- A. The associated cycles
- B. The requirements linked to and from the source requirements
- C. The tests linked to and from the test steps
- D. The source requirements
- E. The source releases
- F. The associated tests

Correct Answer: BDF

QUESTION 3

When defining a test set, which tabs allow a user to select tests to add to the test set? (Select two.)

- A. Requirements Tree tab
- B. Test Plan Tree tab
- C. Cycle Tree tab
- D. Testing Tree tab
- E. Releases Tree tab

Correct Answer: BD

QUESTION 4

What should you know in order to set up field searching in an HP ALM project?

- A. By default, all eligible fields are set to searchable.
- B. Only selected default fields and user fields of type Memo or String are searchable.
- C. All system fields are searchable, which may impact search times.
- D. The searchable option is only available for the Test and Defects modules.

Correct Answer: C

QUESTION 5

What are the potential subsequent states of a "Fixed" defect in the default ALM defect lifecycle? (Select two.)

- A. Complete
- B. Reopened
- C. Reviewed
- D. New
- E. Closed

Correct Answer: BE

QUESTION 6

What happens when an HP ALM project administrator saves a customization change as a Major Change rather than a Minor Change?

- A. The customization loads when the session expires and the user reconnects.
- B. The customization loads after the ALM server is restarted.
- C. The customization is added to the parent project template.
- D. The customization loads when the user changes screens in ALM.

Correct Answer: A

QUESTION 7

In the HP ALM Synchronizer Links grid, Automode indicates whether the synchronization link is in automatic mode.

How does the Automode value affect the link behavior?

- A. If the field has value True, the link is in automatic mode and will run automatically affixed time intervals (10 minutes).

- B. If the field has value False, the link will run only if you manually instruct it to do so
- C. If the field has value True, the link is in automatic mode and will run in full synchronization mode only, until you disable.
- D. If the field has value True, the link is in automatic mode and will run automatically at time intervals you specified in the Scheduling tab.
- E. If the field has value False, the link will run automatically at fixed time intervals (10 minutes) and will disregard the time intervals you specified in the Scheduling tab.

Correct Answer: C

QUESTION 8

By default, what does HP ALM assign when a new defect is created? (Select two.)

- A. A unique test set
- B. The status Created
- C. The status New
- D. A unique defect ID
- E. A version number

Correct Answer: CE

QUESTION 9

What best describes Application Lifecycle Intelligence (ALI)? (Select three.)

- A. ALI is agnostic to the technologies used by the organization and can aggregate information from a heterogeneous environment, including open source tools as well as commercial ones.
- B. ALI provides an integrated Source Control Management. Build Management/Continuous Integration, and IDE.
- C. ALI is an add-on module for HP ALM that aggregates information from multiple ALM tools to establish a complete ALM traceability.
- D. ALI provides out-of-the-box integration to Source Control Management. Build Management/Continuous Integration, and IDE.
- E. ALI can aggregate information from a homogeneous environment based on open source tools 01.
- F. ALI is a technology embedded in HP ALM that aggregates information from multiple ALM tools to establish a complete ALM traceability and to surface actionable information, and help ALM stakeholders in making informed decisions.

Correct Answer: BCF

QUESTION 10

What should you do to make a new field mandatory when the test status changes to Ready?

- A. Set configuration options for the new field via Customize > Workflow > Script Generator- Test Details Field Customization.
- B. Modify the code of the appropriate event function in Customize > Workflow > Script Editor.
- C. Set configuration options for the new field via Customize > Project Entities > Test > User Fields.
- D. Create a custom event function in Customize > Project Entities > Test > User Fields.

Correct Answer: B

QUESTION 11

Which status values are possible for a test instance? (Select two.)

- A. Suspended
- B. Not Completed
- C. No Run
- D. OK
- E. Completed

Correct Answer: AE

QUESTION 12

What are solutions for running manual tests? (Select two.)

- A. XRunner
- B. HP LoadRunner
- C. Manual Runner
- D. HP Sprinter
- E. HP Unified Functional Testing

Correct Answer: CD

QUESTION 13

Which description applies to HP ALM access restrictions when you authenticate to the application?

- A. Access may be restricted only by role, and projects not accessible by your role are not visible to you.
- B. Access may be restricted by project or role, and projects to which you have no access are visible.
- C. Access may be restricted by project, and projects to which you have no access are not visible.
- D. Authentication method (SSO or CAC) determines the projects that are accessible or visible.

Correct Answer: C

QUESTION 14

When running a test, a tester notices that HP Sprinter is preventing a movie of the test run from being attached to the defect that the tester is submitting.

How can this problem be resolved?

- A. By the project administrator enabling the "Allow attaching movies to defects" option for the appropriate user group on the Customization > Groups and Permissions > Defects page.
- B. By the user adjusting options in the HP Sprinter user interface.
- C. By the user re-establishing an HP ALM connection.
- D. By the project administrator enabling the "Allow attaching movies to defects" option on the Customization > HP Sprinter page.

Correct Answer: B

QUESTION 15

What happens when all licenses for a specific HP ALM module are currently in use and an additional user tries to access that module?

- A. ALM allows the user read-only access. Once a license is released, the user will be informed that write privileges have been granted.
- B. ALM allows timesharing-based access. All users can access the module for a fixed time by using write privileges.
- C. ALM uses a fixed seat model. What happens depends on whether the user is accessing ALM from a computer that is registered as licensed.
- D. ALM uses a concurrency model. The user will be declined access and receive a message indicating such.

Correct Answer: D
