QUESTION 1

During deployment, which of the following should a technician install to be used in the future to shut down a virtual server?

- A. Third-party backup software
- B. Guest management tools
- C. VLAN
- D. Server snapshot

Correct Answer: B

QUESTION 2

An administrator deployed a VM that is hosting an internal website. Users report they are unable to access the new website. Which of the following should the network administrator do to test whether web traffic is being sent and received?

- A. Browse to any website
- B. Ping the VM's IP address
- C. Ping the VM's loopback address
- D. Telnet to port 80

Correct Answer: D

QUESTION 3

Joe, an administrator, has just added a new VM to a production network. Joe's workstation is connecting into the environment from a VPN. Other VMs on the same subnet are open to connections, however the new VM is inaccessible by RDP, SSH, or ping from Joe's workstation. Joe can ping other systems on the production network while connected into the new VM by console. Which of the following is the MOST likely source of the problem?

- A. VPN gateway
- B. Firewall ACL
- C. VLAN tag
- D. SSL certificate

Correct Answer: B

QUESTION 4

A JBOD is being monitored and an administrator notices that a high number of writes occur in short timeframes in the last 24 hours. Which of the following BEST describes this issue?

- A. I/O bursting
- B. I/O throttling
- C. I/O threshold
- D. I/O saturation

Correct Answer: A

QUESTION 5

Which of the following is true about a Type II hypervisor?

- A. It requires a primary hypervisor to function properly.
- B. It implements stronger security controls than a Type I supervisor at the same patch level.
- C. It provides slower performance than a Type I hypervisor installed on the same hardware.
- D. It provides direct hardware access through the use of specialized drivers.

Correct Answer: C

QUESTION 6

Which of the following is often used by a certificate to keep the contents of the page confidential?

- A. 3DES
- B. AES
- C. RSA
- D. RC4

Correct Answer: C

QUESTION 7

A department requires segregated access due to project requirements. Anne, the engineer, has designated storage and a separate resource pool for VMs through a new VLAN. She wants to ensure a more secure environment for this department within the company cloud. Which of the following should Anne implement?

- A. LUN masking
- B. Multipathing

- C. Virtual switch
- D. Virtual desktop

Correct Answer: C

QUESTION 8

An administrator notices one of the VMs hosting an application server is consuming more CPU resources over time. As a result, the host is running near 90% CPU capacity at peak time. Which of the following is the BEST method to alleviate this issue while minimizing downtime?

- A. Online storage migration
- B. Online migration to a new host
- C. Upgrade the host CPU to increase resources
- D. Add a new virtual CPU

Correct Answer: B

QUESTION 9

Network statistics show that the 1Gbps switch port used for storage traffic is fully saturated. Which of the following switch technologies can be used to provide twice the bandwidth?

- A. NAT
- B. Multipathing
- C. Link aggregation
- D. VLAN

Correct Answer: C

QUESTION 10

Which of the following storage technologies is file-based?

- A. WAN
- B. DAS
- C. SAN
- D. NAS

Correct Answer: D

QUESTION 11

A company has decided to reduce their datacenter size. An administrator for the company has been tasked to virtualize many of the company's servers. Which of the following should the administrator perform to accomplish this goal?

- A. P2V
- B. P2P
- C. V2P
- D. V2V

Correct Answer: A

QUESTION 12

Which of the following refers to the maximum amount of data that can be lost due to a system failure?

- A. MTBF
- B. RTO
- C. MTTR
- D. RPO

Correct Answer: D

QUESTION 13

After a sudden spike in traffic Anne, an administrator, notices many internal IP addresses are sending traffic to an external web server belonging to another company. Which of the following attacks may she be witnessing from her network?

- A. Phishing
- B. Man-in-the-middle
- C. Vishing
- D. Denial of service

Correct Answer: D

QUESTION 14

Which of the following should be installed on VMs to report and take action against potential threats?

- A. NIDS
- B. HIPS
- C. NIPS
- D. HIDS

Correct Answer: B

QUESTION 15

Which of the following protocols allows fibre channel to be transmitted over the network?

- A. HBA
- B. FCoE
- C. NFS
- D. iSCSI

Correct Answer: B
