QUESTION 1

Which feature can provide file system snapshot features?

- A. InfolLocker
- B. InfoStamper
- C. NfoProtector
- D. InfoEqualizer

Correct Answer: B

QUESTION 2

A company requires less storage space and a short backup window when data backup is required. At this time, we recommend that the company use. Which type of backup?

- A. Full backup
- B. Full backup combined with cumulative incremental backup
- C. Full backup combined with differential incremental backup
- D. Cumulative incremental backup combined with differential incremental backup

Correct Answer: C

QUESTION 3

What are the advantages of parallel data deduplication: (multiple choice)

- A. High performance
- B. High reliability
- C. Large scale

Correct Answer: ABC

QUESTION 4

Which of the following is the correct power-on sequence of the Huawei distributed storage system?

- A. Cabinet-->Switch-->Node---KVM

- B. Cabinet-->KVM--Switch--->Node
- C. Cabinet-->Node-->KVM---Switch
- D. Cabinet-->Switch-->KVM-->Node

Correct Answer: D

QUESTION 5

Multi-choice Big data storage system schedule maintenance principles include: (Multi- choice)

- A. Develop a reliable backup plan
- B. Reserve spare parts ready for immediate replacement in case of failure
- C. Use the resources and software provided by the original manufacturer

Correct Answer: ABC

QUESTION 6

An enterprise administrator created a shared folder on the root directory of the file system, and created 3 different Quotas under the root directory tree gives manager A (Quota Tree 1), project department B (Quota Tree 2) and sales department C (Quota Tree 3) separately use. The following statement is correct ()

- A. You can limit the CPU usage on Quota Tree
- B. Quota Tree quotas in the root directory must be consistent
- C. According to business needs, different quotas can be configured for each Quota Tree
- D. Cache partition can be set on Quota Tree 2

Correct Answer: C

QUESTION 7

Multiple choice Regarding SmartMigration LUN information exchange, which of the following multiple choice descriptions is correct:

- A. The LUN information exchange needs to stop business.
- B. After the LUN information is exchanged, the host will send data read and write requests to the LUN ID of the target LUN.
- C. Before and after LUN information exchange, the data volume ID of the source LUN will change.

D. Before and after LUN information exchange, the LUN ID of the source LUN remains unchanged.

Correct Answer: ABCD

QUESTION 8

In the master-backup disaster recovery plan, the applications that can be protected by RD currently include: (multiple choice)

- A. Oracle
- B. VMware
- C. FusionSphere
- D. SQL Server

Correct Answer: ABCD

QUESTION 9

In the data replication technology used for disaster recovery, the data replication technology at the host layer is compatible with servers and storage devices.

- A. True
- B. False

Correct Answer: A

QUESTION 10

A company purchased a set of Huawei distributed storage to provide object storage and file storage services. The administrator is in the system. In the system, users can use object and file services at the same time by allowing HTTP access.

- A. True
- B. False

Correct Answer: B

QUESTION 11

Multiple choices of Huawei Oceanstor 9000. Which of the following designs can improve the reliability of the system? (Multiple choices)

- A. N+M data protection
- B. metadata mirroring
- C. Automatic failure detection and automatic data recovery
- D. Data scrub

Correct Answer: ABCD

QUESTION 12

In the following statement about the implementation principle of file system snapshots, which options are wrong to select multiple options ()

- A. When creating a file system snapshot, because the snapshot is stored in a new location, the write operation will affect Storage LUN write performance
- B. After the file system snapshot is created successfully, if the file system user wants to access the snapshot, he must The snapshot directory must be remounted to be accessible
- C. File system snapshot is a copy of data generated by the source file system at a certain point in time
- D. The core technology of file system snapshot implementation is ROW

Correct Answer: AB

QUESTION 13

Which of the following is correct in IDC\\'s description of the characteristics of big data?

- A. Volume
- B. Variety-Diversity
- C. Value-value density
- D. Velocity-speed

Correct Answer: ABCD

QUESTION 14

The following description of the principles of making a backup strategy is wrong:

- A. Measure the frequency of data backup based on the importance of the data

- B. Measure task execution time based on the amount of data change
- C. Measure the data retention period based on the amount of data
- D. Measure backup media based on the discreteness of data

Correct Answer: D

QUESTION 15

An enterprise's business data is stored in two data centers, and storage devices from different vendors are deployed.

The SmartVirtualization feature can be used to host and create original LUNs on heterogeneous storage systems in each data center eDevLUN, and then create an asynchronous remote replication between the eDevLUN and the local LUN on the Huawei storage system at another site to achieve Data disaster recovery between sites.

- A. True
- B. False

Correct Answer: A
