QUESTION 1

You are asked to administer your NetApp Cloud Central account settings to manage users, service accounts, workspaces, connectors, and subscriptions.

In this scenario, which REST API would you access?

- A. Cloud Manager API
- B. AWS API
- C. Tenancy API
- D. ONTAP API

Correct Answer: B

QUESTION 2

A customer wants their main data set to be stored in their primary location while providing a writable, persistent cache in another location closer to the consumer.

Which two solutions will satisfy the customer's requirements? (Choose two.)

- A. Deploy Cloud Volumes ONTAP with FlexCache in their primary location and ONTAP Select at the consumer site.
- B. Deploy an FAS8300 with FlashCache in their primary location and export the share to the VPN IPspace.
- C. Deploy Cloud Volumes ONTAP in their primary location and ONTAP Select with FlexCache at the consumer site.
- D. Deploy Cloud Volumes ONTAP in their primary location and Cloud Volumes ONTAP with FlexCache on a public cloud region nearest to the consumer.

Correct Answer: AC

QUESTION 3

You are researching different automation frameworks. One of the main features that you are seeking is the ability to provide an end state of what a particular environment should look like versus needing to define each step that is required to get to the end state.

In this scenario, which keyword should you be looking for as you research various automation frameworks?

- A. RESTful
- B. declarative
- C. interrogative
- D. imperative

Correct Answer: D

QUESTION 4

You want to manage your applications using NetApp Astra Control within your Azure account. Which two actions must be completed before accomplishing this task? (Choose two.)

- A. Manually provision Azure Blob storage
- B. Delegate a subnet to Azure NetApp Files.
- C. Set up a capacity pool.
- D. Export your Azure AD Administrator key and import it into Astra Control.

Correct Answer: BD

QUESTION 5

You are using REST APIs to deploy and manage storage that is provided by NetApp Cloud Volumes ONTAP in Microsoft Azure. You are a federated user, and you want to communicate with an authenticated endpoint. In this scenario, how should you acquire the JWT access token?

- A. Use the API key generator.
- B. Use a JWT access token generator.
- C. Use the refresh token generator.
- D. Use an e-mail address and password

Correct Answer: A

QUESTION 6

A customer was running a traditional application with the data being provided by an NetApp ONTAP NFSv3 export. The customer is now migrating that same application to run with a container in a Kubernetes environment using NetApp Trident.

In this scenario, how would the customer ensure that the new container-based application has access to the same data?

- A. Use the rsync command to copy the data to a worker node in the Kubernetes cluster and allow the kubelet to auto-discover the storage for the container.
- B. Import the volume using the tridentctl command and provide the corresponding persistent volume claim YAML.
- C. Define a backend YAML in Trident and use the kubectl command to create the backend in the Trident namespace.
- D. Define the connection information for the NFSv3 export in the storage class object and then reference the storage class in the persistent volume claim.

Correct Answer: D

QUESTION 7

You are responsible for setting up a process to handle version control for developers\' source code. You need to decide which tools you will use. In this scenario, which two tools would satisfy the requirement? (Choose two.)

- A. Docker Hub
- B. git
- C. Jfrog
- D. subversion

Correct Answer: AD

QUESTION 8

Click the Exhibit button.

```
resource "aws_iam_instance_profile" "instance_profile" {
  name = "connector_instance_profile"
  role = aws_iam_role.role.name
}

resource "netapp-cloudmanager_connector_aws" "cl-occm-aws" {
  name = "TF-ConnectorAWS"
  region = "us-east-1"
  key_name = "AWSKey"
  company = "NetApp"
  instance_type = "t3.xlarge"
  subnet_id = aws_subnet.PrivateSubnet.id
  security_group_id = aws_security_group.SGPrivateRedHat.id
  iam_instance_profile_name = "connector_instance_profile"
  account_id = "account-xxxxxxxxxx"
}
```

Referring to the exhibit, which two source resources? (Choose two.)

- A. source = "hashicorp/terraform"
- B. source = nhashicorp/aws"
- C. source = "terraform/terraform"
- D. source = "NetApp/netapp-cloudman

Correct Answer: AC

QUESTION 9

You want to add your NetApp StorageGRID embedded Prometheus instance as a data source to Grafana. What must be done to accomplish this task?

- A. Unblock port 9090 on the StorageGRID primary admin node.
- B. Deploy a gateway node in StorageGRID.
- C. Reboot the StorageGRID primary admin
- D. Create a dashboard for StorageGRID in Grafana.

Correct Answer: C

QUESTION 10

You configured your NetApp Cloud Volumes ONTAP instance to protect your data against ransomware. A previously unknown ransomware file extension infects your data.

In this scenario, which two NetApp technologies will provide a writable volume of the dataset before the ransomware attack? (Choose two.)

- A. FPolicy
- B. SnapRestore
- C. FlexCache
- D. FlexClone

Correct Answer: BC
