### QUESTION 1

Your customer calls you with an initial order for 25 servers with more to follow if the configuration, setup, installation and customer experience is flawless. In talking further you discover that their customer is looking for validated third party components for their Intel Server Products. Where would you advise your customer to find this information from the below list? (Select ALL that apply).

- A. Hardware compatibility List
- B. Tested Hardware and Operating System List
- C. Configuration Guide
- D. Technical Product Specification
- E. Sever Configurator Tool
- F. Quick Start User Guide

Correct Answer: BE

---

### QUESTION 2

An Intel Server Board S2600WT2 has been assembled and powered on; however, the status LED on the front panel blinks with an amber colour which means a non-critical alert has occurred. Which of the following might be the BEST way to find the reason for this alert?

- A. Listen to beep code and look for it in TPS.
- B. Look up ERROR MANAGER in the BIOS.
- C. View POST LED code and look for it in TPS.
- D. View the SEL log.

Correct Answer: D

---

### QUESTION 3

You are explaining to a potential customer the benefits of having an embedded web server in the BMC of their R2224WTTY5 system, and how using the TAB >server health >sensor readings enables monitoring of many onboard devices as a way of reducing failure and promoting continuous server uptime. You have elected to give him a list of some of the items that are continuously monitored by the BMC. Please choose those that are monitored. (Select ALL that apply).

- A. HDD storage capacity
- B. System Fan speeds in RPM
- C. CPU threads and VR usage in amps

- D. Exhaust Air temperature 0C
- E. Memory capacity
- F. CPU Name and model number
- G. CPU VR Temperature in 0C
- H. System Airflow in CFM
- I. CPU TDP
- J. Front panel temperature in 0C

Correct Answer: BDGHJ

---

#### QUESTION 4

What is required to enable Intel RAID SSD Cache? Please choose from the list below. (Select ALL that apply).

- A. Intel RAID controller
- B. SAS HDD
- C. Intel Premium feature key
- D. Intel SSD
- E. Intel RAID web console

Correct Answer: AC

---

#### QUESTION 5

Which of the following memory modules can be used in the Intel Server Board S1200V3RP? Please choose your answer from the list below.

- A. Non ECC LRDIMM
- B. Non-ECC UDIMM
- C. ECC RDIMM
- D. ECC LRDIMM
- E. Non-ECC RDIMM
- F. ECC UDIMM

Correct Answer: F

---

#### QUESTION 6

When enabling drive security in a RAID web console, with the Full Disk Encryption Premium Feature Key, which of the following is optional?

- A. Solid state disks
- B. The security key identifier
- C. The security key
- D. The passphrase

Correct Answer: D

---

#### QUESTION 7

Your customer is involved in planning a new compact data centre. Some of the critical features that need to be considered in such a data centre include heat and energy dissipation. This means they must know the power draw of the servers they plan to configure. What is the maximum number and speed of DIMMs that can be accommodated in the S1200V3RP in a 1U chassis? Please choose your correct answer from the list below:

- A. 2DIMM slots at 1333 MT/s (ECC) RDIMMs
- B. 4DIMM slots at 1333 MT/s (ECC) RDIMMs
- C. 8DIMM slots at 1333 MT/s (ECC) RDIMMs
- D. 2DIMM slots at 1600 MT/s (ECC) UDIMMs
- E. 4DIMM slots at 1600 MT/s (ECC) UDIMMs

Correct Answer: E

---

#### QUESTION 8

What is the correct method of connecting the SGPIO cable to two HSBPs in the current generation server systems? How would you answer from the list below?

- A. In the current generation platform the HSBP does not need an SGPIO
- B. In the current generation platform the SGPIO is integrated within the data cables
- C. The first HSBP connects with an SGPIO cable to the system board, the second HSBP connects via SGPIO cable to the first HSBP
- D. One HSBP connects via SGPIO cable to the system board, the other HSBP connects via SGPIO cable to the RAID controller
- E. Each HSBP connects with its own cable to the system board

Correct Answer: C

---

#### QUESTION 9

An Intel Server Board is integrated into an Intel?Server Chassis and uses the latest system update package to bring the BIOS and firmware to the most up-to-date versions. After this process, an Intel? Server Specialist finds that the system fans still spin at full speed, even when the system is idle. Which of the following is the MOST likely cause of this?

- A. The chassis intrusion switch is malfunctioning.
- B. The memory DIMMs in the system do not have a thermal sensor.
- C. One of the system fans is connected to the wrong header.
- D. The processor has reached the thermal throttling point.

Correct Answer: C

---

#### QUESTION 10

The Intel Server Board S2600WT has two Front Panel headers through which front panel signals can be routed. Which of the following documents would an Intel Server Specialist use to identify the pin-out of each header?

- A. The Service Guide
- B. The Spare Parts and Configuration Guide
- C. The Technical Product Specification
- D. The Quick Start Guide

Correct Answer: C

---

#### QUESTION 11

Does the number of hard drives in a given array determine the RAID levels that can be supported?

- A. No
- B. Yes

Correct Answer: B

---

#### QUESTION 12

Your customer is competing in a Government Tender which specifies Infiniband?modules. Which of the following list of boards can support Infiniband?I/O Modules such as the AXX1FDRIBIOM? (Select ALL that apply).

- A. Intel Server Board S2600CW
- B. Intel Server Board S1200V3RP

- C. Intel Server Board S2600KP
- D. Intel Server Board S1200V5SP
- E. Intel Server Board S2600WT

Correct Answer: CE

---

#### QUESTION 13

Which of the following BIOS setup pages should be entered in an Intel Server to configure the onboard SATA mode?

- A. Advanced PCH configuration
- B. Advanced-Processor Configuration
- C. Advanced-Disk Configuration
- D. Advanced-PCI Configuration
- E. Advanced-Mass Storage Controller Configuration

Correct Answer: E

---

#### QUESTION 14

Your customer wants to build a data center and is looking for space-efficient solutions, which will accommodate HPC infrastructure. As an Intel Server specialist which of the following products would you advise for this, given the need for space-efficiency and onboard high speed interconnects?

- A. Intel Compute Module HNS2600KP
- B. Intel Server Board S2600GZ
- C. Intel Server Board S2600WTT
- D. Intel Compute Module HNS2600TPF

Correct Answer: D

---

#### QUESTION 15

Your customer calls you to say that their main server is having problems and no one can do any work at the present. You will have to help troubleshoot over the phone since you were unable to convince your customer to invest in a remote management module at the time of purchase. Which of the following should you do first?

- A. Get a complete problem statement and full system logs.
- B. Swap out all the memory since this is obviously memory related.
- C. Install new hard drives as this is usually the first problem in a hard-working server.

D. Swap out all the components one by one with known good ones ensuring appropriate ESD precautions are observed.

Correct Answer: A
