Exam : **HP0-P16**

Title : Planning&Design of HP 9000/HP Integrity Server Solutions

Version : DEMO

1.Which advantages of HP Integrity servers can you propose to a potential customer running IBM POWER4 servers? (Select two.)

A.IBM supports only Linux operating systems.

B.HP is the only vendor that provides partitioning technology.

C.HP Integrity servers can mix processor types on a cell board.

D.A hardware swap is required to migrate from IBM POWER4 to POWER5.

E.HP Integrity offers a better price-to-performance ratio based on SAP SD benchmark data.

Correct:D E

2.When using the HP Performance Quick Reference Tool (PQRT) to find a corresponding server for a competitive offer, which numeric fields do you compare?

A.TPC-B

B.number of CPUs

C.delta performance

D.estimated performance

Correct:D

3.What are advantages of HP partitioning over IBM LPAR partitioning? (Select two.)

A.HP offers two kinds partitions: nPar and vPar.

B.HP vPar partitions offer full electrical isolation.

C.HP nPar partitions offer full electrical isolation.

D.HP partitions offer the same functionality as IBM LPARS.

E.HP nPars enable dynamic processor reallocation to another nPar.

Correct:A C

4.Considering the advantages of using HP Integrity servers for online transaction processing (OLTP) environments, what type of business would benefit the most from using this hardware platform?

A.a data warehouse

B.a bank with automatic teller machines

C.an architectural firm with a large database of digital drawings

D.a library that maintains a catalog of historic records for online viewing

Correct:B

5.Your task is to prepare a document that focuses on the competitive positioning of HP Integrity servers against other vendors for Linux. Which competitive concept should be included in your document?

A.HP delivers proprietary technology and complete solutions for Linux.

B.HP delivers industry-standard platforms and limited solutions for Linux.

C.HP delivers industry-standard platforms and complete solutions for Linux.

D.HP delivers proprietary technology that results in lower total cost of ownership (TCO).

Correct:C

6.When talking to your client about migrating to HP Integrity rx8640 servers, what benefits should you discuss? (Select two.)

A.HP Integrity partitions can be physical and virtual.

B.Integrity servers use 64-bit processor technology.

C.PA-RISC and Itanium cell boards can be mixed in the same complex.

D.The HP Integrity rx8640 server supports up to eight cell boards in the server.

E.Cell boards with different processor speeds can be mixed in the same partition.

Correct:A B

7.A customer is hesitant to invest in HP Integrity servers because an IBM representative told him that the Itanium 2 processor will go out of production due to low independent software vendor (ISV) support. Which responses are correct for this concern? (Select two.)

A.More than 7000 ISVs are developing software for the Itanium 2 processor and the number is growing.

B.HP Integrity Virtual Machine will enable the customer to run any x86 application without performance loss.

C.The roadmap for HP Integrity servers indicates that future processor developments will be included in the customer's business plans.

D.Even though there are only 7000 ISVs developing software to run on Itanium 2 processors, they cover every needed type of application.

Correct:A C

8.What differentiates HP Integrity servers from other vendors' Itanium-based systems?

A.chipsets

B.full redundancy

C.faster clock speeds

D.memory expandability

Correct:A

9.Your customer performs a network-based backup of HP-UX servers over a Gigabit Ethernet LAN to save their data to a library. Which technology will improve performance?

A.NIC bonding

B.NIC teaming

C.Auto Port Aggregation (APA)

D.Advanced Technology Attachment

Correct:C

10.What differentiates the HP Integrity platform from the IBM pSeries?

A.HP Integrity does not run Linux.

B.IBM pSeries does not run Linux.

C.HP Integrity does not run Windows.

D.IBM pSeries does not run Windows.

Correct:D

11.Your customer wants to upgrade their IT environment. What must you do when gathering information about the customer's existing infrastructure?

A.Identify existing contracts and validate them with the contract administration group.

B.Identify the existing management and administration model and validate the customer's market position.

C.Identify the existing server and storage environment for hardware revision levels and update to the latest version.

D.Identify the existing server, storage, application, management, administration, contracts, system, and site diagrams.

Correct:D

12.What is the primary advantage of using roadmaps when discussing HP solutions with your customers? (Select two.)

A.Roadmaps show information about product reliability.

B.Roadmaps provide information about technical product specifications.

C.Roadmaps show the customer which direction HP is going.

D.Roadmaps create a shared understanding of the future of the business.

Correct:C D

13.What is an advantage of Itanium-based processors over PA-RISC-based processors?

A.They provide higher reliability and availability.

B.They provide mission-critical application support.

C.They support different operating systems and applications.

D.They provide more than 4GB available memory per application.

Correct:C

14.Which new features are available on the zx2 chipset, as compared to the zx1 chipset? (Select two.)

A.SDRAM

B.chip spare

C.double chip spare

D.up to 512GB main memory

E.up to 768GB main memory

Correct:C E

15.Which feature allows an HP Integrity platform with HP Virtual Server Environment (VSE) to remain operational if a processor chip fails?

A.iCAP

B.OLAR

C.hot plug processors

D.dynamic processor deallocation

Correct:D

16.How many logical processors are provided in an HP Integrity rx6600 server that has four dual-core Itanium 2 processors with HyperThreading enabled?

A.4

B.8

C.16

D.32

Correct:C

17.What are the components of a cell board in an Integrity mid-range server?

A.up to four hard drives B.up to

64 memory DIMMs C.up to two

PCI I/O card cages

D.up to four multi-core processor chips

Correct:D

18.By what factor is the I/O bandwidth of the zx2 chipset increased compared to the zx1 chipset?

A.1.0

B.1.2

C.2.0

D.2.5

Correct:C

19.HP offers Advanced Memory Protection in the zx2 and sx2000 based servers. Which option enables this benefit?

A.Double-chip sparing

B.DDR2 memory

C.Scalable Memory Extenders

D.Memory scrubbers

Correct:A

20.What new feature is enabled by the zx2 chipset, as compared to the zx1 chipset?

A.PCI-X 1.0

B.SDRAM

C.chip spare

D.PCI Express

Correct:D

Trying our product !

★ **100%** Guaranteed Success

★ **100%** Money Back Guarantee

★ **365 Days** Free Update

★ **Instant Download** After Purchase

★ **24x7** Customer Support

★ Average **99.9%** Success Rate

★ More than **69,000** Satisfied Customers Worldwide

★ Multi-Platform capabilities - **Windows, Mac, Android, iPhone, iPod, iPad, Kindle**

Need Help

Please provide as much detail as possible so we can best assist you.
To update a previously submitted ticket:

One Year Free Update
Free update is available within One Year after your purchase. After One Year, you will get 50% discounts for updating. And we are proud to boast a 24/7 efficient Customer Support system via Email.

Money Back Guarantee
To ensure that you are spending on quality products, we provide 100% money back guarantee for 30 days from the date of purchase.

Security & Privacy
We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.
