-  **800,000+** Satisfied Customers

QUESTION 1

Is this a reason why your customer might choose the HPE Apollo 4510 systems instead of the HPE Apollo 4200 system?

Solution: The Apollo 4510 system has a higher density chassis, and so can host more drives with more backup capacity.

A. Yes

B. No

Correct Answer: A

QUESTION 2

Your customer runs a hyperconverged solution based on HPE SimpliVity. with a built-in data protection mechanism from HPE SimpliVity They try to recover objects from a Microsoft Exchange server but cannot find the option in the user interface. Is this valid response regarding their problem? Solution: Since HPE SimpliVity does not support Granular Object Restore (GRE). you must use an additional data protection application like Veeam

A. Yes

B. No

Correct Answer: B

QUESTION 3

As It relates to application consistent backups, does this statement accurately describe the volume Shadow copy Service (VSS)? Solution: The use of the VSS mechanism is only possible on Windows based VM's

A. Yes

B. No

Correct Answer: A

QUESTION 4

A customer wants to replace an aging tape-based backup platform using a Grandfather-Father-Son (GFS) rotation scheme. They are considering replacing the entire solution with public cloud storage as a backup target Is this a valid recommendation for this customer? Solution: Avoid using public cloud storage as a target in this scenario, since they cannot deliver the same SLAs as the local on-premises backup solution based on HPE StoreEver

A. Yes

B. No

Correct Answer: B

QUESTION 5

As it relates to application consistent backups, does this statement accurately describe the Volume Shadow copy Service (VSS)? Solution: The VSS requestor instructs each VSS provider to perform a task to quiesce data. After each VSS provider has completed these pre-backup tasks, the VSS writer instructs the VSS requestor to create the snapshot.

A. Yes

B. No

Correct Answer: B

QUESTION 6

Is this a reason why your customer might choose the HPE Apollo 4510 systems instead of the HPE Apollo 4200 system?

Solution: The Apollo 4200 system is deployed with Veeam Backup and Replication Standard Edition, while the 4510 system runs the Enterprise Edition for a more extended feature set.

A. Yes

B. No

Correct Answer: B

QUESTION 7

A customer wants to replace an aging tape-based backup platform using a Grandfather-Father-Son (GFS) rotation scheme. They are considering replacing the entire solution with public cloud storage as a backup target. Is this a valid recommendation for this customer? Solution: Cloud storage is ideal for the Grandfather copies of backup data for long-term data retention. Keep an on-premises solution for the "Son" copies to guarantee lower RTO and RPO numbers.

A. Yes

B. No

Correct Answer: A

QUESTION 8

A customer contacts you for assistance with performance troubleshooting of their backup environment

because over the last few days they notice Increasing times for backup completion. They see no apparent reason for this, since the data volume to be backed up did not change unusually compared to the previous days and weeks.

You also notice that the deduplication ratio, historically steady at about 20:1. is now gradually declining.

Is this a potential cause of the problem?

Solution: Ransomware is encrypting data, making the daily incremental backups grow and lowering the deduplication ratio due to new content.

A. Yes

B. No

Correct Answer: A

QUESTION 9

You meet with a customer about a new data protection solution. One of the most important requirements is low RTO and RPO numbers. In the range of minutes. The amount of data to be backed up is in the range of 50TB on an ISCSI based HPE Nimble array. Is this a backup target that can validly be considered for the new solution? Solution: Install a NAS device on the ISCSI network to enable data replication from the SAN to the NAS device by the backup application, thus allowing fast recovery over the high speed storage network

A. Yes

B. No

Correct Answer: A

QUESTION 10

Does this topology/implementation comply with the 3-2-1 rule of data protection? Solution: An HPE MSA array creating local snapshots on the same array Backups are made with Veeam to a local HPE StoreOnce system using MAS shares Within Veeam a copy job is active to a Veeam Cloud Connect repository target hosted at a public cloud provider

A. Yes

B. No

Correct Answer: A

QUESTION 11

Your customer deployed Micro Focus Data Protector as the data protection solution for their HPE 3PAR storage infrastructure in combination with HPE StoreOnce appliances. They contact you regarding options to extend data protection towards the cloud Is this a valid option for your customer? Solution Micro Focus Data Protector has no native

cloud Integration and is dependent of the backup target appliance to send data towards solutions like HPE StoreOnce Cloud Bank

A. Yes

B. No

Correct Answer: A

QUESTION 12

During a meeting, you learn that your client has an SLA with another business, but that business asks for lower RTO and RPO times for data recovery.

Is this a correct statement regarding how HPE solutions can help to comply with this tighter SLA? Solution:

Commvaultintellisnap technology and the HPE storage snapshot engine allow you to meet demanding business-critical application SLAs with scalable protection for recovery point and time objectives in minutes.

A. Yes

B. No

Correct Answer: A

QUESTION 13

Is this a valid statement regarding Commvault components? Solution: For larger environments where high availability is critical, the CommServe server can be clustered.

A. Yes

B. No

Correct Answer: B

QUESTION 14

Your customer currently uses an HPE Nimble storage array Data protection is provided by Veeam connected to HPE StoreOnce Gen4 Catalyst stores Your customer asks for your advice regarding optimized data protection following the 3-2-1 rule with an additional copy outside the datacenter you tell them about the HPE StoreOnce feature called Cloud Bank storage. Are these correct statements about enabling Cloud Bank storage in this environment? Solution: Recovery Manager Central (RMC) must be deployed to handle the copy management from HPE Nimble to the HPE StoreOnce Catalyst store and from HPE StoreOnce to the Cloud Bank store. An RMC license for the Nimble array and a capacity-based license for Cloud Bank is required.

A. Yes

B. No

Correct Answer: B

QUESTION 15

You are organizing a Proof-of-Concept (POC) for your customer for their new data protection solution based on Commvault technology in combination with HPE Nimble storage and HPE StoreOnce backup targets. The customer asks you to demonstrate the configuration options for deduplication within the Commvault solution. Is this a location where you can modify the deduplication parameters? Solution: Navigate to the Agents section and show the different parameters inside the Backup, Archive, Normalization and Replication agents

A. Yes

B. No

Correct Answer: A
