QUESTION 1

What does the NTSUsage log show?

- A. the number of users are logged onto the server
- B. the number of devices are logged onto the server
- C. documents that are transferred between the devices and IBM Notes Traveler
- D. IBM Notes Traveler communication between Notes Traveler and the mail server

Correct Answer: D

QUESTION 2

Which deployment will allow a system administrator to deploy a high availability solution with automatic failover using IBM Notes Traveler 9.0 and Microsoft SQL Server?

- A. Notes Traveler does not support automatic failover for the database server.
- B. one Notes Traveler Server, one IP sprayer, and two SQL Servers running log mirroring
- C. two IP sprayers, two Notes Traveler servers, and two SQL Servers running Q replication
- D. one IP sprayer, two Notes Traveler servers, two SQL Servers, and one SQL Server acting as a witness server

Correct Answer: D

QUESTION 3

Which is required to set up SSL on the IBM Notes Traveler server?

- A. IBM WebSphere keyring
- B. *.stash and *.key created from Certify Authority database
- C. keyring containing a Server certificate from an Internet certificate authority
- D. Server certificate from an Internet certificate authority imported into an IBM Domino Directory

Correct Answer: C

QUESTION 4

Adrian is planning to deploy IBM Notes Traveler 9.0 in order to provide mobile access to his Android, iOS, BlackBerry 10 and Microsoft Windows Mobile users.

He asked his network team to open which two ports in order to allow the mobile devices to connect to the Traveler

servers? (Choose two.)

- A. 80
- B. 443
- C. 1352
- D. 1533
- E. 8642

Correct Answer: AB

QUESTION 5

Before upgrading to a more current version of IBM Notes Traveler, what must be done first?

- A. Upgrade the mail template.
- B. Upgrade the mobile clients.
- C. Upgrade the IBM Domino mail servers.
- D. Upgrade the Domino server that hosts the Notes Traveler server.

Correct Answer: D

QUESTION 6

How does the IBM Notes Traveler server obtain the ability to communicate with the enterprise database?

- A. The administrator must install the IBM WebSphere Administration client.
- B. Notes Traveler is pre-installed with all JDBC drivers for the supported databases.
- C. The database drivers are configured when the travelerutil command is executed.
- D. The administrator must copy the required JDBC jar files from the enterprise database or obtain these from the database vendor.

Correct Answer: D

QUESTION 7

Mike's company has deployed three IBM Notes Traveler servers in a virtual high availability environment. Server A has 2500 devices registered and Servers B and C have 2000 devices registered. Mike, the administrator, took Server A offline for Sunday's scheduled maintenance session. He tested failover to the other servers in the pool and it was successful. The following Monday morning, the Help Desk received calls reporting that users were not receiving mail on

their devices. Mike was unsure as to why the users gradually stopped receiving mail on the remaining servers. Mike brought Server A back online and the problem was resolved.

Why did the users fail to continue to receive mail?

- A. Mike had not set the external server URL on Servers B and C.
- B. Mike did not set the IP sprayer to spray in a round-robin fashion.
- C. Mike failed over too many users and devices to the other servers in the pool.
- D. Mike did not properly add Servers B and C to the pool by issuing the travelerUtil command.

Correct Answer: C

QUESTION 8

What is the recommended minimum amount of physical memory that should be installed with any IBM Notes Traveler system using a Microsoft Windows 64-bit operating system?

- A. 4 GB
- B. 2 GB
- C. 8 GB
- D. 12 GB

Correct Answer: C

QUESTION 9

Which mail limitations apply to a BlackBerry 10 device?

- A. The Trash folder cannot be synchronized.
- B. The mail folder list does not scroll horizontally.
- C. It supports only mail addresses with ASCII characters.
- D. Draft mail messages are not synchronized with the server.

Correct Answer: A
