QUESTION 1

An EMC NetWorker administrator configures an advanced file type device, setting the device target sessions to two, and max sessions to four. How is data written to the advanced file type device?

- A. Each save set is written to a separate file.
- B. Each file written by the storage node contains up to four save sets.
- C. Four backup jobs will be multiplexed for every two files written to the device.
- D. Two save sets will be stored in each file.

Correct Answer: A

QUESTION 2

In an EMC NetWorker environment, Auto Media Management is currently enabled on the autochanger. The customer requires unlabeled volumes in the autochanger to be used before recyclable volumes are reused.

In addition, the unlabeled volumes need to be automatically labeled before they are used. How can this be achieved?

- A. Disable Auto Media Management and set all labeled volumes to a mode of Manual Recycle.
- B. Set all labeled volumes to a mode of Manual Recycle.
- C. Set all labeled volumes to a mode of Automatic Recycle.
- D. Disable Auto Media Management.

Correct Answer: B

QUESTION 3

Which EMC NetWorker command line utility is used to view, create, delete, and modify resources?

- A. nsradmin
- B. nsraddadmin
- C. nsrim
- D. winworkr

Correct Answer: A

QUESTION 4

Which command can be used to recover an EMC NetWorker Management Console database?

- A. recover
- B. mmrecov
- C. nwrecover
- D. recoverpsm

Correct Answer: D

QUESTION 5

In a Dell EMC NetWorker environment, what is the purpose of the ConnectEMC feature?

- A. Enable administrators to download supported NetWorker documentation from Dell EMC.
- B. Allow administrators to send NetWorker performance information automatically to Dell EMC.
- C. Help administrators to upload the support bundle to Dell EMC based on requests
- D. Allow administrators to send NetWorker configuration information automatically to Dell EMC

Correct Answer: C

QUESTION 6

If a Level 5 backup is performed for an EMC NetWorker client, at what level is its Client File Index (CFI) backed up?

- A. 5
- B. 1
- C. Full
- D. 9

Correct Answer: A

QUESTION 7

What does an EMC NetWorker directive do?

- A. Directs the save set to a specific pool
- B. Omits specified files from a file system backup
- C. Specifies a file system to back up
- D. Specifies the storage node to use for the backup

Correct Answer: D

QUESTION 8

An EMC NetWorker administrator wants to move NMC from the server where it is currently installed to a new Windows system. The NMC reporting feature is being used.

What must be installed on the new system, in addition to the Console server software?

- A. EMC NetWorker Client software and Java Runtime Environment
- B. Java Runtime Environment and Change Journal Manager software
- C. EMC NetWorker Client software and Change Journal Manager software
- D. EMC NetWorker Storage Node software and Java Runtime Environment

Correct Answer: A

QUESTION 9

On a given EMC NetWorker host, what does the servers file define?

- A. Server(s) that can issue command execution requests to the host
- B. User(s) allowed to log in remotely to that host
- C. Storage node(s) to which backups are sent
- D. Servers(s) that can administer the host

Correct Answer: A

QUESTION 10

Which method(s) can you use to display a list of unlabeled tape volumes in EMC NetWorker?

- A. EMC NetWorker Administration Devices window only
- B. mminfo and EMC NetWorker Administration Devices view
- C. EMC NetWorker Administration Media view only
- D. mminfo and EMC NetWorker Administration Media window only

Correct Answer: A

QUESTION 11

What is the command to start all of the EMC NetWorker processes on a UNIX server?

- A. networker start
- B. ./networker
- C. networker-start
- D. /proc/networker

Correct Answer: A

QUESTION 12

What is the first step in the process for information protection using snapshots?

- A. Application needs to be put into a quiesced state
- B. Ensure that all the writes are committed
- C. Capture a logically consistent virtual view of data
- D. Release the application from quiesced state

Correct Answer: A

QUESTION 13

Client A performs backups to Storage Node S where the backup operations are managed by EMC NetWorker Server N. NetWorker Management Console is running on Server Y. Client A's configuration information was lost.

To which component must the client configuration data be restored?

- A. Storage node
- B. NetWorker Management Console server
- C. Client
- D. NetWorker server

Correct Answer: D

QUESTION 14

An EMC NetWorker Administrator wants to start all of the EMC NetWorker processes on a Solaris server.

Which command would run?

- A. /etc/init.d/networker start

B. /etc/rc2.d/gst start

C. /sbin/int.d/networker start

D. /sbin/init.d/gst start

Correct Answer: A

QUESTION 15

An EMC NetWorker administrator has two LTO-4 tape drives configured on an EMC NetWorker server. One of the two tape drives is dynamically shared with an EMC NetWorker storage node. The other tape drive is statically assigned to the EMC NetWorker server. The shared drive stops functioning on the EMC NetWorker server but continues to function on the storage node.

How many nsrmmmd are now running on the storage node?

A. 1

B. 2

C. 3

D. 4

Correct Answer: A
