QUESTION 1

A customer wants to present some drives from D3940 Storage Module to the HPE Synergy compute module. Which tool can be used to complete this task?

- A. HPE Image Streamer
- B. Global Dashboard
- C. HPE Composer
- D. HPE Smart Storage Administrator

Correct Answer: C

QUESTION 2

HOTSPOT

Click on the area on the front panel of the HPE Synergy frame that provides KVM connectivity.

Hot Area:

Correct Answer:

QUESTION 3

A customer has ten c7000 enclosures equipped with Gen8 servers and Virtual Connect FlexFabric modules. The servers are monitored by HPE Systems Insight Manager (SIM). The customer plans to add three additional enclosures with

FlexFabric modules and GEN10 servers and standardize management using HPE OneView.

How should they implement the new management system?

- A. Deploy HPE OneView, migrate existing enclosures to HPE OneView, and add new enclosures to HPE OneView.
- B. Add new enclosures to the HPE Systems Insight Manager, then migrate all enclosures to HPE OneView.
- C. Upgrade existing HPE System Insight Manager installation to the latest version of the HPE OneView, and add new enclosures.
- D. Configure a new domain group in Virtual Connect Enterprise Manager, import new enclosures to that group, and migrate all of them to the HPE OneView.

Correct Answer: A

QUESTION 4

A customer is looking to purchase some new servers for their environment. They need to use a free service tool themselves to calculate the cost of the servers. Which tool meets the customer's needs?

- A. HPE Power Advisor
- B. HPE Converged Infrastructure Solution Sizes Suite (CISSS)
- C. HPE iQuote
- D. HPE One Config Advanced

Correct Answer: C

QUESTION 5

A customer needs to manually configure a logical drive for an HPE Synergy compute module using drives presented from a D3940 Storage Module. Which tool can be used to complete this task?

- A. HPE Composer
- B. Global Dashboard
- C. UEFI
- D. HPE Smart Storage Administrator

Correct Answer: A

QUESTION 6

A customer needs to simplify the firmware management process by integrating HPE Smart Update Manager (SUM) with iLO Federation. What are the required steps? (Select two.)

- A. Create iLO Federation groups using iLO interface.
- B. Use the iLO interface to integrate iLO Federation Group with HPE SUM
- C. Create iLO Federation groups using HPE SUM
- D. Use RIBCL scripts to create a trust relationship between iLO Federation group and HPE SUM
- E. Discover iLO Federation groups in HPE SUM

Correct Answer: AE

QUESTION 7

What is the purpose of the HPE iLO5 Service Port?

- A. Configure InSight Remote Support.
- B. Enable server connection to HPE OneView.
- C. Troubleshoot server issues using direct connectivity.
- D. Perform the Virtual Connect module firmware update.

Correct Answer: C

QUESTION 8

Which advantage does the HPE RESTful API for iLO provide?

- A. unique command format across all server product lines
- B. consistent API calls across server architectures
- C. unique API calls for each server architecture
- D. user extensible, allowing customers to expand the data model

Correct Answer: B

QUESTION 9

DRAG DROP

Match the HPE ProLiant Gen10 servers to the intended workload.

Select and Place:

Server		Workload
ML350	<input type="text"/>	IT infrastructure support, web, and collaboratoin
DL80	<input type="text"/>	storage-centric applications
ML110	<input type="text"/>	large databases
DL560	<input type="text"/>	file and print

Correct Answer:

Server		Workload
	<input type="text" value="DL560"/>	IT infrastructure support, web, and collaboratoin
	<input type="text" value="ML110"/>	storage-centric applications
	<input type="text" value="ML350"/>	large databases
	<input type="text" value="DL80"/>	file and print

QUESTION 10

Which technology provides the lowest latency and high bandwidth within high-performance environment?

- A. Ethernet
- B. Fibre Channel
- C. iSCSI
- D. InfiniBand

Correct Answer: D

QUESTION 11

A cost-conscious health care customer is considering Gen10 server solutions to adhere to security mandates. Which security features should the customer test with an iLO5 standard license? (Select two.)

- A. Runtime Firmware Validation
- B. Manual Secure Recovery
- C. Automatic Secure Recovery
- D. Secure Erase of User Data
- E. Silicon Root of Trust

Correct Answer: CE

QUESTION 13

What should you use to validate a supported HBA firmware for connecting to an HPE 3PAR array?

- A. HPE Single Point of Configuration Knowledge (SPOCK)
- B. Smart Update Manager
- C. Operating System Support Matrix website
- D. Unified Extensible Firmware Interface (UEFI)

Correct Answer: A

QUESTION 14

A customer has a DL380 Gen10 server running a database application with a write intensive workload. They are experiencing poor write performance.

What could the customer do to upgrade the performance of this application?

- A. install persistent memory
- B. Configure logical volumes for RAID 6
- C. install larger capability disk drives
- D. install a graphic accelerator

Correct Answer: B

QUESTION 15

A customer is evaluating HPE Gen10 ProLiant server options. They want to test the ability to erase all user data so that it is irrecoverable. Which license option will they need?

- A. iLO Advanced Premium Security Edition
- B. iLO Advanced
- C. OneView Advanced
- D. OneView without iLO

Correct Answer: A
