QUESTION 1

For what does an interaction operator define semantics?

- A. a particular message
- B. a particular interaction
- C. a particular combined fragment
- D. a particular interaction fragment

Correct Answer: C

QUESTION 2

In the exhibit, how many of the arrows must provide values for the outgoing arrow to be given a value?

- A. none
- B. one
- C. two
- D. three

Correct Answer: D

QUESTION 3

What objects receive a signal sent by a BroadcastSignalAction?

- A. all objects
- B. objects are determined by semantic variation
- C. all objects that have a reception for the signal
- D. objects that are on the same node as the actions

E. objects that are instantiated from classes in the package of the action

Correct Answer: B

QUESTION 4

What types of features may a component possess?

- A. attributes and operations
- B. attributes, but not operations
- C. operations, but not attributes
- D. neither attributes nor operations

Correct Answer: A

QUESTION 5

What statement is true if a port delegates to multiple ports on subordinate components?

- A. multiple delegation is not allowed
- B. subordinate ports must be type compatible with the delegating port
- C. subordinate ports must collectively offer the delegated functionality of the delegating port
- D. at execution time, signals will be delivered from the subordinate ports to the delegating port

Correct Answer: C

QUESTION 6

In a state machine, what is true for a "do" activity of a state?

- A. can only appear in a composite state
- B. is equivalent to an entry action of a state
- C. starts executing when the state is entered
- D. executes repeatedly as long as the state is active
- E. specifies a condition that must always be true when the state is active

Correct Answer: C

QUESTION 7

What does a state list represent?

- A. notational shorthand for a set of states
- B. list of the substates of a composite state
- C. set of states that share a single outgoing transition
- D. set of states that share the same entry and exit actions

Correct Answer: A

QUESTION 8

What symbol depicts a SendSignalAction?

A.

B.

C.

D.

E.

- A. Option A
- B. Option B
- C. Option C
- D. Option D
- E. Option E

Correct Answer: AC

QUESTION 9

What interface restrictions does a port have?

- A. multiple required interfaces or multiple provided interfaces
- B. multiple provided interfaces and multiple required interfaces
- C. equal numbers of provided interfaces and required interfaces
- D. exactly one provided interface or exactly one required interface
- E. exactly one required interface and exactly one provided interface

Correct Answer: B

QUESTION 10

To what does an internal structure of a class refer?

- A. the inheritance structure of that class
- B. the set of nested classifiers of that class
- C. the set of structural features of that class
- D. class and associations owned by that class
- E. the decomposition of that class in terms of interconnected parts

Correct Answer: E

QUESTION 11

A component may legally participate in which relationship(s)?

- A. dependencies
- B. associations and generalizations
- C. dependencies and generalizations
- D. dependencies, associations, and generalizations

Correct Answer: D

QUESTION 12

What is the meaning of a required extension?

- A. The extension must be applied at least once in a model.

- B. This extension has a higher priority than the other defined in the same profile.
- C. An instance of the extending stereotype must never be linked to an instance of the extended metaclass.
- D. An instance of the extending stereotype must always be linked to an instance of the extended metaclass.

Correct Answer: D

QUESTION 13

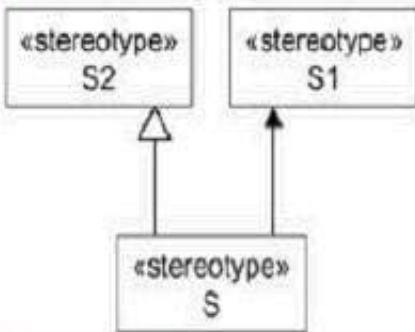

Which is a correct representation of multiple extension and generalization/specialization? (Choose two)

A.

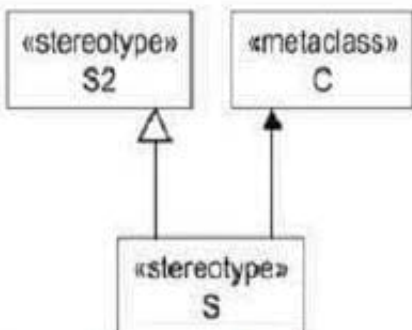

S extends S1 and S2

B.

S extends S1 and generalizes S2

C.

S specializes S1 and extends C

D.

S specializes S1 and S2

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: CD

QUESTION 14

How many arrows can connect to a partition?

A. none

B. one

C. two

D. any number

Correct Answer: A

QUESTION 15

What is NOT a purpose of a port owned by a classifier?

A. serves as an end point for connectors

B. specifies an association to the classifier

C. hides the internals of that classifier from other classifiers

D. provides a distinct point of interaction between the classifier and its environment

Correct Answer: B
