QUESTION 1

You are responsible for your company Microsoft 365 subscription.

The company introduces a security policy that requires DLP incident reports to be automatically sent to legal department users.

You are required to configure the reports to be delivered via email as often you can.

Which of the following is the option you should use?

A. Annually

B. Monthly

C. Weekly

D. Quarterly

Correct Answer: C

QUESTION 2

Your company has an on-premises Microsoft Exchange Server 2013 organization.

The company has 100 users.

The company purchases Microsoft 365 and plans to move its entire infrastructure to the cloud.

The company does NOT plan to sync the on-premises Active Directory domain to Microsoft Azure Active Directory (Azure AD).

You need to recommend which type of migration to use to move all email messages, contacts, and calendar items to Exchange Online.

What should you recommend?

A. cutover migration

B. IMAP migration

C. remote move migration

D. staged migration

Correct Answer: A

A cutover migration and an IMAP migration do not require the company to sync the on-premises Active Directory domain to Microsoft Azure Active Directory (Azure AD). Only a cutover migration meets the requirements in this question. With a cutover migration, user accounts will need to be created in Azure Active Directory for each user. The mailboxes are all migrated in one go and MX records configured to redirect email to Microsoft 365.

Incorrect Answers:

B: Contacts, calendar items and tasks cannot be migrated with an IMAP migration.

C: A remote move migration requires a hybrid exchange configuration which requires that the on-premises Active Directory domain is synced to Microsoft Azure Active Directory (Azure AD).

D: A staged migration is recommended when your source email system is Microsoft Exchange Server 2003 or Microsoft Exchange Server 2007. You can\\'t use a staged migration to migrate Exchange 2013 or Exchange 2010 mailboxes to Office 365. A staged migration also requires that the on-premises Active Directory domain is synced to Microsoft Azure Active Directory (Azure AD).

Reference: https://docs.microsoft.com/en-us/exchange/mailbox-migration/cutover-migration-to-office-365

https://docs.microsoft.com/en-us/exchange/mailbox-migration/what-to-know-about-a-staged-migration

QUESTION 3

You have a Microsoft 365 subscription that contains a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. The tenant includes a user named User1.

You enable Azure AD Identity Protection.

You need to ensure that User1 can review the list in Azure AD Identity Protection of users flagged for risk. The solution must use the principle of least privilege.

To which role should you add User1?

A. Compliance administrator

B. Global administrator

C. Owner

D. Security administrator

Correct Answer: D

Either one of the following three roles can review the list in Azure AD Identity Protection of users flagged for risk:

1.

Security Administrator

2.

Global Administrator

3.

Security Reader

Using the principle of least privilege, we should add User1 to the Security Administrator role.

Note:

There are several versions of this question in the exam. The question has three possible correct answers:

1.

Security Reader

2.

Security Administrator

3.

Global Administrator

Other incorrect answer options you may see on the exam include the following:

1.

Service Administrator.

2.

Reports Reader

3.

User Administrator

Reference: https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-risky-sign-ins
https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-risky-sign-ins

QUESTION 4

You need to ensure that users can initiate private conversations with HRBot. The solution must meet the technical requirements for HRApp. How should you configure the HRApp manifest?

A. In the tots section, change the scopes collection value from teams to personal.

B. In the dots section, add personal to the scopes collection.

C. In the staticTaes section, add perioral to the scopes collection.

D. In the conf igur»bl«Tabs section, add groupchat to the scopes collection.

Correct Answer: D

QUESTION 5

DRAG DROP

You have a pilot app named App1 deployed to a Microsoft Power Platform production environment named Prod1.

You need to reset the Prod1 environment in preparation for the production deployment of App1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions   **Answer Area**

Reset the Prod1 environment

Convert the Prod1 environment
to a sandbox environment.

Convert the Prod1 environment
to a production environment.

Sign in to the Power Platform
admin center.

Sign in to the
make.powerapps.com maker
portal.

Correct Answer:

Actions

- Reset the Prod1 environment
- Convert the Prod1 environment to a sandbox environment.
- Convert the Prod1 environment to a production environment.
- Sign in to the Power Platform admin center.
- Sign in to the make.powerapps.com maker portal.

Answer Area

- Sign in to the Power Platform admin center.
- Convert the Prod1 environment to a sandbox environment.
- Reset the Prod1 environment
- Convert the Prod1 environment to a production environment.

https://docs.microsoft.com/en-us/power-platform/admin/reset-environment

QUESTION 6

You are developing a mobile application that will display the current signed-in user\'s display name and the application settings. The application settings are stored as a Microsoft Graph extension of the user profile.

Users of the application have intermittent network connectivity

You need to retrieve the least amount of data by using a single REST request. The solution must minimize network traffic.

Which URI should you use to retrieve the data?

A. https://graph.microsoft.com/v1.0/me?Select"dlsplayName,idi$expand-extensions

B. https://graph.microsoft.com/v1.0/me

C. https://graph.microsoft.com/v1.0/me?select=displayName,userType$expand=extensions

D. https://graph.microsoft.com/v1.0/me?Expend-extensions

Correct Answer: B

QUESTION 7

Your network contains two Active Directory forests. Each forest contains two domains.

You plan to configure Hybrid Azure AD join for the computers.

You create a Microsoft Azure Active Directory (Azure AD) tenant.

You need to ensure that the computers can discover the Azure AD tenant.

What should you create?

A. a new computer account for each computer

B. a new service connection point (SCP) for each domain

C. a new trust relationship for each forest

D. a new service connection point (SCP) for each forest

Correct Answer: D

Your devices use a service connection point (SCP) object during the registration to discover Azure AD tenant information. In your on-premises Active Directory instance, the SCP object for the hybrid Azure AD joined devices must exist in the configuration naming context partition of the computer\\'s forest. There is only one configuration naming context per forest. In a multi-forest Active Directory configuration, the service connection point must exist in all forests that contain domain-joined computers.

Reference: https://docs.microsoft.com/en-us/azure/active-directory/devices/hybrid-azuread-join-manual

QUESTION 8

You plan to develop a SharePoint Framework (SPfx) web part by using the ReactJS framework.

You need to ensure that all the web part fields and controls adopt the theme of the site when you deploy the web part. The solution must minimize development effort

What should you include in the solution?

A. Material-UI

B. FluentUl

C. Microsoft Fluid Framework

D. HTML5 and CSS

Correct Answer: B

QUESTION 9

HOTSPOT

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.

You implement directory synchronization for all 10,000 users in the organization.
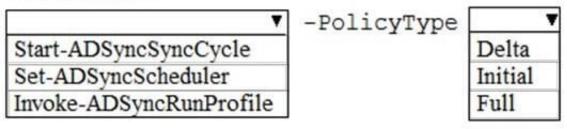

You automate the creation of 100 new user accounts.

You need to ensure that the new user accounts synchronize to Azure AD as quickly as possible.

Which command should you run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Start-ADSyncSyncCycle	
Set-ADSyncScheduler	-PolicyType
Invoke-ADSyncRunProfile	

| Delta |
| Initial |
| Full |

Correct Answer:

Answer Area

Start-ADSyncSyncCycle	
Set-ADSyncScheduler	-PolicyType
Invoke-ADSyncRunProfile	

| Delta |
| Initial |
| Full |

Azure AD Connect synchronizes Active Directory to Azure Active Directory on a schedule. The minimum time between synchronizations is 30 minutes.

If you want to synchronize changes to Active Directory without waiting for the next sync cycle, you can initiate a sync by using the Start-AdSyncSyncCycle. The Delta option synchronizes changes to Active Directory made since the last sync.

The Full option synchronizes all Active Directory objects including those that have not changed.

QUESTION 10

SIMULATION

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality

(e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn\\'t matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are

able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You may now click next to proceed to the lab.

Lab information

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and click on the username below.

To enter your password, place your cursor in the Enter password box and click on the password below.

Microsoft 365 Username:admin@LODSe426243.onmicrosoft.com

Microsoft 365 Password: 3andYWyjse-6-d

If the Microsoft 365 portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.

You need to ensure that all mobile devices that connect to Microsoft Exchange Online meet the following requirements:

A password must be used to access the devices. Data on the devices must be encrypted.

A. See explanation below.

Correct Answer: A

You need to modify the default mobile device mailbox policy.

1.

 Go to the Exchange Admin Center.

2.

Select 'mobile' then select 'mobile device mailbox policies'.

3.

Click the 'Create a policy' button.

4.

Select the Default policy and click the edit icon (pencil icon).

5.

Select the 'Security' link to open the security settings.

6.

Tick the 'Require a password' checkbox.

7.

Tick the 'Require encryption on device' checkbox.

8.

Click the Save button to save the changes. References:

https://docs.microsoft.com/en-us/exchange/clients-and-mobile-in-exchange-online/exchange-activesync/mobile-device-mailbox-policies

QUESTION 11

You have a Microsoft 365 subscription.

A new corporate security policy states that you must automatically send DLP incident reports to the users in the legal department.

You need to schedule the email delivery of the reports. The solution must ensure that the reports are sent as frequently as possible.

How frequently can you schedule the delivery of the reports?

A. hourly

B. monthly

C. weekly

D. daily

Correct Answer: C

From the Dashboard in the Security and Compliance center, you can view various reports including the DLP Incidents report. From there you can configure a schedule to email the reports. In the schedule configuration, there are two choices for the frequency: Weekly or Monthly. Therefore, to ensure that the reports are sent as frequently as possible, you need to select Weekly.

Reference: https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/create-a-schedule-for-a-report
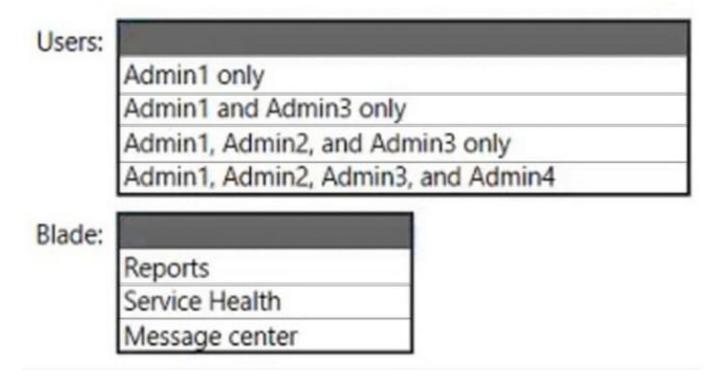

QUESTION 12

HOTSPOT

You need to ensure that the Microsoft 365 incidents and advisories are reviewed monthly.

Which users can review the incidents and advisories, and which blade should the users use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Users:

Admin1 only
Admin1 and Admin3 only
Admin1, Admin2, and Admin3 only
Admin1, Admin2, Admin3, and Admin4

Blade:

Reports
Service Health
Message center

Correct Answer:

Answer Area

Users:

Admin1 only
Admin1 and Admin3 only
Admin1, Admin2, and Admin3 only
Admin1, Admin2, Admin3, and Admin4

Blade:

Reports
Service Health
Message center

QUESTION 13

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Role
User1	Reports Reader
User2	Exchange Administrator
User3	User Experience Success Manager

Which users can review the Adoption Score in the Microsoft 365 admin center?

A. User1 only

B. User2 only

C. User1 and User2 only

D. User1 and User3 only

E. User1, User2, and User3

Correct Answer: E

Explanation:

To view the entire Adoption Score, you need be one of the following admin roles:

Global Administrator

Exchange Administrator (User2)

SharePoint Administrator

Skype for Business Administrator

Teams Service Administrator

Teams Communications Administrator

Global Reader

Reports Reader (User1)

Usage Summary Reports Reader

User Experience Success Manager (User3)

Organizational Messages Writer Role

The following information is for technical support purposes only:

Lab Instance: 10887751

You need to modify Christie Cline to meet the following requirements:

Christie Cline must be able to view the service dashboard and the Microsoft Office 365 Message center.

Christie Cline must be able to create Microsoft support requests.

The solution must use the principle of least privilege.

A. See explanation below.

Correct Answer: A

You need to assign Christie the 'Service Support Admin' role.

1.

 In the Microsoft 365 Admin Center, click 'Roles'.

2.

 Scroll down to the Service Support Admin role and click on the role name.

3.

 Click the 'Assigned Admins' link.

4.

 Click the 'Add' button.

5.

 Start typing the name Christie then select her account when it appears.

6.

Click Save.

QUESTION 15

HOTSPOT

You have a Microsoft 365 E5 subscription.

Currently, users cannot install Microsoft 365 Apps for enterprise from the Microsoft Office portal.

You need to perform the following tasks:

1.

Enable the installation of Microsoft 365 Apps for enterprise from the Office portal.

2.

Ensure that the users can auto-claim Microsoft Teams licenses.

Which two Org settings should you configure in the Microsoft 365 admin center? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer area

	Microsoft 365 Groups

	Modern authentication

	Multi-factor authentication

	News

	Office installation options

	Office on the web

	Office Scripts

	Productivity Score

	Reports

	SharePoint

	Sway

	User consent to apps

	User owned apps and services

	Viva Learning

	What's new in Office

	Whiteboard

Answer area

| | Microsoft 365 Groups |
| Modern authentication |
| Multi-factor authentication |
| News |
| **Office installation options** |
| Office on the web |
| Office Scripts |
| Productivity Score |
| Reports |
| SharePoint |
| Sway |
| User consent to apps |
| **User owned apps and services** |
| Viva Learning |
| What's new in Office |
| Whiteboard |

Box 1: Office installation options

Enable the installation of Microsoft 365 Apps for enterprise from the Office portal.

Manage Office installation options in the Microsoft 365 admin center

As a Microsoft 365 admin, you can choose to do the following tasks on the Office installation options page in the Microsoft 365 admin center:

Choose how often to get feature updates for Office

Manage which version of Office is installed, including

Roll back to a previous version

Skip an upcoming version

Choose whether users can install Office on their own devices

Box 2: User owned apps and services

Ensure that the users can auto-claim Microsoft Teams licenses.

Change the assigning apps and services

Each product has a collection of apps and services associated with it. For each product in your auto-claim policy, you can specify which apps and services to include when a user is automatically assigned a license to that product.

1.

In the admin center, go to the Billing > Licenses page, then select the Auto-claim policy tab.

2.

Select the policy that you want to edit.

3.

In the details pane, under Apps and services, select Edit.

4.

In the Apps and services pane, from the Product drop-down, select a single product, or select All products.

5.

Check or clear the boxes for apps and services that you want users to have or not have access to.

6.

When you\'re finished, select Save, then close the details pane.
