QUESTION 1

Which process involves determining the optimal resources required to meet seasonal spikes in resource demand?

- A. Configuration management
- B. Change management
- C. Capacity management
- D. Incident management

Correct Answer: C

QUESTION 2

DRAG DROP

Match each information security concept with its description.

Select and Place:

| Concept | Description |
|-----------------|--|
| Availability | Ensures the required secrecy of information |
| Integrity | Ensures that unauthorized changes to information are not allowed |
| Accountability | Ensures that authorized users have reliable and timely access to cloud resources |
| Confidentiality | Ensures users are answerable for the actions executed on the system |

Correct Answer:

| Concept | Description |
|---------|-----------------|
| | Confidentiality |
| | Integrity |
| | Availability |
| | Accountability |

QUESTION 3

Which cloud service model is represented in the exhibit?

- A. Software as a Service
- B. Infrastructure as a Service

- C. Platform as a Service
- D. Database as a Service

Correct Answer: B

QUESTION 4

Which software-defined storage controller function gathers data about the components and brings them under its control and management?

- A. Storage provisioning
- B. Storage discovery
- C. Resource abstraction and pooling
- D. Storage component management

Correct Answer: C

QUESTION 5

DRAG DROP

Match each virtual network type with its characteristics.

Select and Place:

| <u>Network Type</u> | <u>Characteristics</u> |
|----------------------|--|
| Virtual LAN (VLAN) | Divides a LAN into smaller logical segments |
| Stretched VLAN | Segregates nodes within a VLAN into secondary VLANs |
| Private VLAN (PVLAN) | Enables nodes in two different sites to communicate over a WAN |
| Virtual SAN (VSAN) | Enables communication between a group of nodes with a common set of requirements over a FC network |

Correct Answer:

| <u>Network Type</u> | <u>Characteristics</u> |
|---------------------|------------------------|
| | Virtual LAN (VLAN) |
| | Private VLAN (PVLAN) |
| | Stretched VLAN |
| | Virtual SAN (VSAN) |

QUESTION 6

DRAG DROP

Match each key functions of service operation management with its objective.

Select and Place:

| <u>Function</u> | <u>Objective</u> |
|--|--|
| Problem management | Maintain information on components and their relationships that needs to be managed to deliver services |
| Incident management | Restore cloud services to normal operational state as quickly as possible when unplanned events cause an interruption or downgrade to service quality |
| Information security management | Prevent incidents that share common symptoms and root causes from reoccurring, and minimize adverse impact of incidents that cannot be prevented |
| Service asset and configuration management | Prevent occurrence of incidents or activities adversely affecting the confidentiality, integrity, and availability of information in cloud services and service management processes |

Correct Answer:

| <u>Function</u> | <u>Objective</u> |
|-----------------|--|
| | Service asset and configuration management |
| | Incident management |
| | Problem management |
| | Information security management |

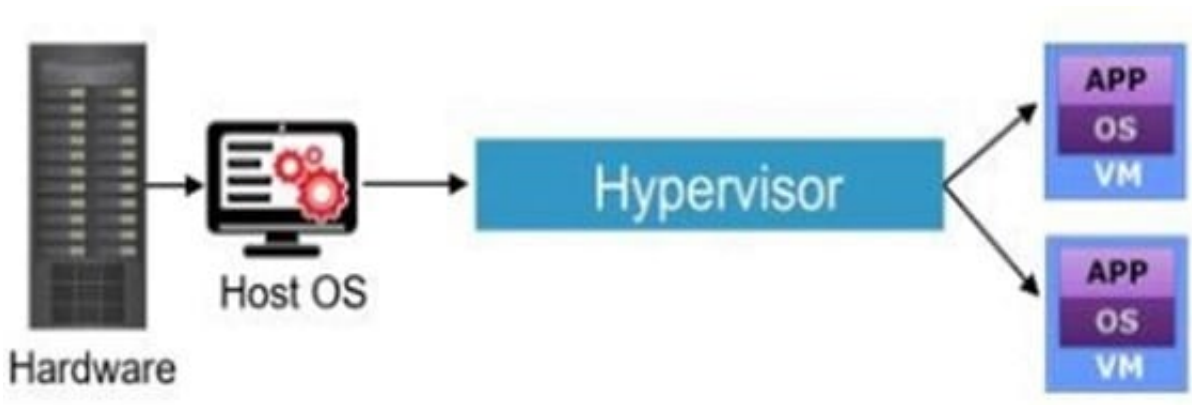

QUESTION 7

A compute system is configured to access files from a network-attached storage system. What is a characteristic of the file system?

- A. Managed by the object-based storage device node
- B. Managed by the compute system
- C. Managed by the storage system
- D. Part of the storage area network

Correct Answer: A

QUESTION 8

Refer to the exhibit.

Which type of hypervisor is installed in this environment?

- A. Hosted Hypervisor-Type 1
- B. Bare Metal Hypervisor-Type 1
- C. Hosted Hypervisor-Type 2
- D. Bare Metal Hypervisor-Type 2

Correct Answer: C

QUESTION 9

Which phase of the cloud service lifecycle involves making business use case decisions for the cloud service offering portfolio?

- A. Service Termination
- B. Service Planning
- C. Service Creation
- D. Service Operation

Correct Answer: C

QUESTION 10

Which method compares observed events with normal activities to identify abnormal patterns in a system?

- A. Encryption-based authentication
- B. Anomaly-based intrusion detection
- C. Multi-factor authentication
- D. Signature-based intrusion detection

Correct Answer: B

QUESTION 11

Which task describes adherence to compliance?

- A. Ensure security policies are being enforced
- B. Define access rights to users
- C. Assess the cloud provider's capability to provide logs

D. Assess assets with realistic valuations

Correct Answer: A

QUESTION 12

What is a function of service portfolio management?

- A. Ensure compliance to industry standards
- B. Enable capacity and availability management
- C. Perform market research and collect information about competitors
- D. Collect information about cloud services and their constituent elements

Correct Answer: B

QUESTION 13

What is a characteristic of storage resource pools?

- A. Resource pools should always be created by different types of storage devices
- B. Resources are reserved by the application after being released by the consumer
- C. Resources are dynamically released to the pool when the consumer exceeds their quota
- D. Resources are dynamically allocated based on consumer demand

Correct Answer: D

QUESTION 14

What is a function of business relationship management?

- A. Determine if the capacity of IT services can deliver the agreed upon service levels
- B. Identify requirements and ensure that the appropriate services are provided
- C. Identify accurate information for all operational services
- D. Determine what the sufficient capacity is to meet business demand

Correct Answer: C

QUESTION 15

Which method optimizes network performance by distributing network traffic across the shared bandwidth of all the

ISLs?

- A. Link aggregation
- B. Network zoning
- C. Network segmentation
- D. Link failover

Correct Answer: A
