- A. Automatic upload, manual upload utility, default email client
- B. Automatic upload, default email client, Powerlink upload page
- C. Manual upload utility, Powerlink upload page, SPcollect
- D. Automatic upload, SPcollect, default email client

Correct Answer: A

---

### QUESTION 3

Refer to the exhibit.

```
Encryption Enabled           = no

Dial In :
  Enabled                    = yes
  Modem phone number        =
  Site ID                   = 2639
  Serial number             = APM00111701395

Email :
  Priority                   = Disabled
  Sender Address            = connectemc@emc.com
  Recipient Address(es)    = emailalert@emc.com
  Subject                   = CallHome Alert
  Primary :
    Email Server            =
    Email IP Protocol      = IPv4
  Secondary :
    Email Server            =
    Email IP Protocol      = IPv4

FTP :
  Priority                   = 1
  Primary :
    FTP Server              = 10.5.21.120
    FTP Port                = 21
    FTP User Name           = onalert
    FTP Password            = *****
    FTP Remote Folder       = incoming
    FTP Transfer Mode       = passive
    FTP IP Protocol         = IPv4
  Secondary :
    FTP Server              =
    FTP Port                = 21
    FTP User Name           = onalert
    FTP Password            = *****
    FTP Remote Folder       = incoming
    FTP Transfer Mode       = passive
    FTP IP Protocol         = IPv4

Modem :
  Priority                   = Disabled
  Primary :
    Phone Number           = 918005270941
  Secondary :
    Phone Number           = 918006262452

HTTPS :
  Priority                   = Disabled
  URL                       =
  HTTPS IP Protocol         =
  Private Key File          = /nas/opt/connectemc/certs/https-privatekey.pem
  Private Key Passphrase    = *****
  Client Certificate        = /nas/opt/connectemc/certs/https-cert.pem
  Server CA Bundle         = /nas/opt/connectemc/certs/https-ca-cert.pem
  Verify Server Name        = no
```

Which command was used to generate this output?

- A. /nas/sbin/connectemc
- B. nas\_emailuser
- C. /nas/sbin/nas\_connecthome
- D. /nas/sbin/modemtst

Correct Answer: C

#### QUESTION 4

Refer to the exhibit.

Which connection is indicated by the number 7 in this VNX SPE Management Module?

- A. Serial Console
- B. Serial (unused)
- C. Service port
- D. Serial Management

Correct Answer: A

#### QUESTION 5

What is the minimum EMC-recommended ratio of standby Data Movers to production Data Movers?

- A. 1:3
- B. 1:2
- C. 1:1
- D. 1:7

Correct Answer: A

#### QUESTION 6

What can cause an SP to go into degraded mode?

- A. Image-SP type mismatch
- B. Failed power supply

C. Multiple unowned LUNs

D. Failed SLIC

Correct Answer: A

---

#### QUESTION 7

Which type of connection does the Control Station use for management?

A. Ethernet public LAN

B. Fibre Channel

C. Ethernet private LAN

D. Serial

Correct Answer: A

---

#### QUESTION 8
