QUESTION 1

A development team is using the RTC web interface to update plans and work items. One user notices

that recent work item changes are not rendered in the web browser.

What is the reason for this?

A. The web browser is caching the work items.

B. The data warehouse has not yet been updated.

C. The web browser version is no longer supported.

D. User does not have permission to view the work item.

Correct Answer: A

QUESTION 2

A scrum master needs to manage work items from multiple project areas and create a cross-project plan

with a set of master work items. The scrum master wants to see a roll up of the schedules of work items

related to the master work items.

Which work item link type permits this?

A. Parent

B. Tracks

C. Resolves

D. Depends On

Correct Answer: D

QUESTION 3

Management has requested that two RTC evaluation servers and two RTC departmental servers be

deployed.

Each RTC server will have a firewall blocking access to jazz.net and requires different installation

packages.

What is the correct installation option?

A. use the Web Installer

B. use Enterprise Platform Installer

C. use IBM Installation Manager Repositories

D. use plain .zip files for the JTS and CCM Application

Correct Answer: C

QUESTION 4

A project manager wants to create an effective project dashboard and is planning the content. Which points should be considered? (Choose three.)

A. Determine the goals for the dashboard.

B. Consider creating a project plan dashboard.

C. Determine how the dashboard addresses the goals.

D. Consider the layout and number of columns for the dashboard.

E. Determine whether to use a personal, project or team dashboard.

F. Choose reports to add to the dashboard that will display the appropriate metrics.

Correct Answer: BEF

QUESTION 5

A report author needs to produce a JRS report that only shows high priority work items. How can this be accomplished?

A. Set up traceability links.

B. Link the report to a query.

C. Limit the project scope of the report

D. Add an attribute condition to the report.

Correct Answer: B

QUESTION 6

An administrator would like to prevent source code check-ins without a review and has added the Code

Review Summary to the work item editor presentation.

What additional step must be taken?

A. create Prevent Check-ins rule

B. create Approval Template

C. add appropriate preconditions

D. add Approval state to workflow

Correct Answer: B

QUESTION 7

An administrator is comparing the capabilities provided by the Jazz Team Server to those delivered by

individual Jazz applications.

What is an example of the Jazz Team Server capabilities?

A. An agile development environment.

B. Shared services to all Jazz applications.

C. Process engineering for all Jazz applications.

D. Advanced source control for geographically distributed teams.

Correct Answer: D

QUESTION 8

A developer is working on a task with outgoing change sets in a loaded repository workspace when a manager identifies a new, critical task that must be performed immediately. There are currently no unresolved changes. Without creating another repository workspace, how can the developer safely work on the critical task without losing the pending changes of the initial task?

A. The user suspends the current change sets and starts working in a new change set.

B. The user reloads the repository workspace and starts working in a new change set

C. The user creates a new change set, selects it as the current change set and checks in all changes.

D. The user loads the repository workspace in a different client and starts working in a new change set.

Correct Answer: B

QUESTION 9

A user has a project with many build definitions and wants them to be easy to find. How can these be organized?

A. Create tags and apply to appropriate build definitions.

B. Create labels and apply to appropriate build definitions.

C. Create folders and move appropriate build definitions into the folders.

D. Create collections and add appropriate build definitions into the collections.

Correct Answer: B

QUESTION 10

A user would like to set up a variable with a value that can be referenced in other fields of the Build

Definition editor.

What must be added to the build definition?

A. Labels

B. Variables

C. Attributes

D. Properties

Correct Answer: A
