QUESTION 1

When planning an ISIM server upgrade, which of the following statements describes a process you need to put into place?

A. Disable all recertification processes particularly ones that disable accounts.

B. Bring the OS and all supporting middleware to the required support levels.

C. Upgrade the adapter agent on each supported target system.

D. Quiesce all active workflows and outstanding requests.

Correct Answer: D

QUESTION 2

Which statement lists all the IBM Security Identity Manager (ISIM) components that can be tuned to provide better performance?

A. HTTP server. Websphere Application server, Directory server, Database server, and adapters.

B. HTTS server Websphere Application server, and Directory server.

C. HTTP server and Websphere Application server.

D. Directory server and Database server.

Correct Answer: D

QUESTION 3

Which TWO items explain the erPersonItemobjectclass?

A. An auxiliary objectclass that contains attributes that used to map custom attributes to reserved ISIM attributes like mail and supervisory data.

B. An auxiliary objectclass that is only on person objects that are in Inactive state, and it allows an attribute to contain the inactivation date.

C. An auxiliary objectclass that is on all person objects belonging to the base Person entity and any custom person entity.

D. A derived objectclass from the base iNetOrgPersonobjectclass that is on all person objects in ISIM.

E. An auxiliary objectclass that is only on person objects belonging to the base Person entity.

Correct Answer: AD

QUESTION 4

When upgrading IBM Security Identity Manager (ISIM) adapters that run on the Windows platform which statement below is accurate?

A. Multiple ISIM adapters running on a Windows server can be upgraded at different times because there is no dependency between the adapters.

B. Multiple ISIM adapters running on a Windows server must all be upgraded simultaneously because of the sharing of DLLs.

C. Multiple ISIM adapters running on a Windows server all have to be uninstalled prior to installing the ISIM version 6 versions.

D. Multiple ISIM adapters running on a Windows server are no longer supported with ISIM version 6.

Correct Answer: C

QUESTION 5

One of the customer requirements for the I SIM v6.0 implementation you are working on is to restrict self-service access to the user forms section. Where should this be configured?

A. Cascading style sheet (CSS)

B. Access Control Items (ACI)

C. Properties files

D. Image files

Correct Answer: D

QUESTION 6

Which concerns should be addressed by a systems architecture document?

A. Security policy, account standardization, overall business requirements

B. Disaster recovery, performance, high availability, deployment topology

C. Capacity requirements, uptime requirements, simplicity, and price

D. Service priorities, identity feeds, approval cycles, and auditing

Correct Answer: A

QUESTION 7

What is the recommended Application Server JVM heapsizes for a 64 bit JVM?

A. 4096 MB/8192 MB

B. 1024 MB/4096 MB

C. 512 MB/1024 MB

D. 512 MB/4096 MB

Correct Answer: D

QUESTION 8

Which two of the following are relevant to password retrieval by a user using a URL?

A. enrole.generic.randomizer should be set to true for generation of random URL for each password retrieval request.

B. enrole.password.retrievalURL should be set to the value of the URL where the user can retrieve the password.

C. The shared secret attribute of the Person object should be populated by the user beforehand.

D. enrole.workflow.notifyPassword should be set to false.

E. enrole.password.retrieval should be set to true.

Correct Answer: C

QUESTION 10

A person modify transaction is created containing requests for two roles which are identified by a Separation of Duty policy as conflicting.

Which of the following is a TRUE statement concerning how the person modify transaction may be processed?

A. An administrator or policy owner may change either of the requested roles so that they do not conflict.

B. The person modify transaction may be completed without approving or rejecting the conflicting roles.

C. An administrator or policy owner may reject either one of the two conflicting roles.

D. An administrator or policy owner may reject or approve the role violation.

Correct Answer: B

QUESTION 11

Which of the following is a best practice high availability setup of LDAP for use with IBM Security Identity Manager?

A. Two read/write master LDAPs with load balancer between them to distribute requests and I SIM configured to point at the load balancer

B. Two read/write master LDAPs configured in fail over mode with load balancer and ISIM configured to point at the load balancer

C. One master and one replica LDAP with ISIM configure to the master LDAP

D. Separate read/write master LDAP for each node of an ISIM cluster

Correct Answer: D

QUESTION 12

Given an IBM Security Identity Manager test environment which is a valid option for testing thousands of TDI/RMI adapters?

A. Point IBM Security Identity Manager test environment services to production environment end points to be managed

B. Use the threaded_damlserver.pl script from the IBM Security Identity Manager tuning guide

C. Install thousands of separate TDI dispatchers

D. Use the virtual service adapter setup

Correct Answer: C

QUESTION 13

When gathering requirements for email notifications, which mail protocol is used to send email notifications in the IBM Security Identity Manager environment?

A. SMTP protocol

B. IMAP protocol

C. UDP protocol

D. TCP protocol

Correct Answer: A

QUESTION 14

For large scale initial identity feed, what approach can help improve performance?

A. Increase the size of the memory in the WebSphere Java Virtual Machine until the data feed meets performance requirements.

B. Disable provisioning policies before importing identities into the system and then enable applicable provisioning policies.

C. Define default values for account attributes from the administrative console to overwrite data source attributes.

D. Modify the person form and reduce the number of attributes.

Correct Answer: B

QUESTION 15

What is the correct method for running the ISIM v6.0 installer in a windows environment?

A. Visit the IBM Product Download site and install directly from this location

B. Insert the product DVD. Select start-> run-> type "ISIM6install.exe

C. Enter the command "instplinux.bin" from the installation file directory

D. Download the DVD image. Enter the command "instwin.exe"

Correct Answer: C
