A. Implicit invocation

B. code contained in a trigger

C. Class, trigger

D. Queues, time triggers

Correct Answer: B

QUESTION 4

Objects of this Apex class allow developers to create list controllers similar to, or as extensions of, the prebuilt Visualforce list controllers provided by Salesforce.

A. StandardSetController Class

B. StandardController Class

C. Controller Class

D. VisualforceSetController Class

E. VisualforceControllerClass

F. None of the above

Correct Answer: A

QUESTION 5

What is the list of steps to match regular expressions using the Pattern and Matcher classes?

A. A template from which objects are created

B. 1.Instantiate a pattern object from the expression you wish to match.

2.

 Instantiate a matcher object from the pattern that contains the string you want to check.

3.

 Use the matcher object to detect if the matcher matches the pattern.

C. HTTPRequest, HTTPResponse, HTTP

D. Primitive, sObject, Collections, Null

Correct Answer: B

QUESTION 6

In a recruiting application, a custom object called Position requires approval. When a position record is submitted for approval, the requirements below must be met:

The hiring manager must approve the record

The approval must be forwarded to all members of the executive team, but only one executive needs to approve the record

The VP of human resources must approve the record

How would a developer meet this requirement?

A. Create multiple approval processes, one for each executive team member, and utilize parallel submission.

B. Create an approval process which utilizes parallel approvers, but does not require unanimous approval.

C. Create parallel workflow rules, requiring at least one executive team member to complete their assigned task.

D. Create an approval process with a step for each executive team member, allowing approval steps to be skipped.

Correct Answer: B

QUESTION 7

The System.runAs() functionality can be used to test and verify proper data sharing and data access. However, System.runAs() does NOT validate CRUD or Field Level Security permissions.

A. True

B. False

Correct Answer: B

QUESTION 8

Identify the differences between Apex and the other programming languages. (Select all that apply.)

Apex runs in a multitenant environment.

Apex performs uncontrolled program invocations.

Apex is case-insensitive.

Apex can be processed on any platform. (No Answer)

A.

Encapsulation principles

B.

Salesforce ui, force.com ide, runTests web service

C.

Apex runs in a multitenant environment.
