QUESTION 1

In the Peer Motion unidirectional workflow, what is the allocation status on the destination array during the Admit stage?

A. No local storage is allocated.

B. Full capacity of the actual data size is allocated.

C. Full capacity of the volume raw capacity is allocated.

D. Capacity of the actual data size in RAID 1 is allocated.

Correct Answer: A

QUESTION 2

Which HPE Storage family should you recommend to a customer who is looking Tor maximum availability with the lowest in class TCO for enterprise consolidation?

A. HPE 3PAR StoreServ

B. HPE Simplivity

C. HPE Nimble

D. HPE XP

Correct Answer: B

QUESTION 3

Which types of protection are supported in the HPE File Persona with RMC solution? (Select two.)

A. Express Protect

B. Virtual File Server Catalyst Copy

C. Crash-Consistent Snapshot

D. Peer Copy

Correct Answer: BD

QUESTION 4

For which benefit should you recommend HPE 3PAR StoreServ 20450 over the 9450 model? (Select two.)

A. higher performance (IOPS and bandwidth)

B. better density of SSD drives in the base rack

C. power and cooling efficiency

D. higher per-node cache

E. easier management

Correct Answer: BC

QUESTION 5

Which software component complements HPE RMC for added customer value with the integration with HPE RMC for VMware (RMC-V) and is a tool that extends the functionality of a backup and replication feature (by allowing the administrator to view and recover an application item from within the application VM backup or replica)?

A. Veeam Explorer

B. HPE 3PAR Host Explorer

C. HPE RMC Catalyst Host Agent

D. Oracle RMAN

Correct Answer: A

QUESTION 6

What is the benefit of using HPE 3PAR StoreServ and HPE Recovery Manager Central with HPE StoreOnce? (Select two.)

A. Each backup completes at the speed of a differential backup and restores as a traditional full restore.

B. The HPE Recovery Manager Central agent in each host provides self-service data protection.

C. They provide rapid and non-disruptive online recovery.

D. Each backup is deduplicated in the 3PAR array prior to a restore, for an application-consistent restore result.

E. Each backup can be restored via a synthetic full image.

Correct Answer: AB

QUESTION 7

Which parameters can be set with Priority Optimization? (Select three.)

A. Min Limit

B. Max Limit

C. Min Goal

D. Latency Goal

E. Max Latency

F. Max Goal

Correct Answer: BCE

QUESTION 8

In which state of the Peer Motion unidirectional workflow does the host access the volumes on the source storage system through the destination storage system?

A. Import

B. Admit

C. Dismiss

D. Admitvv

Correct Answer: C

QUESTION 9

DRAG DROP

Arrange the process of HPE RMC-3PAR application data protection in the right order.

Select and Place:

Application Data Protection

Application Data Protection
RMC leverages unique HPE 3PAR SnapDiff block-change detection technology to send only unique changed data to HPE StoreOnce, using multi-streaming for faster backup.
HPE StoreOnce deduplication reduces backup storage requirements and enables cost-effective, reliable retention.
HPE StoreOnce ingests changed blocks to create deduplicated, independent, synthetic full image backup.
The application owner triggers backup using the native interface/utility.
The application guiesces momentarily while a consistent, non-disruptive snapshot is created on HPE 3PAR.

Order

(empty)

Correct Answer:

Application Data Protection

Order

Order
HPE StoreOnce deduplication reduces backup storage requirements and enables cost-effective, reliable retention.
HPE StoreOnce ingests changed blocks to create deduplicated, independent, synthetic full image backup.
The application guiesces momentarily while a consistent, non-disruptive snapshot is created on HPE 3PAR.
The application owner triggers backup using the native interface/utility.
RMC leverages unique HPE 3PAR SnapDiff block-change detection technology to send only unique changed data to HPE StoreOnce, using multi-streaming for faster backup.

QUESTION 10

Which technology is designed for customers who own HPE StoreOnce and HPE 3PAR StoreServ, and want to recover mission-critical application data more rapidly or frequently than what the traditional backup applications?

A. HPE Remote Copy

B. HPE Virtual Machine Explorer

C. Application consistent snapshots

D. HPE RMC Express Restore

Correct Answer: A
