QUESTION 1

Data is loaded via a process chain to an Open Hub destination table. When this table data is then loaded into a non-SAP operational system, it is found that records are duplicated over time. What action should you take to resolve this? Select the correct answer.

- A. Configure a technical key for the destination table.
- B. Configure the destination table to be recreated on load.
- C. Configure a semantic key for the destination table.
- D. Switch the destination to a flat file in XML format.
- E. Configure a semantic key for the destination table.

Correct Answer: C

QUESTION 2

What are the differences between the Reporting and Operational Data Store (ODS) layers in LSA if both are reportable? (2)

- A. They can use different InfoProvider types
- B. The ODS layer is typically used for archiving
- C. They differ in data refresh requirements
- D. They differ in the granularity of data
- E. They can use different InfoProvider types

Correct Answer: D

QUESTION 3

What are the advantages of using a line-item dimension when modeling an InfoCube? (2)

- A. The primary key of the InfoCube fact table is shorter
- B. The number of joins that must be executed during query runtime is reduced
- C. Data is loaded into the InfoCube without generating DIM Ids for this dimension
- D. Aggregates on this InfoCube do NOT need to be built
- E. The number of joins that must be executed during query runtime is reduced

Correct Answer: C

QUESTION 4

You want to update the 3.x version of an SAP BW DataSource to a 7.x version with the capability to restore the original version. What should you do during the migration to achieve this? Please choose the correct answer.

- A. Replace the 3.x SAP BW InfoSource with a 7.x version SAP BW InfoSource.
- B. Migrate the 3.x DataSource version with export.
- C. Delete all entries from the Persistent Staging Area (PSA)
- D. Create a transformation to replace the transfer rules.

Correct Answer: B

QUESTION 5

Which of the following does the data propagation layer of your SAP BW system offer? There are 2 correct answers.

- A. Complete data history.
- B. Fast load of mass data.
- C. A single version of the truth.
- D. Ability to extract once and deploy many times.
- E. A single version of the truth.

Correct Answer: D

QUESTION 6

Configure a technical key for the destination table A Flat interface DataSource is used to extract file data into the PS

- A. The DTP, however, is having trouble loading the data into an InfoCube. What could be the possible solution? Select the correct answer.
- B. The BW DTP is set to Full extraction.
- C. The Transformation does not have rules for all destination fields.
- D. The DataSource has a delta process of FILO.
- E. The BW DTP is set to Full extraction.

Correct Answer: C

QUESTION 7

Which of the following initial tasks should you perform when designing an SAP BW data model? (2)

- A. Analyze relationships between the characteristics and their attributes
- B. Evaluate the volume of data to be loaded
- C. Evaluation of the number and types of users
- D. Evaluate the format of data to be loaded

Correct Answer: BC

QUESTION 8

How are non-cumulative Key Figures calculated? (2)

- A. They can utilize a virtual Key Figure to combine inflows and outflows
- B. They are designed in Business Explorer queries
- C. They can utilize two virtual Key Figures to represent inflows and outflows
- D. Their calculation is accomplished in Transformations
- E. They can utilize a virtual Key Figure to combine inflows and outflows

Correct Answer: C

QUESTION 9

The Marines order 8 service members for deployment on Monday. This data is loaded to a Standard DSO. Then the office requests 2 less service members, for a total of 6. This new after image data is also loaded to the DSO. What records will be in the Change Log? Select the correct answer.

- A. 8, -8, 6
- B. 8, -8, 2
- C. 8, 6
- D. 8, 2
- E. 8, 6, 2

Correct Answer: A

QUESTION 10

You are executing a process chain to load transaction data from an SAP source system via a standard DSO into an InfoCube but NO DATA arrives in the InfoCube. What are possible reasons for this? (2)

- A. The data does NOT meet the selection criteria of the DTP
- B. The data comprises an error and the error handling setting is set to "Cancel Request, Do Not Track Records, No Update"
- C. The Data Flow object has NOT been activated
- D. The Integrity check is NOT switched on in the transformations

Correct Answer: AB

QUESTION 11

What can you do to have two or more hierarchies with the same technical name? (2)

- A. Configure the hierarch as version-dependent
- B. Configure the hierarchy to have a time-dependent structure
- C. Configure the hierarchy with link nodes
- D. Configure the hierarchy as time-dependent
- E. Configure the hierarch as version-dependent

Correct Answer: D

QUESTION 12

Which of the following are true about generic DataSources? There are 3 correct answers.

- A. They can NOT be enhanced with additional fields after creation.
- B. They are can be defined with delta capability.
- C. They are can be used with real-time data extraction.
- D. They are replicated by process chain.
- E. They can be defined with filter criteria.

Correct Answer: BCE

QUESTION 13

Which of the following does the data propagation layers of your SAP BW system offer? There are 2 correct answers.

- A. Ability to extract once and deploy many times
- B. Fast load of mass data

- C. A single version of the truth
- D. Homogenized data

Correct Answer: AC

QUESTION 14

There is a need to extract millions of records from an Oracle database into BW for analysis. Which of the following represents the best ETL strategy? Select the correct answer.

- A. Modify a BI Content DataSource to include the Teradata fields in the extraction.
- B. Use the File interface to extract manageable files of no more than 20,000 records each.
- C. Use a WebService DataSource to stream the records into the PSA of the DataSource.
- D. Use DB Connect for the ETL process.
- E. Use UD Connect for the ETL process.

Correct Answer: D

QUESTION 15

What are performance advantages when using an InfoCube instead of a DataStore object? There are 2 correct answers.

- A. Reporting access to granular data using standard dimensions is faster.
- B. The use of Surrogate IDs (SIDs) to replace master data values in tables.
- C. Dimension tables can be read independently.
- D. Navigational attributes can be used.
- E. The use of Surrogate IDs (SIDs) to replace master data values in tables.

Correct Answer: C
