windows-8/join-domain-workgroup-homegroup>

QUESTION 8

You manage Windows 8 Pro desktop and laptop computers. Which volume types can you encrypt by using BitLocker?

- A. dynamic volumes
- B. simple volumes
- C. virtual hard disks
- D. software-used RAID

Correct Answer: B

Bitlocker supports Basic (simple) volumes.

Incorrect answers:

Not A: Dynamic disks are not supported by BitLocker.

Not C: Bootable and non-bootable virtual hard disks (VHDs)

Not D: Software-based RAID systems are not supported by Bitlocker.

Reference: BitLocker Frequently Asked Questions (FAQ)

<https://technet.microsoft.com/en-us/library/hh831507.aspx>

QUESTION 9

Which two Windows 10 tools can be used to perform BitLocker encryption? (Choose two.)

- A. Manage-bde
- B. Disk Management
- C. Microsoft Management Console
- D. BitLocker control panel

Correct Answer: AD

References: <https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-basic-deployment>

<http://www.ilovefreesoftware.com/12/windows-10/enable-bitlocker-drive-encryption-windows-10.html>

QUESTION 10

This question requires that you evaluate the underlined text to determine if it is correct.

Redundant Microsoft Azure applications are able to meet increased demand with consistent results in acceptable time windows.

Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice that makes the statement correct.

- A. No change is needed
- B. Highly Available
- C. Fault Tolerant
- D. Scalable

Correct Answer: D

Scalable applications are able to meet increased demand with consistent results in acceptable time windows.

When a system is scalable, it scales horizontally or vertically to manage increases in load while maintaining consistent performance. In basic terms, horizontal scaling adds more machines of the same size (processor, memory, bandwidth)

while vertical scaling increases the size of the existing machines.

Reference: Disaster Recovery and High Availability for Azure Applications

<https://msdn.microsoft.com/en-us/library/azure/dn251004.aspx>

QUESTION 11

This question requires that you evaluate the underlined text to determine if it is correct.

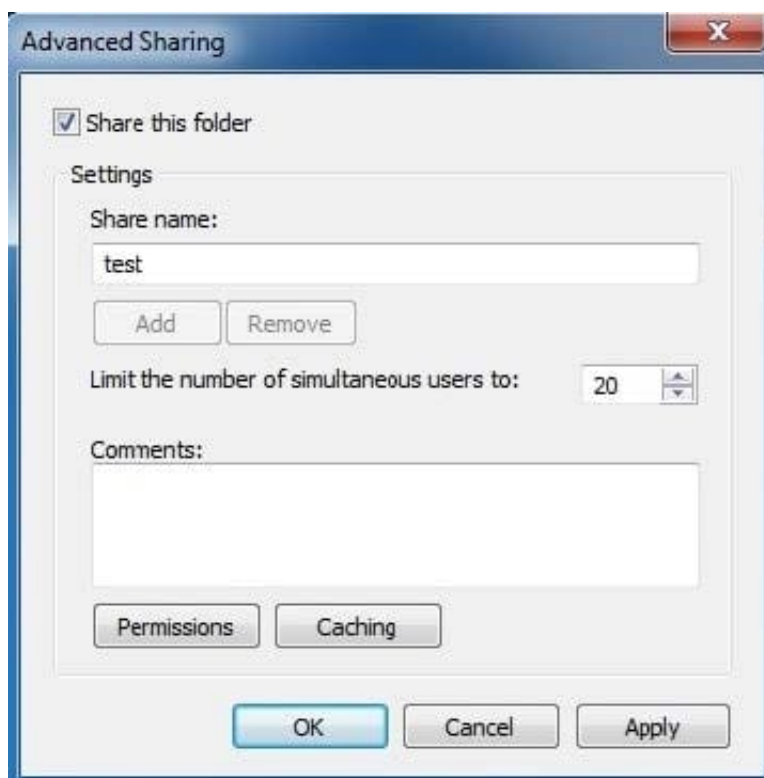

You have a Windows 8.1 computer in a WorkGroup. To share the C:\Work folder and make it available to offline users, you need to use the "public" share option. Instructions: Review the underlined text. If it makes the statement correct,

select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

- A. No change is needed
- B. advanced
- C. HomeGroup
- D. basic

Correct Answer: B

In the advanced sharing dialog box Click on "Caching" button. In "Offline settings" dialog box, you can set up caching for files and programs which are offline.

You have the following options:

i) Only the files and programs that users specify are available offline: If you select this option then, users specify the files and programs which can be accessed offline. It is the default option. ii) No files or programs from the share are available

offline: If you select this option then, caching will be turned off. iii) All files and programs that users open from the share are automatically available offline: If you select this option then, caching is turned on for all files and programs and they can be accessed offline. Check option "Optimize for performance".

Reference: How to set advanced sharing options, custom permissions, caching for folder in Windows 7? <http://www.morprocess.com/operating-systems/windows-7/how-to-set-advanced-sharing-options-custom-permissions-caching-for-folder-in-windows-7>

QUESTION 12

You are a desktop support engineer for an advertising company that uses Windows 8.1 workstations.

An employee who manages video content for the company website recently lost important video files due to a single-drive failure on a Windows 8.1 workstation. You need to prevent a single-drive failure from occurring again on this

employee's workstation, which only has a capacity for three physical hard drivers. Additionally, the employee requires optimal performance when manipulating and streaming video files.

Which Storage Space solution should you implement?

A. three-way mirror

- B. parity spaces
- C. simple spaces
- D. two-way mirror

Correct Answer: B

Parity spaces (also known as RAID-5) are designed for storage efficiency and protect your files from drive failure by keeping more than one copy. Parity spaces are best for archival data and streaming media, like music and videos. This storage layout requires at least three drives to protect you from a single drive failure and at least seven drives to protect you from two drive failures.

Reference: Storage Spaces: FAQ <http://windows.microsoft.com/en-us/windows-8/storage-spaces-pools>

QUESTION 13

This question requires that you evaluate the underlined text to determine if it is correct.

The "ExFAT" file system can automatically verify and auto correct data to avoid file system errors.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

- A. No change is needed
- B. NTFS
- C. FAT32
- D. ReFS

Correct Answer: D

Resilient File System (ReFS) is a Microsoft proprietary file system introduced with Windows Server 2012 with the intent of becoming the "next generation" file system after NTFS. ReFS key design advantages are intended to include automatic

integrity checking and data scrubbing, removing the need for chkdsk and protecting against data degradation.

Incorrect answers:

Not A: exFAT (Extended File Allocation Table) is a Microsoft file system optimized for flash drives. exFAT can be used where the NTFS file system is not a feasible solution (due to data structure overhead), or where the file size limit of the standard FAT32 file system is unacceptable.

Reference: <http://en.wikipedia.org/wiki/ReFS>

QUESTION 14

What are two ways to lower the risk of a virus or malware infection? Choose two.

- A. Enable the Windows firewall
- B. Use only HTTPS while web surfing
- C. Keep the system updated
- D. Install a download manager

Correct Answer: AC

QUESTION 15

You perform a bare metal installation of Microsoft Windows 10 Enterprise on a new computer. The computer has a single 1 TB hard disk that you configure as a single partition. Which file system should you use to format the disk partition?

- A. NTFS
- B. ReFS
- C. FAT32
- D. exFAT

Correct Answer: A
