

H31-522^{Q&As}

Huawei Certified Network Professional - Cloud DataCentre Operations

Pass Huawei H31-522 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.certbus.com/h31-522.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei
Official Exam Center

- ⚙️ **Instant Download** After Purchase
- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

The FusionCompute distributed virtual switch (DVS) is similar to a two-layer physical switch. Which of the following is used for DVS to connect VMs and physical networks? (Multiple Choice)

- A. Port group
- B. VLAN pool and subnet
- C. Uplink group
- D. Downlink group

Correct Answer: AC

QUESTION 2

Which of the following statements is incorrect about the FusionSphere OpenStack network?

- A. In FusionSphere OpenStack, physical networks define mappings between virtual networks and host physical network ports.
- B. VMs can directly use physical networks.
- C. A physical network is mapped to a physical network port or port bonding.
- D. No matter on which host a VM is running, the VM can communicate with external networks using the same physical network.

Correct Answer: B

QUESTION 3

If ServiceCenter is deployed in active/standby mode, which of the following IP addresses should be planned? (Multiple Choice)

- A. Floating IP address of the API network
- B. internal_base IP address
- C. Floating IP address of the OM network
- D. Storage_Data IP address

Correct Answer: AC

QUESTION 4

Which of the following statements about block storage and object storage is incorrect?

- A. Cinder provides block storage to be attached to VMs to provide additional disk space for VMs.
- B. Swift is used to store VM images.
- C. In the FusionSphere environment, Glance backend storage is the Swift object storage by default.
- D. In the FusionCompute environment, block storage contains only SAN storage and local storage.

Correct Answer: D

QUESTION 5

What actions are taken to prevent against security risks in the cloud?

- A. Understand related supervision regulations.
- B. Run standard security software.
- C. Encrypt everything.
- D. Understand the cloud storage architecture in use.

Correct Answer: A

QUESTION 6

Services in the data center system are migrated in batches, minimizing the impact of migration on services.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 7

Which of the following statements about key FusionCompute functions is incorrect?

- A. The virtualization layer automatically binds the virtual devices involved in the I/O operation, services, and virtual interrupted threads, and allocates these resources based on NUMA nodes.
- B. A high-precision VM is a high-performance VM imposing strict requirements for the task processing performance, latency, and jittering.
- C. DRS monitors resource usage for each computing node in the same cluster in real time, and uses the VM live migration function to intelligently migrate VMs with high workloads to other nodes with sufficient resources.
- D. By taking workloads and physical resources into consideration, DRS powers off idle hosts to save energy.

Correct Answer: D

QUESTION 8

Which of the following statements is incorrect about service combination management?

- A. In the service lifecycle, tracking investment works with other service management processes to ensure appropriate investment return.
- B. It clarifies the service definition and ensures service achievements, thereby all design, transition, and operation activities are consistent with service values.
- C. It builds an official complaint and upgrade procedure for customers.
- D. Service combination is clear, and service requirements satisfied and service achievements supported by each service are clarified.

Correct Answer: C

QUESTION 9

eSight supports SNMPv1, SNMPv2c, and SNMPv3 protocols. However, SNMPv3 is recommended because SNMPv1 and SNMPv2c have security risks.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 10

Which of the following directories can be cleared during disk space clearing of Operation Center? (Multiple Choice)

- A. /opt/OperationCenter/AppBase/OC/AppBase/var/iemp/data/dump/
- B. /opt/OperationCenter/AppBase/OC/AppBase/var/iemp/log
- C. /opt/OperationCenter/AppBase/OC/AppBase/etc/
- D. /opt/OperationCenter/AppBase/DB/data

Correct Answer: AB

QUESTION 11

Which of the following is not a default role of FusionSphere OpenStack OM?

- A. administrator
- B. operator

C. vdcmanager D. VRManager

Correct Answer: D

QUESTION 12

In the cloud data center scenario, the following prerequisites must be met to configure Cinder: If only FusionCompute and VMware are to be interconnected with FusionSphere OpenStack, the user does not need to configure the storage network plane and storage multipathing. After the interconnection, configure the corresponding backend storage without configuring the backend storage in Cinder.

A. TRUE

B. FALSE

Correct Answer: A

QUESTION 13

Storage devices in FusionCompute need to be scanned. These devices refer to physical storage devices, such as IP SAN, AdvancedSAN, and NAS.

A. TRUE

B. FALSE

Correct Answer: B

QUESTION 14

Which of the following systems is used by OperationCenter as an ITIL system by default?

A. CA SDM

B. CA APM

C. CA Spectrum

D. CA Performance Center

Correct Answer: A

QUESTION 15

After a host enters maintenance mode, stop or migrate all VMs on the host, and then perform maintenance operations.

A. TRUE

B. FALSE

Correct Answer: A
