QUESTION 1

How can you disallow user connections, while preserving dbadmin connectivity?

- A. `SELECT close_session (session_id);`
- B. `SELECT close_all_sessions;`
- C. `SELECT set_config_parameter ('\\MaxClientSessions\\S\\');`
- D. `SELECT set_config_parameter ('\\MaxClientSessions\\O\\');`

Correct Answer: C

QUESTION 2

What are the benefits of ordering data in projection design? (Select two.)

- A. It enables optimum encoding.
- B. It enables partitioning of data.
- C. It enables efficient sharing of data between similarly-ordered projections.
- D. It enables efficient application of query predicates.
- E. It enables segmentation of data.

Correct Answer: DE

QUESTION 3

What are the actions of the mergeout task? (Select three.)

- A. Mergeout rewrites all ROS containers.
- B. Mergeout writes data to memory.
- C. Mergeout consolidates containers on disk.
- D. Mergeout places data into all defined projections on the source table.
- E. Mergeout purges deleted data already on disk.
- F. Mergeout moves data from memory to disk.

Correct Answer: CDE

QUESTION 4

When is a backup recommended? (Select two.)

- A. prior to shutting down the cluster
- B. prior to upgrading Vertica
- C. prior to starting the Vertica cluster
- D. any time large amounts of data have been added, updated, or deleted
- E. any time data is added, updated, or deleted

Correct Answer: AE

QUESTION 5

What are the disadvantages of using delete vectors to identify records marked for deletion? (Select two.)

- A. Delete vectors are stored in a different location, minimizing storage impact.
- B. Delete vectors rewrites files, causing additional overhead.
- C. Delete vectors must be recognized during the query process to remove records marked for deletion from the result set, slowing down the processing of a query.
- D. Delete vectors do not instantly reclaim space used by deleted records.
- E. Delete vectors must be maintained forever.

Correct Answer: CD

QUESTION 6

What is available on the Jobs chart in the Management Console? (Select two)

- A. loading status and errors
- B. resource pool usage
- C. memory usage
- D. recovery progress and errors
- E. query performance

Correct Answer: AD

QUESTION 7

What are features of using the Vertica backup script? (Select two.)

- A. It uses a lightweight locking protocol, stopping data loading for a brief period of time
- B. It can be run remotely via the Management Console
- C. It enables recovery by database, node, or table
- D. It enables backup of the entire database only
- E. It can be run while the database is not running.

Correct Answer: BC

QUESTION 8

What can be used to determine memory resources needed by a query?

- A. Generate an EXPLAIN plan on the query.
- B. Review the digraph of the query.
- C. PROFILE the query.
- D. Run the query and view the information in the results.

Correct Answer: C

QUESTION 9

What are characteristics of projections in Vertica? (Select three.)

- A. A projection can contain data from one or more source tables.
- B. A projection can contain data from only one source table.
- C. A projection can contain a subset of rows from the source table.
- D. Each projection contains all rows from the source table.
- E. A projection can contain a subset of columns from the source table.
- F. Each projection contains all columns from the source table.

Correct Answer: ADF
