QUESTION 1

When building an xCP project, the application developer needs to ensure that invoked processes that are not directly referenced by other TaskSpace components are included in the DAR.

According to EMC best practices, which actions should the developer take?

A. Update the ANT build scripts to perform an import of the required sub process when building the TaskSpace Composer Project.

B. Add the sub process to the application using the appropriate TaskSpace Configuration options.

C. Manually import the sub processes templates using the Composer menu options.

D. Create TaskSpace Forms to invoke the sub process.

Correct Answer: B

QUESTION 2

An application developer is configuring a task list template to allow end users to select pre- defined criteria to narrow a search result.

How can the task list template be configured to accomplish this?

A. Implement a set value adaptor to add additional qualification in the list view control.

B. Specify conditional qualification in the list view control.

C. Add a filter control with a pre-defined qualification on the task list template.

D. Use an invoke button to display the narrow down result list with the pre-defined qualifications.
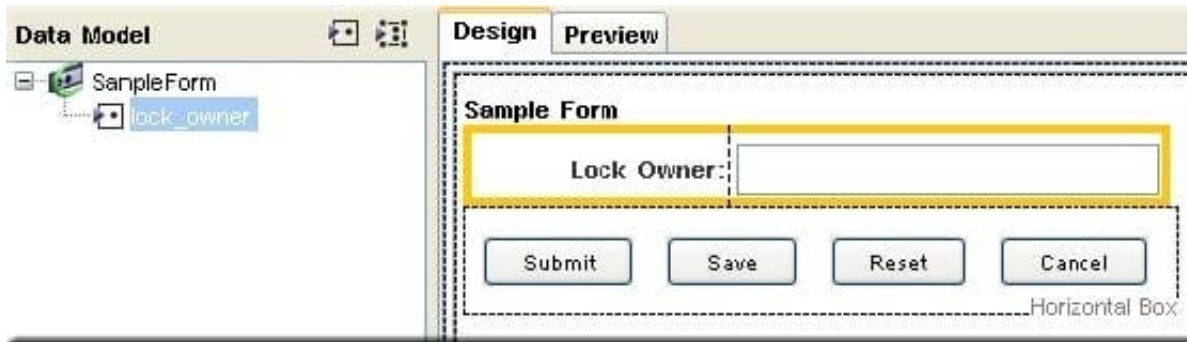

Correct Answer: C

QUESTION 3

What should an application developer do before debugging an HTTP Inbound activity in the process debugger?

A. Alter the process data associated with the activity.

B. Validate and save the process template.

C. Install a web server onto the development machine.

D. Set the port number in the Preferences dialog box.

Correct Answer: D

QUESTION 4

Refer to the exhibit.

An application developer configures a form template in Forms Builder and wants to display the read-only attribute r_lock_owner on the form. In the Storage Mapping dialog, r_lock_owner attribute does not appear in the list for the data item corresponding to the control.

What should the application developer do so r_lock_owner can be displayed on the form?

A. Change the data item name to r_lock_owner so the names match.

B. Configure r_lock_owner attribute in the custom type definition to be editable.

C. Grant the application developer the correct permission so the attribute is accessible.

D. Replace the text field with a bound static text.

Correct Answer: D

QUESTION 5

According to EMC best practices, what can improve the performance of task list sorting and filtering when there are a large number of active workflows?

A. Create a database index on the field dmi_queue_item_s.date_sent.

B. Modify the task list form template to sort on dmi_queue_item.date_sent.

C. Modify the task list form template to sort on dmi_workitem.r_creation_date.

D. Create a database index on the field dmi_workitem_s.r_creation_date.

Correct Answer: C

QUESTION 6

According to EMC best practices, how should reports be displayed to end users based on a user\\'s group?

A. Create different applications for different users.

B. Create reports for different users with different filters and create different dashboards for different users.

C. Set the permissions on the report template to dm_bam_group.

D. Use the @default-group@ filter variable.

Correct Answer: D

QUESTION 7

What is required to import a TaskSpace application into a Composer project?

A. The TCMReferenceProject Composer Project

B. The TCMReferenceProject object type

C. The TCMReferenceProject TaskSpace application

D. The TCMReferenceProject JAR file

Correct Answer: A

QUESTION 8

Which process data type CANNOT be the destination of data mapping in the Process Data Mapping activity template?

A. structured data type

B. process variable

C. process parameter

D. package

Correct Answer: C

QUESTION 9

What is a prerequisite for a user to merge two documents in TaskSpace?

A. The user must configure their merge preferences in TaskSpace.

B. The user must have version permission on both source documents.

C. The TaskSpace application must have the merge_document component installed.

D. The merge document plug-in installed in the user\'s browser.

Correct Answer: B

QUESTION 10

An application developer is creating a custom activity template. The developer defines a dm_method object, referenced by the activity template, which invokes a Java class. What is required of the Java class invoked by the dm_method object?

A. extend WorkflowMethod

B. implement IDfModule

C. deploy as a JAR file

D. access a TBO object

Correct Answer: A

QUESTION 11

When a TaskSpace application is imported into a Composer project, what must be manually added to the project?

A. processes referenced by the TaskSpace application

B. adaptor configurations used in the form templates

C. images used in form templates D. custom types that are used in form adaptors

Correct Answer: D

QUESTION 12

When using Forms Builder, an application developer has two form templates sharing the same data model.

What type of change on one of the templates will invalidate the shared template?

A. renaming the form template

B. modifying the storage mapping

C. renaming a data item

D. renaming a UI control

Correct Answer: C

QUESTION 13

What should an application developer configure in the task template to show the package content in line with a viewer?

A. Add a viewer control on the task template and bind it to /Activity/.../PackageId.

B. Add a viewer control on the task template and bind it to /Activity/.../DocumentId.

C. Add an embedded form control on the task template and bind it to /Activity/.../PackageId.

D. Add an embedded form control on the task template and bind it to /Activity/.../DocumentId.

Correct Answer: D

QUESTION 14

A simple report defined in PRS loads slowly when displaying in a BAM dashboard. How can the report be modified to improve performance?

A. Add one or more child entities.

B. Convert the report to a pie chart.

C. Index the process execution tables.

D. Apply filters to the report entities.

Correct Answer: D

QUESTION 15

Which report entity must be added to an alert so it flags completed processes that have exceeded a specified time threshold?

A. process execution

B. activity duration

C. performer aggregation

D. process duration

Correct Answer: A
