### QUESTION 1

Julianna wants to add a calendar view to her application to display the completion dates of the documents in her application.

What must Julianna do, in addition to setting the view type to calendar, to accomplish this?

- A. Julianna should create a view that the selection formula is based off of the completion date of the document.
- B. Julianna can use any existing view in the database by just changing the view property "style" to be calendar.
- C. Julianna will need to make sure that the view only contains valid calendar events as that is all that can be displayed in a calendar view.
- D. Julianna should create a view that has the first column contain a valid date and time value based on the completion date of the document in ascending order.

Correct Answer: D

---

### QUESTION 2

Why would a developer create a role?

- A. to prevent users from creating folders and views on a server
- B. to select an access level for each person, group, and server
- C. to assign special access to database design elements and database functions
- D. to allow users to replicate or copy the database, or documents from the database

Correct Answer: C

---

### QUESTION 3

Mary has written an IBM Domino XPages application. What must Mary do to make XPages in her application available to users with only public access to the database?

- A. Add Mary's hierarchical name as Manager to the ACL.
- B. Set the XPage design property "Available to Public Access Users".
- C. Alter the ACL, add user Anonymous and set the user to Manager access.
- D. Alter the Server document field "Sign agents or XPages to run on behalf of the invoker" to add Mary's hierarchical name.

Correct Answer: B

---

#### QUESTION 4

Mary has written an agent which is not thread safe. In which two run contexts can Mary safely run this agent? (Choose two.)

- A. from an IBM Notes client
- B. scheduled to run on server
- C. called via a DIOP application
- D. called via OpenAgent from a browser
- E. from a Notes client where the agent uses RUNONSERVER

Correct Answer: AB

---

#### QUESTION 5

Mary is using the OSGI console to debug an application and has `ENABLE_BREAK=1` set in the client notes.ini. What does this parameter do?

- A. runs the application one line at a time
- B. forces a Java core if a JVM failure is encountered
- C. enables the break points that Mary wrote into the application
- D. bypasses any external calls in the application being debugged

Correct Answer: B

---

#### QUESTION 6

Jack is creating an application that will have several views with similar data in them and wants to use shared columns so that all the views have a similar look. How does Jack create a shared column to be used by multiple views?

- A. Click on the Shared Column button in the Advanced tab of the View properties.
- B. Drag and drop the column from one view to another and this will make it a shared column.
- C. There is no such thing as shared columns so Jack will need to create the column in each view.

D. Click on the Shared Column button in the Columns section under the Shared Elements section of the Application Eclipse view.

Correct Answer: D

---

#### QUESTION 7

Which statement is correct when using a theme in an XPage application?

- A. Themes are restricted to using CSS styles.
- B. Themes can be used in any CSS style sheet.
- C. Themes allow the designer to set and control any XML property.
- D. Themes are a standard XML design element and can be used in any HTML application including XPages.

Correct Answer: C

---

#### QUESTION 8

Caroline is programmatically using the UniversalID property of a document. Which option will return the same value as the UniversalID property?

- A. @NoteID
- B. @ReplicaID
- C. @Command
- D. @DocumentUniqueID

Correct Answer: D

---

#### QUESTION 9

Alex is using an IBM LotusScript Web service consumer in her agent. When trying to access an array of items returned by the Web service provider, the agent fails with the error: "Attempt to access uninitialized dynamic array". Why might this occur?

- A. The result returned by the Web service provider did not contain any items.
- B. The GetValueAsString method was not applied to the result returned by the Web service provider.
- C. The variable assigned to the result returned by the Web Service provider was not appropriate for a Complex Type.

D. The variable assigned to the result returned by the Web service provider was not a properly dimensionalized array.

Correct Answer: A

---

#### QUESTION 10

Charles wants his agent to send an email when a user changes the status of a certain document in a database. What trigger will he use for the agent in order to notify him immediately when the status is changed?

- A. When new mail arrives
- B. When documents have been modified only
- C. On schedule hourly, daily, weekly, or monthly
- D. When documents have been created or modified

Correct Answer: D

---

#### QUESTION 11

Grayson created an application that is deployed on servers and with local replicas on individual user workstations. What feature of IBM Notes can limit the data deployed to local replicas?

- A. Managed Replicas
- B. Database Encryption
- C. Master Database Templates
- D. Selective Replication Formula

Correct Answer: D

---

#### QUESTION 12

What benefit does using a working set in the IBM Domino Designer client allow?

- A. In order to work on an application in the Domino Designer client, it must be in a working set.
- B. It allows source control functionality to automatically track any changes to the databases in the working set.
- C. It will prevent other designers from modifying applications while a developer is working with them in a working set.
- D. It allows a designer to group all databases that are part of a project together so only they are showing in the

Application Navigator.

Correct Answer: D

---

### QUESTION 13

An IBM Domino application performs certain operations, such as DDE-related functions, that are not available in all platform versions of IBM Notes and Domino. What function can be used to determine the underlying operating system?

- A. @Version
- B. @ClientType
- C. @Platform([Specific])
- D. @Platform([ClientType])

Correct Answer: C

---

### QUESTION 14

The LCConnection.fetch method performs what action?

- A. executes a call against a relational database
- B. creates a connection from IBM Domino to a relational database
- C. returns relational database table properties for the connected database
- D. returns records to Domino from an executed call against a relational database

Correct Answer: D

---

### QUESTION 15

By default, in which format is data entered into a Rich Text field stored within the document?

- A. DXL
- B. HTML
- C. MIME
- D. CD record

Correct Answer: D
