#### QUESTION 1

When installing Solutions Enabler what are the core components that must be installed?

- A. CORE, JNI, SQL, STORBASE, STORFULL
- B. SYMRECOVER, SYMCLI, SRMBASE, SQL, UDB
- C. CORE, SYMCLI, SRMBASE, STORBASE, STORFULL
- D. ConfigChecker, SYMCLI, STORBASE, STORFULL

Correct Answer: C

---

#### QUESTION 2

What is the maximum number of initiators allowed in a Symmetrix V-Max array initiator Group?

- A. 8
- B. 32
- C. 16
- D. 48

Correct Answer: B

---

#### QUESTION 3

An SRDF/A session are active, and the device pairs are in a consistent state. What will happen if there is a temporary loss of all links?

- A. RPO will increase.
- B. SRDF/A will drop.
- C. Devices will go into Synchronous mode.
- D. Devices will go into a Partitioned state.

Correct Answer: A

---

#### QUESTION 4

Open Replicator Cold Push will be used to move data between a Symmetrix V-Max array and a third-party array. Which step is required before issuing the Open Replicator create command?

- A. Set the control devices to Not Ready

- B. Set the remote devices to Not Ready
- C. Set the control devices to Read Write
- D. Set a device reservation on the remote devices

Correct Answer: A

---

#### QUESTION 5

Which replication operations are supported by Solution Enabler SYMCLI, but NOT by Symmetrix management console?

- A. SRDF/ Star
- B. Open replicator
- C. SRDF/A and SRDF/S
- D. TimeFinder/Clone and TimeFinder/Snap

Correct Answer: A

---

#### QUESTION 6

Which protection type gives the best performance?

- A. RAID 1
- B. RAID 5 (3+1)
- C. RAID 6
- D. RAID 5 (7+1)

Correct Answer: A

---

#### QUESTION 7

What is required to ensure the integrity of data on the R2 volume during a SRDF fallback operation?

- A. Remove entries from the file system table
- B. Stop any applications that are accessing the R2 volume
- C. Disable journaling on the file system
- D. Suspend the RDF link

Correct Answer: B

---

#### QUESTION 8

A SMC user must have the ability to create new SMC users and assign permission. This user should not have any Symmetric configuration or replication privileges.

Which role should be assigned to this user?

- A. SecurityAdmin
- B. Auditor
- C. Admin
- D. StorageAdmin

Correct Answer: D

---

#### QUESTION 9

What is the result of one or more source (R1) devices in an SRDF/S consistency group cannot propagate data to their corresponding target (R2) devices?

- A. RDF daemon suspends the data propagation from the affected R1 devices while maintaining consistency among the remaining devices.
- B. PowerPath suspends data propagation to the R1 devices in the consistency group (trip the con-group)
- C. EMC software trips the con-group, thereby suspending data propagation from all R1 devices in the consistency group
- D. Target (R2) devices will be Read/Write enabled at the R2 site.

Correct Answer: C

---

#### QUESTION 10

How does TimeFinder emulation mode convert commands?

- A. Mirror commands are converted to Clone commands
- B. Snap commands are converted to Mirror commands
- C. Mirror commands are converted to Snap commands
- D. Clone commands are converted to Mirror commands

Correct Answer: B

---

#### QUESTION 11

What is an advantage of using thin provisioning?

- A. When the provisioning volume also protected with SRDF, no mirror positions would be used.
- B. Thin provisioning presents an application with more capacity than is physically allocated.
- C. Symmetrix Optimizer automatically tunes, monitors, analyzers, and migrate thin volumes to maintain optimal performance.
- D. The provisioning will help meet service-level requirements while providing powerful local-replication Capabilities.

Correct Answer: B

---

#### QUESTION 12

Multiple RDF groups from Different Symmetric arrays have been grouped together to enable Multi Sessions consistency. How does Cycle Switching occur in this configuration?

- A. Cycle switches are controlled by the master Symmetrix.
- B. Cycle switches are controlled by RDF daemon
- C. Cycle switches always occur independently on each Symmetrix after 30 minutes
- D. Cycle switches always occur simultaneously on each Symmetrix arrays after 30 minutes

Correct Answer: B

---

#### QUESTION 13

Diagnostic messaging for the GNS daemon is written to which file?

- A. /7SYMAPI/emc/storgnsd .log0
- B. /SYMAPI/log/storgnsd.log0
- C. /SYMAPI/usr/storgnsd log0
- D. /SYMAPI/bin/storgnsd log0

Correct Answer: B

---

#### QUESTION 14

What is the result if one or more source (R1) devices in an SRDF/S consistency group cannot propagate data to their corresponding target (R2) devices?

- A. RDF daemon trips the con-group, thereby suspending data propagation from all R1 devices in the consistency group.

- B. Target (R2) devices will be Read/Write enabled at the R2 site.
- C. PowerPath suspends data propagation to the R1 devices in the consistency group (trip the con-group).
- D. RDF daemon suspends the data propagation from the affected R1 devices while maintaining consistency among the remaining devices.

Correct Answer: A

---

#### QUESTION 15

Which device types are used when using SMC to create devices for virtual Provisioning?

- A. Thin and Save
- B. Data and Save
- C. Standard and thin
- D. Thin and Data

Correct Answer: D
