- D. Disk shelves and termination switches

Correct Answer: B

QUESTION 10

Which one of the following statements is true of storage appliance SnapVault backup?

- A. The volume is the basic unit of SnapVault backup.
- B. The file is the basic unit for SnapVault backup.
- C. The directory is the basic unit for SnapVault backup.
- D. The tree is the basic unit for SnapVault backup.

Correct Answer: D

QUESTION 11

When you are setting up SnapMirror, which one of the following is not a replication pre-requisite?

- A. SnapMirror must be licensed for each storage appliance.
- B. The source volume must be offline.

- C. If you are replicating a volume, you must create a restricted volume to be used as the SnapMirror destination volume.
- D. The capacity of the SnapMirror destination must be greater than or equal to the capacity of the source.

Correct Answer: B

QUESTION 12

Five minutes ago, you performed a single file SnapRestore on a large NFS file. 40% of your NFS users are now complaining about getting "stale file handles" for the file. Which one of the following is the most likely cause of this problem, and the best procedure to correct it?

- A. These users are on a different subnet from the others. Start troubleshooting by checking their subnet.
- B. After a single file SnapRestore, NFS users have to reboot their systems. Have them reboot their systems.
- C. This might be due to an NFS storage appliance and client version mis-match. Check to see that these users have the same version of the NFS client that existed at the time the snapshot was taken.
- D. NFS users who try to access a reverted file without first reopening it might get a "stale file handle" error message. Have the users try to reopen the file and see if the problem is resolved.

Correct Answer: D

QUESTION 13

Which one of the following keywords alone can be used to convert an asynchronous mirror to be synchronous?

- A. cksum
- B. src_con
- C. sync
- D. outstanding

Correct Answer: C
