QUESTION 1

An experimental design that starts with a baseline phase, followed by a treatment phase, then another baseline phase, and ends in the same type of treatment phase is called a (n):

- A. ABA design.
- B. reversal design.
- C. multi-element design.
- D. multiple baseline design.

Correct Answer: B

QUESTION 2

Manipulating a student's chair in a classroom setting to avoid distraction from the window is an example of a manipulation of a

- A. Context variable
- B. Antecedent variable
- C. Confounding variable
- D. Ecological variable

Correct Answer: B

QUESTION 3

In order to decrease the occurrence of an inappropriate behavior effectively, a behavior analyst should simultaneously increase

- A. reinforcement for all other behaviors.
- B. acceptable alternative behaviors.
- C. consequences for inappropriate behavior.
- D. response effort for incompatible behaviors.

Correct Answer: B

QUESTION 4

Speed, magnitude, durability and generality of effect are some of the MOST important

- A. dimensions of behavior that lend themselves to quantification more readily than others.
- B. variables that are overlooked by other social sciences in solving problems.
- C. variables to consider when selecting reinforcers and punishers.
- D. components of treatment packages used in treating the most severe behavior problems.

Correct Answer: C

QUESTION 5

Sammy is having a difficult time completing his independent math worksheet on two-digit division. He is frustrated and doesn't understand how to solve the equations.

Sammy raises his hand and asks for "help." The teacher assists Sammy. Sammy's asking for "help" is?

- A. receptive language.
- B. an intraverbal.
- C. an autoclitic.
- D. a mand.

Correct Answer: D

QUESTION 6

Reinforcing closer and closer approximations to the final desired behavior involves:

- A. chaining.
- B. differential reinforcement.
- C. precision teaching.
- D. response fading.

Correct Answer: B

QUESTION 7

The purpose of including untaught items or tasks within a Discrete Trial Instruction program is to assess:

- A. context.
- B. fluency.

- C. generalization.
- D. mastery.

Correct Answer: C

QUESTION 8

During the hour immediately following meals, Bill asks for more food. Data are collected only during this hour after each meal. Which method of data collection would be MOST accurate?

- A. duration recording
- B. frequency recording
- C. narrative recording
- D. partial-interval recording

Correct Answer: B

QUESTION 9

For which of the following would it be appropriate to measure duration?

- A. Amy responds very slowly to instructions during her discrete trials teaching sessions.
- B. Ethan leaves his work station and wanders around the building.
- C. Sarah takes so long to begin her math assignments in class that she is never able to finish on time.
- D. Ryan is trying to increase the speed of his typing at the computer keyboard.

Correct Answer: B

QUESTION 10

A narrative recording is used to clearly determine all of the following EXCEPT:

- A. duration of a behavior.
- B. function of a behavior.
- C. presence of a particular behavior.
- D. topography of undesirable behavior.

Correct Answer: B

QUESTION 11

A behavior analyst is conducting research on the accuracy of a student's responding to written math problems based on the final answer with no scoring of intermediate calculations. Which is the BEST method for obtaining accurate inter-observer agreement results?

- A. Researcher and observer sit together to score the student's work.
- B. Photocopies of the student's work are scored independently by researcher and observer.
- C. The student's scratch paper is scored if researcher and observer do not agree on a response.
- D. Researcher scores the student's work and the observer reviews the researcher's scores for accuracy.

Correct Answer: B

QUESTION 12

The use of an alternating treatments design should be considered if.

- A. it is important that multiple interventions be evaluated quickly.
- B. one needs to evaluate the effects of a single intervention across multiple settings.
- C. the results of multiple reversal designs are ambiguous.
- D. there is the possibility that the effect of one intervention will influence the effect of another.

Correct Answer: A

QUESTION 13

Teaching a student a self-talk strategy consisting of, "After I use the toilet, I must flush." is an example of.

- A. contingency shaped behavior.
- B. direct instruction.
- C. imitative instruction.
- D. rule-governed behavior.

Correct Answer: D

QUESTION 14

Which schedule of reinforcement is most effective at maintaining behaviors?

- A. Continuous reinforcement
- B. Intermittent reinforcement

C. Extinction

D. Ratio

Correct Answer: B

QUESTION 15

When setting criteria for behavior change, behavior analysts attempt to implement the simplest mode of intervention necessary to elicit the desired outcome. As such, the identified outcome criteria should be

A. applied to ecological assessments to generalize skills.

B. developed prior to the identified intervention.

C. initially broad in focus with subsequent reduction to a target response.

D. measured independent of practice effects or reactivity.

Correct Answer: B
