A. Password and passphrase

B. Fingerprint and retina scan

C. Hardware token and smartphone

D. Smart card and PIN

Correct Answer: D

QUESTION 11

A user replaced the external speakers for a workstation, but the new speakers are not producing sound. Which of the following is MOST likely the issue?

- A. The speakers are plugged into the microphone port
- B. The user did not install batteries into the speakers
- C. The sound card is not enabled in Device Manager
- D. The user did not complete the software setup

Correct Answer: A

QUESTION 12

Which of the following tasks is typically performed during the identification phase of the troubleshooting methodology?

- A. Question users.
- B. Verify functionality.
- C. Divide and conquer.
- D. Implement the solution.

Correct Answer: A

QUESTION 13

Which of the following is the BEST option for a developer to use when storing the months of a year and when performance is a key consideration?

- A. Array
- B. Vector
- C. List
- D. String

Correct Answer: A

QUESTION 14

Which of the following security concepts reduces the chance of an on-path attack?

- A. Availability
- B. Integrity

C. Performance

D. Confidentiality

Correct Answer: D

Integrity, in the context of security, involves ensuring that data is not tampered with during transmission or storage. By maintaining the integrity of data, you reduce the chance of an on-path attack where an attacker attempts to alter or manipulate data as it travels between two points. This concept helps protect the data's accuracy and reliability, which is crucial for security. Availability, performance, and confidentiality are also essential security concepts but are not directly related to reducing on-path attack risks.

QUESTION 15

During a power outage, a server with redundant power supplies shuts down despite being connected to a UPS. The technician determines that the UPS has failed and replaces it. The technician then separates the power supplies to connect them to two separate UPSs. Which of the following troubleshooting steps did the technician just accomplish?

A. Implement preventive measures.

B. Establish a plan of action.

C. Document findings/lessons learned.

D. Test the theory to determine the cause.

Correct Answer: A

The technician actually took action rather than making the plans to do so. A is correct due to the implementation. If he didn't already do that it would have been the plan.
