QUESTION 1

How does host file system defragmentation of pool LUNs affect VNX performance?

A. Causes heavy loading of cache and back-end ports and may result in a decrease in system performance.

B. Does not cause additional VNX system load and will not affect system performance.

C. Causes heavy loading of cache and front-end ports and may result in a decrease in system performance.

D. Reduces loading of cache and back-end ports and may result in an increase in system performance.

Correct Answer: A

QUESTION 2

Which statement is valid regarding the LACP implementation on the VNX Data Mover?

A. All clients receive an increase in throughput due to LACP increased bandwidth

B. Full- and half-duplex Ethernet ports can be used to create the LACP trunk

C. LACP trunks can be created with any number of physical and virtual devices

D. The Data Mover chooses the greatest number of ports at the same speed

Correct Answer: D

QUESTION 3

What is the minimum acceptable number of drives in a RAID 5 pool on a VNX array?

A. 3

B. 4

C. 5

D. 9

Correct Answer: A

Explanation:

QUESTION 4

While using Event Monitor in a centralized monitoring model, which component monitors for alerts?

A. Management station

B. Host Agent

C. Domain Master

D. SP Agent

Correct Answer: B

QUESTION 5

What does the acronym "CHAP" refer to?

A. Challenge Handshake Authentication Protocol

B. Challenge Handshake Authorization Protocol

C. CLARiiON Handshake Authentication

D. Consistent Host Application Protocol

Correct Answer: D

QUESTION 6

When deleting a Snapsure Snapshot what action is required for a successful deletion?

A. Requires the PFS to be paused

B. Requires the PFS to be refreshed

C. Requires the PFS to be frozen

D. Requires the PFS to be first paused and then frozen

Correct Answer: A

QUESTION 7

What is an advantage of the VAAI feature when provisioning an ESXi host from a VNX array?

A. Some workload can be offloaded from the host to the array freeing up host resources

B. vCenter can directly communicate with the array to discover capabilities and monitor health

C. Hosts automatically register initiators with the array and optimize initiator configuration

D. Array connectivity is automatically load balanced and protected from path failures

Correct Answer: A

QUESTION 8

Which VNX Local Protection Suite offering uses journaling to track the changes?

A. RecoverPoint CDP

B. VNX Replicator

C. VNX Snapshots

D. RecoverPoint CRR

Correct Answer: A

QUESTION 9

A storage administrator configured and presented storage pool LUNs to an MSCS cluster. A few weeks later, the cluster administrator reported the LUNs are too large and smaller LUNs are needed.

What do you advise?

A. The MSCS Cluster will need to be rebuilt.

B. Use the LUN shrink feature.

C. The VLUN migration feature must be used.

D. Use SANCopy to migrate to smaller LUNs.

Correct Answer: A

QUESTION 10

In which situation is virtual RPAs only supported for the deployment of a RecoverPoint/SE CRR solution?

A. In projects that involve data protection of a VNX array

B. When copying volumes using FC/IP converters across a WAN

C. In projects that involve data protection of a third-party block array

D. When copying volumes using iSCSI protocol across a WAN

Correct Answer: A

QUESTION 11

An administrator creates a 500 GB file system with VNX SnapSure configured. What is the initial size of the SavVol that was automatically created?

A. 64 MB

B. 128 MB

C. 20 GB

D. 50 GB

Correct Answer: C

QUESTION 12

Which optional software is commonly installed to provide full high availability from a Windows host system to a VNX array?

A. Adapter Firmware Upgrade

B. Emulex Configuration Utility

C. Navisphere Agent

D. PowerPath

Correct Answer: A

QUESTION 13

Which two types of monitoring configurations are allowed with the "Notifications for Block Storage Systems" option?

A. Centralized and Distributed

B. Local and Remote

C. Internal and External

D. Online and Offline

Correct Answer: A

QUESTION 14

A storage administrator issues the command chmod 750 myfile. After this command completes, what permissions are granted to members of the group owning myfile?

A. No access rights

B. Execute and Write

C. Read and Execute

D. Read and Write

Correct Answer: C

QUESTION 15

An administrator has chosen to delete an NFS export in Unisphere under Storage > Shared Folders > NFS. What is the result of this action?

A. The file system will be permanently deleted.

B. The NFS export will be available again upon reboot.

C. The mount point for this file system will be deleted.

D. The file system will still be available on the VNX system.

Correct Answer: D
