QUESTION 1

What is a resource group in IBM Cloud?

- A. Application resources that have been placed in the same zone
- B. A container for resources to which access privileges can be assigned
- C. A set of provisioned services labeled with the same tag
- D. A group of resources that can be created on demand using a Teraform script

Correct Answer: D

QUESTION 2

Which kind of infrastructure is VMware Shared?

- A. Dedicated infrastructure
- B. On-Premises infrastructure
- C. Multi-tenant Infrastructure
- D. Collocation Infrastructure

Correct Answer: D

QUESTION 3

On which provider is IBM Cloud's CDN service based?

- A. Cisco
- B. Amazon
- C. Akamai
- D. IBM Cloud itself

Correct Answer: C

QUESTION 4

What is a challenge of Serverless Cloud Computing in low-latency financial applications?

- A. Containers may need to cold start resulting in delays
- B. Serverless containers cannot record the logs required for financial auditing

- C. Long processing transactions can have hidden direct and indirect costs
- D. Requires new security paradigms and best practices

Correct Answer: D

QUESTION 5

A client wants to get better insights as to how their customers engage with them, enabling the client to adapt their products and services based on what they learn. Which cloud services can be added to a business case to achieve this?

- A. IoT
- B. Analytics
- C. Tririga
- D. Blockchain

Correct Answer: B

QUESTION 6

Which statement is true regarding serverless computing?

- A. Users are charged a low hourly rate during idle time for the serverless computing service
- B. Implementations differ across service providers, and capabilities vary, including supported runtimes, authentication, scaling and monitoring
- C. Serverless application are generally long-running (days or weeks) and stateful (maintain state or information across requests)
- D. Serverless is not well-suited for event processing or IOT

Correct Answer: C

QUESTION 7

Which type of database would be appropriate for a high transaction database?

- A. graph
- B. relational
- C. document
- D. key-value

Correct Answer: A

QUESTION 8

- A. Manufacturing Supply Chain
- B. Predictive Maintenance
- C. Asset Tracking
- D. Financial Services Reconciliation
- E. eCommerce Fulfillment

Correct Answer: AB

QUESTION 9

What is a virtual private cloud?

- A. A collection of public virtual machines built on private single tenant hardware
- B. A secure, isolated private cloud hosted within a public cloud
- C. A collection of private bare metal servers, running single tenant virtual machines
- D. A secure, isolated, private cloud hosted on premises

Correct Answer: B

QUESTION 10

What describes a Public Gateway?

- A. It is a service that distributes connections to VPC-hosted web sites evenly across zones
- B. It provides an encrypted network tunnel between the VPC and on-premises networks for management
- C. It enables communication to the internet for all virtual server instances on the attached subnet
- D. It is configured through rules to allow traffic to reach the network interface of attached VSIs

Correct Answer: C

QUESTION 11

Power Systems Virtual Servers on IBM Cloud supports which two operating systems? (Choose two.)

- A. Windows Server

- B. IBM
- C. VMware ESX
- D. z/OS
- E. AIX

Correct Answer: BE

QUESTION 12

According to NIST, what are the five essential characteristics of the cloud?

- A. On-demand self-service, broad network access, resource pooling, rapid elasticity, and measured service
- B. Networks, firewalls, storage, applications, and services
- C. Platform as a service, bring your own software license, ability to reply applications over the internet, software as a service, and private network
- D. On-demand network access, dedicated pool of computing resources, direct attached storage, rapid provisioning, and self service

Correct Answer: A

QUESTION 13

Which severity level should be assigned to a support case in the event of a business critical function becoming inoperable?

- A. 1
- B. 4
- C. 3
- D. 2

Correct Answer: A

QUESTION 14

What is the common name used to refer to a virtual instance that runs on a hypervisor?

- A. Bare Metal Server
- B. Dynamic LPAR
- C. Pod

D. Virtual Machine

Correct Answer: D

QUESTION 15

As part of a VPC, what do Access Control Lists provide?

- A. Subnet level firewall capabilities
- B. Ability to restrict user access by role
- C. Ability to prevent DDoS attacks
- D. Governance for privileged access

Correct Answer: A
