QUESTION 1

Muriel has created a view that shows the current year\\'s reported sales in the Sales Tracking application. She would like to give her end users the ability to sort on the customer, region, and sales manager columns.

How would she accomplish this?

A. Set the `Allow custom sorting" option for the view.

B. Set each column\\'s Sort option to Descending.

C. Set the `Click on column header to sort" value to Custom for all three columns.

D. Set the `Click om column header to sort" value to Both for all three columns.

Correct Answer: D

QUESTION 2

Joe wants to store JavaScript code in his forms so that the code can be called from other events on the form.

Where should he put the code?

A. In the form\\'s onLoad event.

B. In the form\\'s HTML Body Attributes event.

C. In the form\\'s JS Global Functions event.

D. In the form\\'s JS Header event.

Correct Answer: D

QUESTION 3

Marcello wants to create a custom startup page for his customer database, using different buttons and values from profile and normal documents.

How can he achieve this?

A. Create an outline with calculated entries, and display this directly through a frameset.

B. Create a page with calculated text and actions, and display this using a frameset. Create a frameset, and display that page with dynamic text.

C. Create a view with custom actions that calculate what actions the user might want to take.

D. Create a form and use action buttons, only calculated for display fields and computed text to display all available options to this specific user. Set the database properties to start with a doclink in the about database document to any document created with this form.

Correct Answer: D

QUESTION 4

Susan has deployed a template, "sales.ntf", for the Sales Tracking application on the test server. Fred wants to create a new Sales Tracking application using Susan\\'s template, and Fred wants his new application to inherit future design changes from the template.

How can Fred do this?

A. Create a replica of the "Sales.ntf" template, but make its file name end in ".nsf" instead.

B. Create a blank application, right-click the new application icon, and choose the "Cope From Template" option. Select the "sales.ntf" file as the template, then design elements will be copied to the new application.

C. Select File>Application>New, choose the test server as the template server, and choose the "sales.ntf" template.

D. Select File>Application>New, choose the test server as the template server, and give the application "sales.ntf" as a file name.

Correct Answer: C

QUESTION 5

Mike is upgrading a Web application to use a different CSS stylesheet for different types of browsers.

Which of the following @functions should he used to determine which Web browser the user is accessing his application with?

A. @BrowserType

B. @ClientInfo

C. @BrowserInfo

D. @Browser

Correct Answer: C

QUESTION 6

Malik needs to find all the design elements that reference a particular field in his database. How could he accomplish this?

A. Edit - Find Next

B. Edit - Find/Replace

C. File - Application - Analyze Design

D. File - Application - Design Synopsis

Correct Answer: D

QUESTION 7

In the past, Lloyd has copied an existing application if he needed to create a new application. This time, however, Lloyd wants to create a new application on his own hard drive, and he does not want the application to include any design elements from existing applications.

How can he do this?

A. From the menu bar, select File > Application > New. Leave the Server option set to "Local", and ensure that the Template option is set to "Blank".

B. From the menu bar, select File > Application > New. Leave the Server option set to "Local", and specify "_blank.nsf" for the new application\\'s filename.

C. From the menu bar, select File > Application > New. Leave the Server option set to "Local", and specify "_blank.nsf" for the new application\\'s filename. Ensure that the Template option is set to "-Default-".

D. From the menu bar, select File > Application > New. Specify "_blank.nsf" for the new application\\'s filename.

Correct Answer: A

QUESTION 8

Anika has been told that users cannot use the embedded view on a form because it is too wide. On Anika\\'s screen setting for 1920 resolution, the form uses only 25 percent of her screen.

What can Anika do to allow users to use the full width of their screen, regardless of their resolution, while using an embedded view?

A. Anika can set the Form properties to use only 85 percent of the screen width.

B. Anika can set the Display properties of the embedded view to use only 85 percent of the screen width.

C. Anika can set the text properties of the form to 85 percent of the screen width.

D. Anika can set the Display options for the embedded view to "fit to window".

Correct Answer: B

QUESTION 9

Clifford has a Readers field in his Expense Report form. Who will be able to see the document once he saves it in the application?

B. Anyone listed as a Reader or above in the Access Control List who is also listed in the Readers field.

C. Anyone listed as a Reader or above in the Access Control List.

D. Only those people listed in the Execution List or the Access Control List.

Correct Answer: B

QUESTION 10

Roberto has been asked to modify the Membership view in the Video Rental application. A green checkmark should appear in the Approved view column for each document where membership has been approved. He set the view column property to "Display values as icons", and now he needs to write a column formula.

What is the column formula he needs to use?

A. @if(Approved = "Yes"; @Icon(82); @Icon(0))

B. @if(Approved = "Yes"; @OpenImageResource("checkmark.gif");\\'\\'")

C. @If(Approved = "Yes"; 82; 0)

D. @If(Approved = "Yes"; @Column(82); @Column(0))

Correct Answer: C

QUESTION 11

Mac is planning a Change Control application that will be used by thousands of staff located in 10 different countries.

What is one thing Mac can do to help optimize the performance of the application for his users?

A. Use File > Replication > New Replica to create a replica of the application on a server in each country, and have users access the application from a local server.

B. On the Advanced tab of Database properties, enable "Don\\'t support specialized response hierarchy" and disable "Allow simple search"

C. Use File > Application > new Cope to create a copy of the application on a server in each country, and have users access the application from a local server.

D. On the Advanced tab of Database properties, enable `Support specialized response hierarchy" and enable "Allow simple search"

Correct Answer: A

QUESTION 12

Mahesh must ensure that only users with the DbAdmin role can edit the Price field on the Product form. The other fields on the form are editable by all users.

How can Mahesh restrict who can edit the Price field?

A. From the Security tab of the Field Properties, select the [DbAdmin] role in the Edit Enabled option.

B. Place the Price field in a computed subform.

C. Add an Input Enabled formula to the Price field. Use the formula: @IsMember["DbAdmin]"; @UserRoles)

D. Add a computed Authors field to the Product form. For the field value, specify @If(@ThisName="Price"; "[DbAdmin]"; "")

Correct Answer: C

QUESTION 13

Joe wants to display a company logo in the background of a view in his sales application. How can he do this?

A. Use URL as the background graphic for the view, where the URL points to the logo.

B. He can\\'t do this. Views cannot have background graphics.

C. Use an Image Resource as the background graphic for the view.

D. Display the view in a frameset, and set the background of the view\\'s frame to an Image resource or URL depicting the logo.

Correct Answer: C

QUESTION 14

Tresa\\'s users sometimes forward SalesOrder documents to coworkers if they have a question about the order. When the recipient of the forwarded document opens the mail message, they see an error message before the document opens. Tresa has determined that a hot-spot button on the SalesOrder form references code from the SalesOrder form.

How can Tresa allow her users to forward documents without this button being forwarded?

A. Open the SalesOrder form. From the Advanced tab of the Form properties, select "Send as RT Item" from the "On Send" options.

B. Open the SalesOrder form. From the Security tab of the Form properties, select "Disable printing/ forwarding/copying to clipboard".

C. Open the SalesOrder form and click on the hot-spot button. Add a hide formuls of "@IsDocBeingForwarded".

D. Open the SalesOrder form and click on the hot-spot button. Select "Copied to the clipboard" from the Hide tab of the Button properties.

Correct Answer: D

QUESTION 15

Nathan created a secret key named Salary, and he has enabled encryption for three fields on the SalaryHistory form. He wants to ensure that all three of these fields are always encrypted whenever a SalaryHistory document is saved.

What should Nathan do next?

A. From the Field properties for each of the three fields, select Salary under "Encryption key(s)". Select the name of each of the individuals needing access to the field and save the form.

B. From the basics tab of the database properties, click encryption Settings. Select "Automatic encryption". Mail the secret key to the individuals who need access to the encrypted fields.

C. From the Security tab of the Form properties, select salary under "default encryption keys". Save the form, and mail the secret key to the individuals who need access to the encrypted fields.

D. From the Security tab of the Form properties, select "Default encryption". Mail the secret key to a Notes administrator and request the key to be merged into the certificate on the person document of each user needing access to the encrypted fields.

Correct Answer: C
