QUESTION 1

How can the DevOps Engineer prevent any user from logging in with the default admin credentials during startup of the AEM instance?

- A. Update the default password in the OSGi configuration for the OSGi web console
- B. Change the default AEM admin password on initial setup
- C. Configure the dispatcher to prevent access to /system/console
- D. Disable the OSGi web console login bundle by using the production ready runmode

Correct Answer: B

QUESTION 2

A company is launching a new multinational AEM site. The new site will have a large pool of authors all over the world. The company needs to be sure it can handle the load.

The load requirements for the new site are as follows:

A daily load scaling from 100 to 1000 authors Create multiple pages and live copies (including MSM rollouts) Upload multiple images into Assets Assign 1000 tags to each new pages

What can the DevOps Engineer do to make sure the AEM instance can handle the load?

- A. Set up a cold standby instance
- B. Use standard Cloud Manager tests
- C. Set up auto scaling
- D. Use Adobe Tough Day 2

Correct Answer: D

QUESTION 3

An AEM instance is restarted with the command: `java -Dsling.run.modes=author -jar cq-publish.jar -r author`. The `slings.properties` includes the line `slings.run.modes=publish`.

In which runmode is AEM started?

- A. Author runmode because the `-r` parameter has the highest priority
- B. Publish runmode because it is determined from the quickstart jar filename
- C. Author runmode because the system property `slings.run.modes` has the highest priority

D. Publish runmode because the sling.properties file has the highest priority

Correct Answer: B

QUESTION 4

A DevOps Engineer configures a delay in the out of the box online backup.

What is the result of a delay that is too large?

- A. Excessive reads of the repository occur.
- B. The backup takes more than 24 hours.
- C. The CPU usage is reduced too much.
- D. Too many file writes occur.

Correct Answer: B

QUESTION 5

The DevOps Engineer sees many occurrences of org.apache.sling.api.resource.LoginException in the logs.

Apache Sling Service User Mapper Service is configured with a default user. Service user mapping is configured for the OSGi bundle, causing the exception.

What is the root cause of these exceptions?

- A. There is no service user mapping configured for the Java class causing the exception.
- B. The exceptions relate to failed login attempts with incorrect credentials.
- C. The configured service user is not a system user or does not exist.
- D. Administrative resource resolvers have been disabled by configuration and the bundle deployed still relies on it.

Correct Answer: D

QUESTION 6

A DevOps Engineer notices that the disk usage for an AEM author instance is constantly going up.

Upon further investigation, it is revealed:

- Online Compaction is unable to complete revision cleanup task during the daily maintenance window
- Segment Store Size has gone up from 8 GB to 13 GB
- The following message is logged in the error.log file

Canceling RevisionGC. The task was either stopped by the user or the Maintenance Window reached its end - Lucene Binaries Cleanup task completed successfully during the daily maintenance window

What additional step can be performed during the weekly maintenance window to reduce the overall disk usage?

- A. Invoke startRevisionGC() for SegmentRevisionGarbageCollection mbean in the JMX console
- B. Invoke startBlobGC(boolean markOnly, boolean forceBlobIdRetrieve) for BlobGarbageCollection mbean in the JMX console
- C. Set full compaction schedule property for com.adobe.granite.maintenance.crx.impl.RevisionCleanupTask to a preferred day
- D. Set the job.topics property for com.adobe.granite.maintenance.crx.impl.DataStoreGarbageCollectionTask to com/adobe/granite/ maintenance/job/DataStoreGarbageCollectionTask

Correct Answer: B

QUESTION 7

A custom servlet will be called by the end user, but it is unauthorized.

The dispatcher includes a filter rule to allow the path The correct permissions are granted The servlet path is /system/public/post

What action must the DevOps Engineer take to make the servlet accessible?

- A. Add the servlet path to the Apache Sling Authentication Service configuration
- B. Configure the anonymous user inside of the AEM security permissions tab
- C. Add a new authentication configuration for the servlet agent under/etc/servlets
- D. Change the anonymous user name in the Apache Sling Authentication Service configuration

Correct Answer: B

QUESTION 8

A DevOps Engineer is deploying an AEM environment in a private network.

How can the DevOps Engineer restrict other clients or applications from flushing the cache?

- A. Set up client certificate authentication in the dispatcher configuration
- B. Set permissions on the publish instance by using Access Control Lists to allow the publish instance private IPs
- C. The allowedClients section in the dispatcher configuration should only allow the publish instances private IPs
- D. Configure the /filter section of the dispatcher configuration with an allow rule to make sure the correct client's private IPs are allowed to flush the cache

Correct Answer: A

QUESTION 9

Which HTTP header should be used to flush a particular resource such as JSON data without invalidating the other parts of cache?

- A. CQ-Action-Scope: ResourceOnly
- B. CQ-Handle: ResourceOnly
- C. CQ-Action-Scope: Resource
- D. CQ-Action: Resource

Correct Answer: A

QUESTION 10

A DevOps Engineer must configure a production deployment pipeline. The AEM environment consists of one author instance, two publish instances, and two dispatcher instances. A load balancer and CDN are also leveraged.

In combination with load balancing, which step is required to make sure that the site is available during deployment?

- A. Point the CDN to the author instance during the publish instance deployment
- B. Perform the deployment on one publish instance at a time
- C. Clear the CDN cache after the author instance deployment
- D. Disable the replication agents during the deployment

Correct Answer: D
