Exam Code: 9L0-518

Exam Name: OS X Server Essentials 10.8 Exam

Version: Demo

QUESTION 1

In Server app, which procedure will configure OS X Server to let members of a specific group use the Messages service?

- A. Select the Messages service, click the Users and Groups tab, and then select the group, and click OK.
- B. Select Groups, then select the group, and from the Action pop-up menu, choose "Edit Access to Services." Select the Messages checkbox, and click OK.
- C. Select the server, click Access, and then click the Services button. Select Messages in the Service list, click "Allow only users and groups below," click Add (+) to add the group, and then click Done.
- D. Select the server, click Settings, and then click the Services button. Select Messages in the Service list, click Allow Access, click Add (+) to add the group, and click OK.

Correct Answer: B

QUESTION 2

At PretendCo, users currently have to remember multiple names and passwords to access various servers.

Which of these OS X Server services can you deploy to let users access the servers using a single set of credentials?

- A. Contacts
- B. File Sharing
- C. Open Directory
- D. Profile Manager

Correct Answer: C

QUESTION 3

On an OS X computer running Mountain Lion, changes made in the Software Update pane of System Preferences apply to ALL users of the system.

- A. True
- B. False

Correct Answer: A

QUESTION 4

Which utility can you use to display the status of Kerberos TGTs on an OS X Mountain Lion computer?

- A. Ticket Viewer
- B. Server app
- C. Directory Utility
- D. System Preferences

Correct Answer: A

QUESTION 5

You want to manage iOS devices over the air using Profile Manager. To do so, which THREE of these must be available to Profile Manager? (Select 3)

- A. A running AFP server
- B. A computer with iPhone Configuration Utility running
- C. A valid Apple Push Notification Service certificate
- D. An Open Directory master
- E. A valid self-signed or verified SSL certificate

F. A configured WebDAV share

Correct Answer: CDE

QUESTION 6

In a default OS X configuration, you want to change the way that Finder handles ZIP archives. Where can you make that change?

- A. System Preferences
- B. Disk Utility Preferences
- C. Archive Utility Preferences
- D. Finder Preferences

Correct Answer: C

QUESTION 7

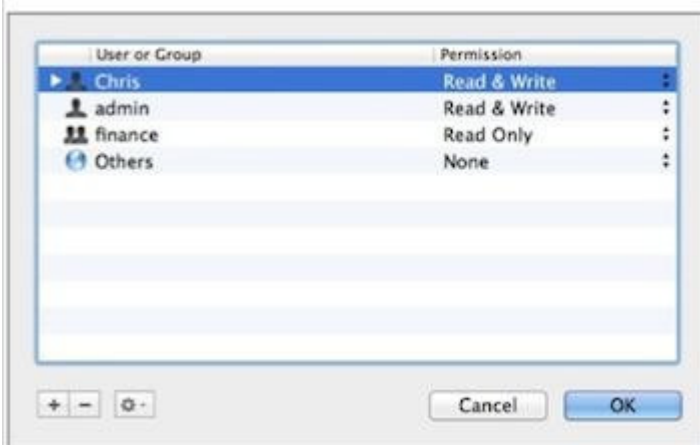

A user named Robert has an existing user account. The user name associated with his account is Robert. Robert wants to use Bob as his user name when accessing some of the services provided by a Mac running OS X Server. How can you accommodate his request?

- A. In Workgroup Manager, click Settings and add a rule to the Services list that substitutes Bob in place of Robert.
- B. In Workgroup Manager, create a new user with the user name Bob. Select the Robert account, and add the new Bob account to the list in the Aliases pane.
- C. In Server app, go to the Advanced Options pane for Robert's account, and add Bob as an alias.
- D. In Server app, add a rule to the Services list in the Settings pane that substitutes Bob in place of Robert.

Correct Answer: C

QUESTION 8

On an OS X Mountain Lion computer with OS X Server installed, you have created a share point named "Finance Dept" that contains a folder named "Reports." The permissions for both are shown below. Chris is not a member of the Finance group, but you would like her to have access to the Finance Dept share point. In Server app, you select the server, click the Storage tab, select the Finance Dept folder, and modify its permissions as shown below.

After changing the permissions on the share point, what access will Chris have to the reports Folder in the share point?

- A. None
- B. B.Read & Write
- C. Write-only
- D. Read-only

Correct Answer: B

QUESTION 9

Which utility is on the OS X Recovery partition?

- A. Firmware Password Utility
- B. Boot Camp Assistant
- C. Activity Monitor
- D. Console

Correct Answer: A

QUESTION 10

Which statement best describes the function of Gatekeeper?

- A. To prevent users from opening untrusted applications.
- B. To prevent users from downloading untrusted applications.
- C. To prevent users from installing untrusted applications.
- D. To prevent users from installing viruses and trojan horses.

Correct Answer: A

QUESTION 11

Which process will let you start up a Mac in target disk mode?

- A. Open the Startup Disk preferences, click Target Disk Mode, and then click Restart.
- B. Hold down the Option key on the keyboard as the Mac starts up, until a dialog appears, then select Target Disk Mode from the dialog.
- C. Hold down the S key on the keyboard while the Mac starts up, then enter the command `reboot -target`.
- D. Start up from the OS X Recovery partition, choose Target Disk Mode from the Startup Disk menu, and restart the Mac.

Correct Answer: A

QUESTION 12

Using Server app, you are configuring email alerts to be sent to an OS X Server system administrator.

Which TWO of these server events can you set to trigger an alert? (Select 2)

- A. A user has exceeded his or her assigned disk quota for file sharing.
- B. New software updates are available for the server.
- C. An unsuccessful attempt was made to log in with the root account.
- D. A certificate has expired or is about to expire.
- E. The number of files on the server has exceeded a specified number.

Correct Answer: AB

QUESTION 13

Which tool can you use to verify that a device profile is installed on an OS X Mountain Lion computer?

- A. Ticket Viewer
- B. The `klist` command in Terminal
- C. Profiles pane in System Preferences
- D. Users & Groups pane in System Preferences

Correct Answer: C

QUESTION 14

How can you display the contents of a hidden folder on a mounted volume in Finder?

- A. From the Finder menu, choose Preferences, and select "Show hidden items."
- B. Select the volume icon and choose "Show hidden items" from the Action menu.
- C. From the View menu, choose "Show hidden items."
- D. From the Go menu, choose "Go to Folder," enter the path to the hidden folder, and click Go.

Correct Answer: D

QUESTION 15

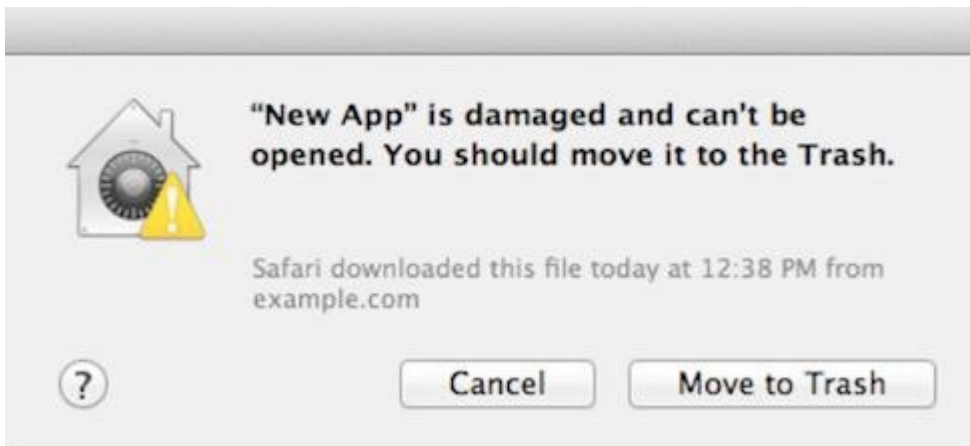

Which statement about Gatekeeper is TRUE?

- A. Gatekeeper can ONLY be disabled using a configuration profile.
- B. Standard users can bypass Gatekeeper.
- C. Only the root user can disable Gatekeeper.
- D. Only administrator users can bypass Gatekeeper.

Correct Answer: D

QUESTION 16

Review the screenshot and answer the question below.

You downloaded an app using Safari. When you try to open the app, you see the message shown above.

What is a possible explanation?

- A. The app was signed using a certificate from an unknown authority.
- B. The certificate needed to decrypt this app cannot be found in the keychain.
- C. Gatekeeper has recognized that the app was altered after it was signed.
- D. The sandbox into which the app was downloaded by the quarantine system has become corrupted.

Correct Answer: C

QUESTION 17

Which procedure will permit only the Marketing group to access a website hosted on OS X Server?

- A. Using Server app, double-click the website from the list of websites, add a realm, and enable Allowed Access for the Marketing group.
- B. In Finder, edit the permissions of the site folder to Read-only for the Marketing group, and No Access for the everyone group.
- C. In Finder, edit the permissions of the site folder to Read/Write for the Marketing group, and No Access for the everyone group.

- D. Using Server app, double-click the website from the list of websites, and select the Marketing group from the Who Can Access menu.

Correct Answer: D

QUESTION 18

What is the minimum amount of RAM required to install and run OS X Server on an OS X Mountain Lion computer?

- A. 2 GB
- B. 4 GB
- C. 6 GB
- D. 8 GB

Correct Answer: A

QUESTION 19

You configured the Time Machine service on a computer with OS X Server to store backup data on the Data volume. Later you configure the service to store the backup data on a larger volume named Backup Data.

How is the backup data handled after the switch to the new backup volume?

- A. The next time users back up, new and changed files are backed up to the new volume, along with aliases pointing to the data on the old volume.
- B. The next time users back up, all their files are backed up to the new volume.
- C. Users are presented with a dialog asking which volume they want to use to store their backup data.
- D. OS X Server copies the existing backup data from the old volume to the new volume.

Correct Answer: B

QUESTION 20

What are TWO ways administrators can remove a device group profile from an OS X Mountain Lion computer? (Select 2)

- A. In Workgroup Manager, select the group, click Preferences and click the Delete (-) button.
- B. In the Profiles pane in System Preferences, select the profile, and click the Remove (-) button.
- C. In Profile Manager, click Device Groups, select the appropriate device group, click Members, and click the Delete (x) button to the right of the member computer.
- D. In Server app, select the group, click the Edit (pencil) button in the Group pane, and deselect Manage.
- E. In the Profiles tab in Device Manager, select the OS X Mountain Lion computer, select Profiles, select the group, and click the Delete (-) button.

Correct Answer: BE

QUESTION 21

Review the screenshot, and then answer the question below.

You are manually restoring the home folder for a new user account, and see the message shown above. What will happen if you click Cancel?

- A. The existing home folder's name will be changed to match the one you entered in the new account sheet.
- B. You will be returned to the new account sheet in the Users & Group pane.
- C. The account name will be changed to the name of the existing home folder.
- D. The existing home folder will be displayed in the Finder with the name selected.

Correct Answer: B

QUESTION 22

Review the screenshot of settings for the Contacts app on an OS X Mountain Lion client computer, and then answer the question below.

The OS X Mountain Lion computer whose Contacts settings are shown above is connected to an active Contacts service on an OS X Server at contacts.pretendco.com. By default, where will new contacts be stored?

- A. In the user's iCloud account, and on all devices configured to use that iCloud account
- B. On the Contacts server and on the Mountain Lion client computer
- C. Only on the Mountain Lion client computer
- D. Only on the Contacts server

Correct Answer: B

QUESTION 23

Review the screenshot, and then answer the question below.

While attempting to reinstall OS X Mountain Lion in Recovery mode, you get the error message shown above. Your Mac is physically connected to an Ethernet network. Which tool can you use to diagnose the problem further?

- A. Network Diagnostics
- B. Network Utility
- C. Internet Connect
- D. Network Preferences

Correct Answer: B

QUESTION 24

Which tool can you use to configure SACLs for OS X Server running on Mountain Lion?

- A. Profile Manager
- B. Server Admin
- C. Server app
- D. Workgroup Manager

Correct Answer: C

QUESTION 25

You can configure Time Machine to delete versions of files as soon as they reach a specified age.

- A. True
- B. False

Correct Answer: B

QUESTION 26

You want to secure the communication between the Calendar service in OS X Server and its Calendar

clients in OS X Mountain Lion. In Server app, which of these can you use to achieve your goal?

- A. A complex global password policy
- B. An SSH tunnel
- C. An SSL certificate and the HTTPS protocol
- D. A Kerberos Ticket Granting Ticket (TGT)

Correct Answer: C

QUESTION 27

What advantage is gained by configuring the Contacts service in OS X Server to provide LDAP searches?

- A. It lets admins integrate Microsoft Exchange Server with the Contacts service.
- B. It enables third-party contact management apps to be integrated with the Contacts service.
- C. It eliminates the need for users to configure the Contacts app to perform LDAP searches.
- D. It lets the Contacts service sync contact modifications to the LDAP server.

Correct Answer: C

QUESTION 28

Review the screenshot of Contacts service settings in Server app, and then answer the question below.

Why is the "Include directory contacts in search" option dimmed?

- A. The server is neither configured as an Open Directory Master nor bound to a directory server.
- B. The data folder for the Contacts service is empty.
- C. The folder containing the Contacts data is not configured as a share point.
- D. The Websites service is not turned on.

Correct Answer: A

QUESTION 29

Using Server app, how do you configure the Websites service in OS X Server to serve website files that are stored on a volume other than the system volume?

- A. In /Library/Web Server/Documents/, create an alias to the folder on the external volume, then select the alias in the Web Site Configuration pane.
- B. Drag the website files from the external volume into the Websites pane.
- C. Click Add (+) to create a new website, and in the New Web Site pane choose a folder on the external volume from the "Store Site Files In" pop-up menu.
- D. Click Add (+) and add the external volume to the list of Websites service folders, then store the website files in Library/WebServer/Documents/ on the external volume.

Correct Answer: C

QUESTION 30

You have configured the Mail service in OS X Server to scan email for viruses. Where on the server can you locate email that has been identified as containing a virus?

- A. /etc/virusmails
- B. /Library/Server/Mail/Data/scanner/virusmails
- C. /System/Library/server/mail/virusmails
- D. /var/virusmails

Correct Answer: B

QUESTION 31

You are creating a user account on OS X Server. Which of these is a valid account name (short name) for the user account?

- A. j smith
- B. jsmith/pretendco
- C. j.smith
- D. jsmith@pretendco

Correct Answer: C

QUESTION 32

Review the screenshot, and then answer the question below. If you change the folder privilege for "everyone" to Read & Write, Finder, by default, will change the permissions of items inside the folder to match.

- A. True
- B. False

Correct Answer: B

QUESTION 33

Which of these is a recovery key storage location that FileVault 2 offers when you enable it?

- A. An Apple server
- B. The System Keychain
- C. The OS X Recovery partition
- D. Your iCloud account

Correct Answer: A

QUESTION 34

Using the Parental Controls preferences, which restriction can you impose on an account?

- A. Restrict the account to sending emails only to defined email addresses.
- B. Restrict the account to downloading only specified file types, such as text or audio files, from the Internet.
- C. Restrict the account to a defined set of the services available from the Sharing pane of System Preferences.
- D. Restrict the account to a defined amount of disk space for the home folder.

Correct Answer: A

QUESTION 35

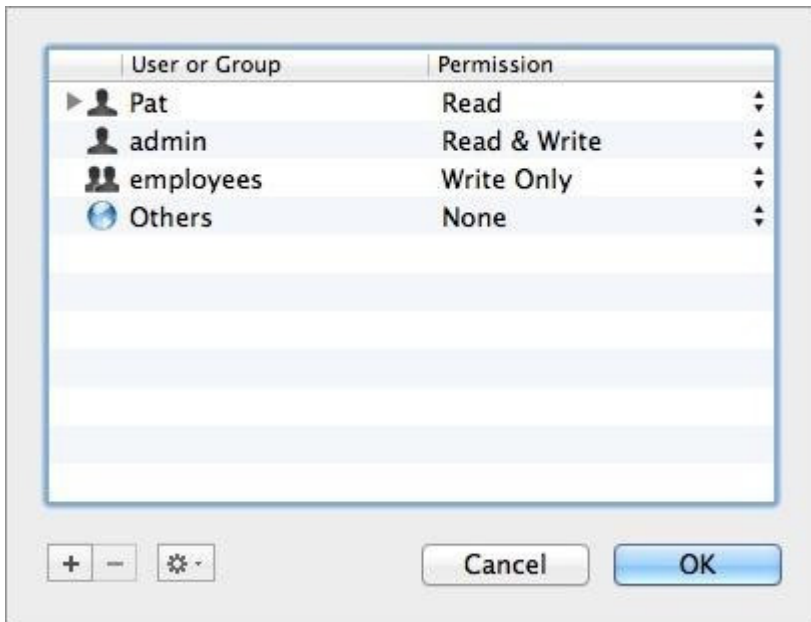

A user account was accidentally deleted in OS X Server. You create a new account with the same short name for the user. The user logs in to the file service running on the server, but cannot access many of the files and folders that were accessible from the old account. What is a LIKELY reason for this behavior?

- A. Repair Permissions has been performed on the volume.
- B. An ACE on the server allowed access to the files and folders based on the UID of the original account.
- C. An ACE on the server allowed access to the files and folders based on the GUID of the original account.
- D. Repair Permissions has NOT been performed on the volume.

Correct Answer: C

QUESTION 36

Review the screenshot from Server app of the Permissions dialog for a folder, and then answer the question below.

Pat is a member of the employees group. You have assigned permissions to a folder as shown in the screenshot.

What access does Pat have to the folder?

- A. Pat has both read and write access to the folder.
- B. Pat does not have any access to the folder.
- C. Pat has write-only access to the folder.
- D. Pat has read-only access to the folder.

Correct Answer: A

QUESTION 37

Which statement is TRUE of file and folder permissions in the Finder in OS X Mountain Lion?

- A. A user with Write-only permissions to a folder can delete any file in that folder.
- B. A user with Read-only permissions to a folder CANNOT rename any files in that folder.
- C. A user with Write-only permissions to a folder can rename any file in that folder.
- D. A user with Read-only permissions to a folder CANNOT view any files in that folder.

Correct Answer: B

QUESTION 38

Review the screenshot, and then answer the question below.

If you click Delete User in the dialog shown above, what will happen to James White's home folder?

- A. "Deleted" will be appended to the home folder name, and its permissions will be changed to allow administrator user access only.
- B. "Deleted" will be appended to the home folder name, and it will be archived in Time Machine in a compressed and encrypted file.
- C. It will be deleted immediately, without being moved to the Trash.
- D. It will be moved to the Trash.

Correct Answer: C

QUESTION 39

You have just installed and configured OS X Server on a Mountain Lion computer. How do you acquire an SSL certificate from a trusted CA?

- A. Use a certificate signing request file to generate a self-signed certificate, then send the self-signed certificate to a trusted CA, and the CA will generate and send you a signed SSL certificate.
- B. Configure a CA using the openssl command, and then create and sign a certificate signing request (CSR); use Certificate Assistant to convert this CSR in the system keychain to a certificate.
- C. Create a certificate signing request (CSR) using the openssl command, and then use the CSR to create and sign an SSL certificate.
- D. Use a self-signed certificate to generate a certificate signing request (CSR), then send the CSR to a trusted CA, and the CA will generate and send you a signed SSL certificate.

Correct Answer: D

QUESTION 40

When you turn on Time Machine service in OS X Server, which other service must also be running on the server to allow users to remotely back up their data using the Time Machine service?

- A. File Sharing
- B. DHCP
- C. VPN
- D. Profile Manager

Correct Answer: A

QUESTION 41

Which step is required in order to enable the management of OS X Server via Server app on a client Mac?

- A. On the client, open Server app, select the server, click Settings, and select "Allow remote login using SSH."
- B. On the client Mac, open the Sharing pane of System Preferences, and select Remote Management.
- C. On the server, open Server app, select the server, click Settings, and select "Allow remote administration using Server."
- D. On the server, open the Sharing pane of System Preferences, and select Remote Management.

Correct Answer: C

QUESTION 42

Which statement best describes how Time Machine stores files from an OS X Mountain Lion computer, when backing up to a directly-connected FireWire hard disk drive?

- A. Each file is saved to the external hard disk once. File changes are stored in a database on the external hard disk.
- B. Each file is rewritten to the external hard disk during each backup.
- C. Each file is saved to the external hard disk once. Files that do not change between backups are represented by hard links to save space.
- D. Each file is saved to the external hard disk once. Files that do not change between backups are represented by symbolic links to save space.

Correct Answer: C

QUESTION 43

Server app provides graphs that let you monitor patterns over time for which TWO server stats? (Select 2)

- A. number of connected users
- B. memory usage
- C. temperature
- D. processor usage
- E. amount of disk space used

Correct Answer: BD

QUESTION 44

You started up a Mac from its OS X Recovery partition to complete a task. When you restarted, the Mac started up from the OS X Recovery partition again. How can you configure it to start up from a different volume?

- A. Choose Terminal from the Utilities menu, type `startupdisk -[volume name]` and press Return.
- B. Choose Disk Utility from the Apple menu, and select a startup volume.
- C. Choose Startup Disk in the OS X Utilities window, and select a startup volume.
- D. Choose Startup Disk from the Apple menu, and select a startup volume.

Correct Answer: D

QUESTION 45

You are logged into a MacBook Pro as a standard user. How can you display the OS X Mountain Lion build number?

- A. Choose About This Mac from the Apple menu, and then click the text directly under OS X until the build number is revealed.
- B. Type `build_number` in Spotlight, and then scroll through the resulting information until the build number is revealed.
- C. Choose Software Update from the Apple menu, and then choose Build Number from the Update menu.
- D. In the General pane of System Preferences, click the Info disclosure triangle to reveal the build

number.

Correct Answer: A

QUESTION 46

In order to sign a configuration profile, which steps must you complete?

- A. In the Profile Manager service in Server app, select "Sign configuration profiles" and choose a valid code-signing SSL certificate.
- B. In the Profile Manager web app, select "Sign configuration profile" and choose a valid code-signing SSL certificate.
- C. In the Profile Manager service in Server app, select "Sign configuration profiles" and choose a valid Apple Push Notification service certificate.
- D. In the Profile Manager web app, select "Sign configuration profiles" and choose a valid Apple Push Notification service certificate.

Correct Answer: A

QUESTION 47

What is an advantage of deploying signed Profile Manager profiles, rather than unsigned Profile Manager profiles?

- A. Signed profiles can be installed on mobile devices and computers; unsigned profiles can only be installed on computers.
- B. Signed profiles can be updated on devices via an update process; unsigned profiles must be deleted before a new profile can be installed.
- C. An unsigned profile's source or contents may be tampered with; signing validates both.
- D. Signed profiles cannot be removed by users without administrator authorization; unsigned profiles can be.

Correct Answer: C

QUESTION 48

You are using System Image Utility in OS X Mountain Lion to create a network disk image. Which of these is NOT a valid source for creating the image?

- A. A mounted disk image of a hard disk with OS X Mountain Lion installed
- B. OS X Mountain Lion installer app
- C. A Mac mini with OS X 10.7 installed
- D. A MacBook Pro running OS X Mountain Lion and booted in target disk mode

Correct Answer: C

QUESTION 49

Where is the utility for creating network disk images stored, by default, on a Mac with OS X Mountain Lion?

- A. In /Server/Utilities/
- B. In /Applications/Utilities/
- C. in /System/Library/CoreServices/
- D. in /Applications/Server/, but only after you have installed OS X Server

Correct Answer: C

QUESTION 50

On an OS X Mountain Lion computer with OS X Server installed, instant in OS X Mountain Lion, pressing Command that contains a folder named "Reports." The permissions for both are shown below. Pat is not a member of the Finance group, but you would like her to have access to the Finance Dept share point. Using the Share Points pane in the File Sharing service in Server app, you modify the permissions of the share point as shown below.
