QUESTION 1

DRAG DROP

A company uses the Dynamics 365 Supply Chain Management Warehouse management module.

The company requires production waves to be processed in batch.

You need to configure wave processing.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions		Answer Area
Set up a warehouse	 	
Set up the Production control parameter Production line release		
Set up Wave templates		
Set up Warehouse management parameters		

Correct Answer:

Actions		Answer Area
	 	Set up a warehouse
		Set up Wave templates
		Set up Warehouse management parameters
		Set up the Production control parameter Production line release

Reference: <https://docs.microsoft.com/en-us/dynamics365/unified-operations/supply-chain/warehousing/tasks/configure-wave-processing>

QUESTION 2

DRAG DROP

Accompany uses Dynamics 365 Supply Chain Management to manage procurement operations.

The company plans to source some product lines from offshore vendors. The company wants to use the landed cost

module feature for the shipment tracking and item costing.

You need to configure the landed cost functionality.

What should you configure for each requirement? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes

or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Components	Requirement	Component
Folio	Identify the available weight and volume offered by the carrier to minimize the per unit shipping cost.	
Purchase order	Identify the party responsible to pay the freight difference for the shipped item.	
Shipping container		

Correct Answer:

Components	Requirement	Component
	Identify the available weight and volume offered by the carrier to minimize the per unit shipping cost.	Folio
Shipping container	Identify the party responsible to pay the freight difference for the shipped item.	Purchase order

Explanation:

Box 1: Folio Identify the available weight and volume offered by the carries to minimize the per unit shipping cost The following table summarizes some core concepts of Landed cost.

*

Folio

A folio is often determined by customs regulations. It can consist of one vendor's goods for one entity/company per shipment. The goods in a folio can be in one container or spread among multiple containers.

*

Shipping container

Shipping containers store purchase order lines. They're a level below the shipment level. They're typically used if costs are apportioned for goods by container, or if receiving is done per container.

Box 2: Purchase order

Note: What is landed freight cost?

Landed cost is the total price of a product or shipment once it has arrived at a buyer's doorstep. In other words, landed cost is the total expense associated with shipping a product. The term typically refers to costs connected with international

shipping like taxes and fees.

To calculate landed cost, add the cost of a product, shipping, customs, risk, and overhead expenses. That sum is the total landed cost.

Landed Cost Formula

Here is the basic formula for landed cost:

Landed cost = unit cost of product + shipping/freight + customs + risk + overhead

Reference:

<https://learn.microsoft.com/en-us/dynamics365/supply-chain/landed-cost/landed-cost-vs-tms>

QUESTION 3

Trey Research is now live on Dynamics 365 Supply Chain Management.

You need to apply the new cost model for the apparel items.

What should you do?

- A. Run Inventory close.
- B. Close all production orders.
- C. Configure Backflush costing.
- D. Run a BOM calculation.

Correct Answer: A

Apparel items will not be upgraded to the new costing method until after the go-live date due to resourcing and implementation limitations from the apparel team. The inventory close process settles issue transactions to receipt transactions, based on the inventory valuation method that is selected in the item's item model group. As part of the settlement process, you can specify that the general ledger should be updated, so that it reflects the adjustments that have been made. However, until inventory close or recalculation has been run, issue transactions are posted at the calculated running average cost price.

After inventory close, you can no longer post in periods that are before the inventory closing date that you set, unless you reverse a completed inventory close process. For example, if inventory close is run for the period that ends on January 31, you can't post transactions that have a date that is earlier than January 31.

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/cost-management/backflush-costing>

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/cost-management/bom-calculations>

QUESTION 4

SIMULATION

You are a functional consultant for a company named Contoso Entertainment System USA (USMF).

You need to copy the bill of materials (BOM) of item number T0012 to a new BOM.

To complete this task, sign in to Dynamics 365 portal.

Correct Answer: See explanation below.

1.

Open item number T0012.

2.

Go to Engineer >BOM>Lines and select the BOM for the item.

3.

Click on Create BOM.

4.

Select the Copy option.

5.

Ensure the Add option is selected to create a new BOM rather than overwrite the existing BOM.

6.

Click OK.

QUESTION 5

HOTSPOT

A company is implementing Dynamics 365 Supply Chain Management.

The top 10 customers receive a special price on ItemA when they buy a minimum of 50. Customers who qualify as the top 10 changes periodically throughout the year. The price of ItemA must remain static throughout the year and set up annually.

You must configure the system to meet the requirements.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Requirement

Configure top 10 customers.

Configuration

▼

Price group
Customer group
Item group

Configure pricing.

▼

Trade agreement (sales)
Sales agreement
Costing version

Correct Answer:

Requirement

Configure top 10 customers.

Configuration

▼

Price group
Customer group
Item group

Configure pricing.

▼

Trade agreement (sales)
Sales agreement
Costing version

Reference: <https://learn.microsoft.com/en-us/dynamics365/supply-chain/pricing-management/customer-product-attribute-groups> <https://learn.microsoft.com/en-us/dynamics365/supply-chain/sales-marketing/sales-agreements>

QUESTION 6

You need to configure the system to support the inventory costing requirement. Which two actions should you perform? Each answer represents a complete solution. NOTE: Each correct selection is worth one point.

- A. one default item group for all items
- B. one item group each for perfume, ceramicware, and other goods
- C. one FIFO item model group and one Standard item model group
- D. one FIFO item group
- E. one financial dimension for each item group

Correct Answer: BC

QUESTION 7

A company plans to implement Dynamics 365 Supply Chain Management shipping manifests. The company wants to use a multiple-level manifest process. You need to ensure that the system is configured for multiple-level manifest processing. What should you validate?

- A. The allow split picks configuration is enabled.
- B. All containers are manifested after the container group is manifested.
- C. All containers are manifested before the container group is manifested.
- D. All container types are set up with all four attributes.

Correct Answer: C

QUESTION 8

HOTSPOT

A company implements Dynamics 365 Supply Chain Management.

You complete the prerequisites to implement the master planning optimization.

You need to configure the planning optimization feature.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Action

Ensure that existing planning jobs fail to process.

- ▼
- Enable the Use planning optimization option when the planning optimization service is connected.
- Enable the Use planning optimization option when the planning optimization service is disconnected.
- Disable the Use planning optimization option when the planning optimization service is connected.
- Disable the Use planning optimization option when the planning optimization service is disconnected.

Use the default planning optimization engine.

- ▼
- Enable the Use planning optimization option when the planning optimization service is connected.
- Enable the Use planning optimization option when the planning optimization service is disconnected.
- Disable the Use planning optimization option when the planning optimization service is connected.
- Disable the Use planning optimization option when the planning optimization service is disconnected.

Correct Answer:

Answer Area

Requirement

Action

Ensure that existing planning jobs fail to process.

▼
Enable the Use planning optimization option when the planning optimization service is connected.
Enable the Use planning optimization option when the planning optimization service is disconnected.
Disable the Use planning optimization option when the planning optimization service is connected.
Disable the Use planning optimization option when the planning optimization service is disconnected.

Use the default planning optimization engine.

▼
Enable the Use planning optimization option when the planning optimization service is connected.
Enable the Use planning optimization option when the planning optimization service is disconnected.
Disable the Use planning optimization option when the planning optimization service is connected.
Disable the Use planning optimization option when the planning optimization service is disconnected.

QUESTION 9

DRAG DROP

A manufacturing company uses Dynamics 365 Supply Chain Management.

You must review the safety stock level for raw materials.

You need to calculate the minimum coverage proposals based on standard deviation.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

Select the **Service level** value.

Create safety stock journal lines by including the current month's transactions.
Select the **Standard deviation** option.

Create safety stock journal lines by excluding the current month's transactions.
Select the **Standard deviation** option.

Select the **Use service level** option.

Select the **Use average issue during lead time** option.

Post the safety stock journal.

Set the **Lead time margin** value.

Correct Answer:

Actions

Select the **Service level** value.

Create safety stock journal lines by excluding the current month's transactions. Select the **Standard deviation** option.

Select the **Use average issue during lead time** option.

Set the **Lead time margin** value.

Answer Area

Create safety stock journal lines by including the current month's transactions. Select the **Standard deviation** option.

Select the **Use service level** option.

Post the safety stock journal.

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/master-planning/safety-stock-journal>

QUESTION 10

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review/ screen.

You are the purchasing manager at a manufacturing company that makes audio equipment-

You sign an agreement with a vendor to purchase 5,000 speaker cables. Item C0001, at a discounted rate of \$3,00 per cable. This agreement expires in exactly one year.

You need to set up pricing information and track the fulfillment of the agreement.

Solution: Create a purchase agreement for the vendor that specifies a product quantity commitment. Include the quantity, the price, and the expiration date.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: A

References: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/procurement/purchase-agreements>

QUESTION 11

A company uses Dynamics 365 Supply Chain Management.

The company does not use variants and sells items only out of a single legal entity.

You need to configure the system to avoid unnecessary product creation overhead.

What should you do?

- A. Create a released product master
- B. Create a personal template for unreleased products
- C. Create a released product
- D. Create an unreleased product and release the product
- E. Create a shared template for unreleased products

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/pim/product-information>

QUESTION 12

HOTSPOT

The company plans to implement master planning.

You need to configure the master planning solution to perform master planning runs in the middle of each day instead of at the end of each day.

Which solution component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

Solution component

Enable the master planning feature.

Feature
Configuration key
Lifecycle Services Add-in
Planning Optimization parameters

Connect the master planning service to the environment.

Azure Virtual Machine
Power Automate flow
Lifecycle Services Add-in
Dynamics 365 application (AOT) deployable package

Connect to the master planning service.

Dynamics 365
Microsoft Azure
Power Automate
Lifecycle Services

Correct Answer:

Answer Area

Requirement

Solution component

Enable the master planning feature.

Feature
Configuration key
Lifecycle Services Add-in
Planning Optimization parameters

Connect the master planning service to the environment.

Azure Virtual Machine
Power Automate flow
Lifecycle Services Add-in

Connect to the master planning service.

Dynamics 365
Microsoft Azure
Power Automate
Lifecycle Services

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/master-planning/planning-optimization/get-started>

QUESTION 13

A company uses the built-in master planning engine but plans to use Planning Optimization instead. You enable auto-firming. You need to ensure that planned orders are firming within the current month. What should you do?

- A. Set the firming time fence to one month plus issue margin.
- B. Set the firming time fence to one month plus receipt margin
- C. Set the firming time fence to one month plus lead time if the lead time is greater than one week.
- D. Set the firming time fence to one month
- E. Set the firming time fence to one week plus lead time if the lead time is less than one week.

Correct Answer: D

QUESTION 14

A company performs internal inspections of a specific product before releasing the products. This task adds two days for

product handling once the product is in the warehouse.

This process leads to delays in shipping. You need to resolve the issues.

What should you change?

- A. Reorder margin
- B. Minimum order quantity
- C. Receipt margin
- D. Maximum order quantity
- E. Issue margin

Correct Answer: D

<https://docs.microsoft.com/en-us/dynamics365/supply-chain/master-planning/planning-optimization/safety-margins>

QUESTION 15

DRAG DROP

A bottle manufacturing company uses Dynamics 365 Supply Chain Management to manage operations.

The company plans to install machines that accept empty bottles for a cash refund or donation at several recycling locations.

You need to complete the setup for installation of the assets.

What should you configure for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or

scroll to view content.

NOTE; Each correct selection is worth one point.

Select and Place:

Features

Asset

Functional location types

Asset type defaults

Answer Area

Requirement

Ensure that only bottle machines are installed at the recycling locations.

Configure the assets lifecycle model that is associated to the new machines.

Correct Answer:

Features

Functional location types

Answer Area

Requirement

Ensure that only bottle machines are installed at the recycling locations.

Asset type defaults

Configure the assets lifecycle model that is associated to the new machines.
