A. Control Station

B. Data Mover

C. Data Mover and Control Station

D. Windows Server

Correct Answer: D

QUESTION 4

Upon issuing IPCONFIG, an IP address of 169.254.0.4 is returned for a Windows client. The IP address is NOT a valid address in the DHCP server\\'s scope. What is the cause of this problem?

A. The client could not reach the DHCP server and obtained the default addressing from a domain controller

B. The gateway router detected the DHCP server was attempting to provide an IP address outside the client\\'s subnet and provided the default client address instead

C. The PC. was unable to reach a DHCP server and "auto-configuration" was enabled on the client

D. The primary DHCP server was unavailable and the address was received from the secondary DHCP server

Correct Answer: C

QUESTION 5

How is Kerberos used within the Active Directory?

A. For user authentication

B. For time synchronization

C. Provides encryption of stored user passwords

D. Provides Dynamic DNS updates

Correct Answer: A

QUESTION 6

Which object resolution can be provided by NIS?

A. Default gateway

B. Network port

C. Username

D. VLAN tag ID

Correct Answer: C

QUESTION 7

A customer has a fully populated NS704G. Three servers will be loaded as pnmary servers with the fourth in standby mode. One of the primary servers (server_2) will provide access to mission-critical data. The other two servers (server_3 and server_4) will share out archived data for backup purposes.

In case of Data Mover failure, which standby policies can be invoked on server_2, server_3, and server_4 to ensure that mission-critical data receives priority status?

A. Auto on server_2, retry on server_3 and server_4

B. Manual on server_2, retry on server_3 and server_4

C. Override on server_2, manual on server_3 and server_4

D. Priority on server_2, manual on server_3 and server_4

Correct Answer: A

QUESTION 8

A customer needs to temporarily turn off quotas. How does this affect the quota statistics?

A. Deleted

B. Enforced

C. Reset
