QUESTION 1

Which task is responsible for updating the CA registration authorities in the Certificate document in the IBM Domino Directory?

- A. Monitoring process
- B. Registration process
- C. Administration process
- D. Certificate Authority process

Correct Answer: C

QUESTION 2

John is a developer and would like to sign an XPage to run on an IBM Domino server. What is the lowest level of access privilege he needs in order for the XPage to run?

- A. Run restricted LotusScript/Java agents.
- B. Sign agents to run on behalf of someone else.
- C. Sign XPages to run on behalf of the builder of the XPage.
- D. Sign agents or XPages to run on behalf of the invoker of the agent.

Correct Answer: D

QUESTION 3

John created a dynamic policy that will be applied to a group of top executives in the organization. How can John ensure that settings from other assigned dynamic policies do not conflict with this policy?

- A. Select the "Enforce in child policies" option for the pertinent fields.
- B. Deselect the "Inherit from parent policy" option for the pertinent fields.
- C. Increase the precedence for this dynamic policy to a value higher than any other.
- D. Delete the other assigned dynamic policies from each member's Person document.

Correct Answer: C

QUESTION 4

What policy assignment can be used to assign policy settings to individual users and groups in a Policy document?

- A. Explicit policies
- B. Server document
- C. Dynamic policies
- D. Organizational policies

Correct Answer: C

QUESTION 5

Carol made a number of modifications to a Mail policy settings document. She observed that the assigned users are not receiving any of the modified policy changes. What can Carol do to push the new Mail policy settings to the assigned users?

- A. Increase the precedence value for the policy.
- B. Notify each user that they need to restart their IBM Notes client.
- C. Issue the server console command: tell adminp process mailpolicy
- D. Notify users to press Ctrl + F5 to re-authenticate with their home/mail server.

Correct Answer: C

QUESTION 6

Paula, the IBM Domino administrator, registers new users in IBM Notes and Active Directory at the same time. All defaults are used, and the entire registration queue is processed. When these users are created, random passwords are generated and placed in which database?

- A. names.nsf
- B. adminp.nsf
- C. ntsync45.nsf
- D. adsync45.nsf

Correct Answer: C

QUESTION 7

James has been asked to configure a desktop policy in a new Domino environment. When the server is first installed, what should James expect to see before he starts configuring any of the policies?

- A. All settings are set to their default configuration.
- B. All settings are set to the default policy configuration.

- C. All settings have to be set using policies before server can be used.
- D. All settings are a combination of default configuration and default policy configuration.

Correct Answer: A

QUESTION 8

A failover occurs when a user tries to open a database that is unavailable. The Cluster Manager looks in the Cluster Database Directory for a replica of the database. To find the replica, the Cluster Manager looks for a database that has the same replica ID as the original database. What are two properties that are also checked for before using the replica? (Choose two.)

- A. Out of service
- B. File is Corrupt
- C. Pending delete
- D. File is locked for Archive
- E. Temporarily disable replication

Correct Answer: AC

QUESTION 9

Which is true regarding IBM Notes Traveler?

- A. Traveler must be administered from a web browser and can't be administered using the IBM Domino Administration client.
- B. Traveler can be administered from the Domino Administration client only for High Availability (HA) pool configurations.
- C. Traveler can be administered from the Domino Administration client in both standalone server configurations as well as in HA pool configurations.
- D. Traveler can be administered from a web browser. Web-based administration is available in both standalone server configurations as well as in HA pool configurations.

Correct Answer: D

QUESTION 10

A user has Author access in a database. What is he able to do?

- A. He is able to create documents.
- B. He is able to edit documents he created.
- C. He is able to delete documents he created.
- D. Create documents only if he also has the "Create documents" access level privilege.

Correct Answer: D

QUESTION 11

When do servers within the same IBM Notes Named Network require Connection documents to allow native Notes mail routing?

- A. Connection documents are never required.
- B. Connection documents are always required.
- C. Connections documents are only required if the servers are in different networks.
- D. Connections documents are only required if the servers utilize different network protocols.

Correct Answer: A

QUESTION 12

An administrator wants to allow some users to issue IBM Domino console commands, but does not want to give the users the authority to administer databases. How can this be achieved?

- A. Add the users to the "Administrator" field of the Server document.
- B. Add the users to the "System Administrators" field of the Server document.
- C. Add the users to the "View-only Administrators" field of the Server document.
- D. Add the users to the "Full Remote Console Administrators" field of the Server document.

Correct Answer: D

QUESTION 13

The managed mail replica is intended to be used as an abstraction of the user's server-based mail file. When the user performs mail commands, the Local replica is used. How would the user specifically open the server replica?

- A. Click on the Mail shortcut button.
- B. Right-Click the Mail icon and select "Open Server Replica".
- C. Double-click the desktop icon that reflects the server replica.

D. Selecting File > Open > Notes Application, then browsing to the desired server and replica.

Correct Answer: D

QUESTION 14

What feature can be implemented to allow users to access their customized settings and personal information automatically from any IBM Notes client in the domain?

- A. ID Vault
- B. Roaming
- C. Notes Shared Login
- D. IBM Domino SSO

Correct Answer: B

QUESTION 15
