

Exam : **HP0-094**

Title : HP-UX Networking and
Security

Version : DEMO

1. When mounting a file system from an NFS client, which configuration file is used to name the local mount point?

- A. fstab
- B. nfstab
- C. exports
- D. nfs.conf

Correct: A

2. What is the meaning of the following ARP table entry? # arp -a foo (10.0.0.2) at (incomplete)

- A. Node foo only supports proxy ARP.
- B. The ARP table entry for node foo has expired.
- C. An ARP request was sent for node foo, but there was no ARP response.
- D. An ARP request was sent for node foo, but only a partial response was received.

Correct: C

3. How should you grant NFS filesystem access to individual users as opposed to all users?

- A. create a group accessible mount point
- B. specify a netgroup in the /etc/exports file
- C. add the users to the /etc/exports file using the form host:uid/gid
- D. add the users to the /etc/exports file using the form host:username

Correct: B

4. Which protocol allows your server to discover the IP address of another server based on the other server's name?

- A. ARP
- B. PPP
- C. DNS
- D. DHCP
- E. BOOTP

Correct: C

5. What is used for the implementation of Internet name designations as specified in RFC 1034 and RFC 1035?

- A. INS
- B. BIND
- C. SIND
- D. DHCP

Correct: B

6. A customer reports that pings to node FOO take a long time, then fail with "unknown host". Of the options given, what is the next logical troubleshooting step?

- A. telnet FOO
- B. nslookup FOO
- C. ps -ade | grep ping
- D. ping the IP address of FOO

Correct: B

7. Which directory does the template for your new sendmail.cf file reside?

- A. /etc/mail/
- B. /etc/mail/sendmail/

- C./usr/share/sendmail-cf/
- D./usr/newconfig/etc/mail/
- E./var/templates/shared/mail/

Correct:D

8.Given the following configuration in the named zone file: hp.com IN MX 10 tiger.hp.com IN MX 20 mail.hp.com IN MX 30 relay.hp.com Assuming tiger.hp.com is NOT accessible through the firewall, which statement is true regarding messages addressed to tiger.hp.com?

- A.Incoming mail will be returned to sender as undeliverable.
- B.Incoming mail will arrive on mail and will be forwarded to relay waiting on tiger.
- C.Incoming mail will arrive on tiger but will not be accessible until the firewall is turned off.
- D.Incoming mail will arrive on mail and will be forwarded to tiger as it becomes accessible.

Correct:D

9.When you start the sendmail service, you would like to have the mail written to /var/adm/syslog/mail.log. What should you do?

- A.Modify the mail.conf file to add the new location.
- B.No special action is required because that is the default location.
- C.Append -oL/var/adm/syslog/mail.log to the end of command line.
- D.Append -f/var/adm/syslog/mail.log to the end of the command line.
- E.Append -lf/var/adm/syslog/mail.log to the end of the command line.

Correct:B

10.When you set up an 8 CPU DHCP server, how many subnets can you configure per pool?

- A.1
- B.2
- C.4
- D.8

Correct:A

11.Which states are valid for DHCP? (Select two.)

- A.init
- B.select
- C.rebind
- D.reboot
- E.broadcast

Correct:D E

12.Which combination of NFS mount options provides the best chance of avoiding client hangs?

- A.retry=2,hard
- B.retry=4,soft
- C.retry=6,hard,intr
- D.retry=3,retrans=6

Correct:B

13.Which command dismounts an NFS mounted filesystem?

- A.mount -r /mnt
- B.umount /mnt
- C.mntab -x /mnt
- D.umount server:/mnt

Correct:D

14. During the configuration process for sendmail, which command is run to determine the default hostname to be used for delivery?

- A. `uname -s`
- B. `getuname`
- C. `sendmail -h`
- D. `hostname -s`
- E. `gethostname`

Correct:E

15. What does the DHCP device group allow for?

- A. automatic startup of DHCP tools
- B. multiple subnets to be specified for each pool
- C. callback routines within the `/etc/dcptab` file
- D. different types of clients to receive different parameters

Correct:D

16. Execution of the `telnet foo` command results in a connection refused by foreign host error message. Which file on node foo could be modified to allow TELNET connections?

- A. `/etc/hosts`
- B. `/etc/networks`
- C. `/etc/inetd.conf`
- D. `/etc/svc.conf`

Correct:C

17. What is an SNMP trap?

- A. an event sent by the Network Management Station to a client
- B. host response to a Network Management Station status request
- C. an unsolicited event notifying the Network Management Station of a change
- D. Network Management protocol interrupt generated by a Management Station

Correct:C

18. Which file is the configuration file for the Network Time Protocol daemon?

- A. `rc.conf`
- B. `ntp.conf`
- C. `timed.conf`
- D. `ntp_config.file`

Correct:B

19. Which `/etc/inetd.conf` entries should be disabled in order to disable the remote procedure calls to the system? (Select two.)

- A. `rpc.rexd`
- B. `rpc.ncall`
- C. `rpc.rusers`
- D. `rpc.remsh`

Correct:A C

20. In order to restrict the access to the `/etc/passwd` file through ftp, which statement should be included in the `/etc/ftpd/ftpaccess` file?

- A. `noaccess /etc/passwd`

B.noretrieve /etc/passwd

C.accessdeny /etc/passwd

D.suppressaccess /etc/passwd

Correct: B
