#### QUESTION 1

Which failover software is strongly recommended for a host attached to a CLARiiON?

- A. PowerPath
- B. MPIO
- C. DMP
- D. ALUA

Correct Answer: C

---

#### QUESTION 2

What do drives 0\_0\_0 to 0\_0\_4 in a CX4 contain?

- A. FLARE and vault
- B. Linux OS and metadata
- C. DART and vault
- D. Enginuity and metadata

Correct Answer: A

---

#### QUESTION 3

The local administrator cannot browse to the array using Unisphere. Which CLI command will display only the failed components?

- A. `naviseccli -h spa_ip faults -list`
- B. `naviseccli -h spa_ip getcrus`
- C. `naviseccli -h spa_ip spcollect`
- D. `naviseccli -h spa_ip gelog`

Correct Answer: A

---

#### QUESTION 4

What is the purpose of the ArrayCommPath setting in a CLARiiON storage system?

- A. It enables LUNZ if LUN0 is not assigned to a host.
- B. It indicates the failover mode for the selected initiator - 0, 1, 2, 3, or 4.
- C. It sets the parameters for the entire storage system on a per-host basis.
- D. It is the CLARiiON module that supports ALUA functions.

Correct Answer: A

---

#### QUESTION 5

What is the maximum number of storage groups that can be created for a CX4-480 with FLARE release 30?

- A. 512
- B. 256
- C. 1024
- D. 2048

Correct Answer: C

---

#### QUESTION 6

A customer has several native devices configured on a Linux server running critical applications. They ask your advice to ensure the applications will not be disrupted if additional devices are added. What do you recommend?

- A. Use PowerPath pseudo-device names for host applications.
- B. Use DMPIO on the server for host application devices.
- C. Configure the server in failover mode 4 for his applications.
- D. Configure persistent binding for his host application devices.

Correct Answer: A

---

#### QUESTION 7

A customer has requested onsite assistance because they are currently unable to communicate with SPA. You arrive onsite and connect to the GbE Service LAN. What IP address do you use to connect to SPA?

- A. 128.221.1.250
- B. 192.168.1.250
- C. 128.221.1.251
- D. 192.168.1.251

Correct Answer: A

---

#### QUESTION 8

A customer is unable to connect to a CX4 after assigning an IP address to their iSCSI HBA. What needs to be configured in order to make a connection?

- A. Initiator network parameters
- B. iSCSI security
- C. iSCSI.conf file
- D. Initiator registration

Correct Answer: A

---

#### QUESTION 9

Which is a valid clone ID?

- A. 0200000000000000
- B. 0010000000000000
- C. 0000000000000020
- D. 1000000000000000

Correct Answer: A

---

#### QUESTION 10

A customer has activated a snapshot on a host and performed a complex simulation using the data on it. They now wish to use the simulation results on a different host without affecting the original production LUN. How can they achieve this?

- A. Copy the results over the LAN to the additional host
- B. Take a snapshot of the results and present to the other host
- C. De-activate the snapshot and activate to the other host
- D. Clone the results and present to the other host

Correct Answer: A

---

**QUESTION 11**

What is the hard-coded Ethernet IP address of the SPB service port on a CX4?

- A. 128.221.1.251
- B. 128.122.2.251
- C. 128.221.1.250
- D. 128.122.2.250

Correct Answer: A

**QUESTION 12**

A CX4 has a storage group configured with LUNs and registered Solaris HBAs. What is the correct sequence of steps to mount the newly allocated LUNs?

Steps	Steps in order
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>
<input type="text"/>	<input type="text"/>

<input type="text" value="Create a mount point and mount the filesystem"/>	<input type="text" value="Label and partition disks"/>
<input type="text" value="Reboot -- r"/>	<input type="text" value="Create a filesystem"/>

Select and Place:

**Steps**

**Steps in order**

Create a mount point and mount the filesystem

Reboot -- r

Label and partition disks

Create a filesystem

Correct Answer:

**Steps**

**Steps in order**

Reboot -- r
Label and partition disks
Create a filesystem
Create a mount point and mount the filesystem

**QUESTION 13**

A user creates a snapshot of a 400 GB source LUN with the Unisphere Snapshot Wizard. How many reserved LUNs, and what size, will be created by default?

- A. Two reserved LUNs of 60 GB each
- B. One reserved LUN of 80 GB
- C. Two reserved LUNs of 40 GB each
- D. One reserved LUN of 120 GB

Correct Answer: A

**QUESTION 14**

Refer to the exhibit.

What is the correct order of the management module components?

- A. A-GbE Service LAN; B-GbE Management LAN; C-Service Port COM1; D-SPS Port COM2; E- NMI Button
- B. A-GbE Management LAN; B-GbE Service LAN; C-Service Port COM1; D-SPS Port COM2; E- NMI Button
- C. A-SPS Port COM2; B-NMI Button; C-Service Port COM1; D-GbE Service LAN; E-GbE Management LAN
- D. A-GbE Service LAN; B-GbE Management LAN; C-SPS Port COM2; D-Service Port COM1; E- NMI Button

Correct Answer: A

**QUESTION 15**

What is used to identify the array when first starting the Unisphere Initialization Utility?

- A. Serial number of the array
- B. WWN seed of the SPE
- C. IP address of the service port
- D. Serial number of the management module

Correct Answer: A
