#### QUESTION 1

While testing a form, you need to verify the contents of a data page in memory. Which tool do you use to view the current contents of the data page?

- A. The Clipboard tool
- B. Case Designer
- C. The Data Explorer
- D. Live UI

Correct Answer: A

---

#### QUESTION 2

Which two use cases are supported by configuring a mobile channel in App Studio? (Choose Two)

- A. Grant access to the application for a specific user.
- B. Set the width of an application icon to 180x180 pixels.
- C. Configure a left swipe behavior to open a message.
- D. Lock the application after 20 minutes of inactivity.

Correct Answer: AD

---

#### QUESTION 3

In processing a parent case P-I, two child cases C-1 and C-2 are created. Which of the following statements is correct about the processing of P-I, C-1, and C-2?

- A. P-I must be resolved before either C-1 or C-2 can be resolved.
- B. Either C-1 or C-2 must be resolved before P-I can be resolved.
- C. C-1 must be resolved before C-2 can be resolved.
- D. Both C-1 and C-2 must be resolved before P-I can be resolved.

Correct Answer: D

---

#### QUESTION 4

A restaurant has a case type that allows customers to book the dining room for events. Customers provide basic information including party size and indicate whether they want the restaurant to cater the event.

If catering is not required, customers are given a rental rate quote.

If customers indicate that they want the restaurant to cater the event, they must provide menu preference and schedule and appointment to do menu testing before they are given a quote.

Which two options do you use to configure the case type to achieve the requested behavior? (Choose Two.)

- A. Create a check box for customers to indicate whether they want the restaurant to cater the event. Add a decision shape that evaluates whether the customer checks the box.
- B. Create a check box for customers to indicate whether they want the restaurant to cater the event. Configure the menu preferences and appointment date fields with a visibility condition.
- C. Create a process for providing menu preference and scheduling the menu tasting appointment. Create a parallel process for providing the customer with the rental rate quote.
- D. Create a process for customers to indicate menu preference and schedule the menu tasting appointment. Add the process as a case-wide optional action.

Correct Answer: AB

#### QUESTION 5

A customer wants to copy the contents of a previous order to their current order. What rule type do you use to copy the order contents?

- A. Data page
- B. Data transform
- C. Declare expression
- D. Function

Correct Answer: C

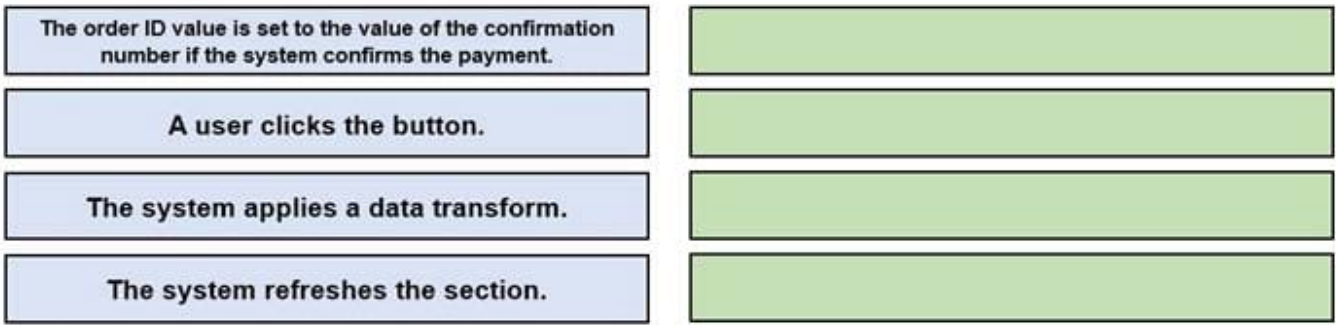

#### QUESTION 6

DRAG DROP

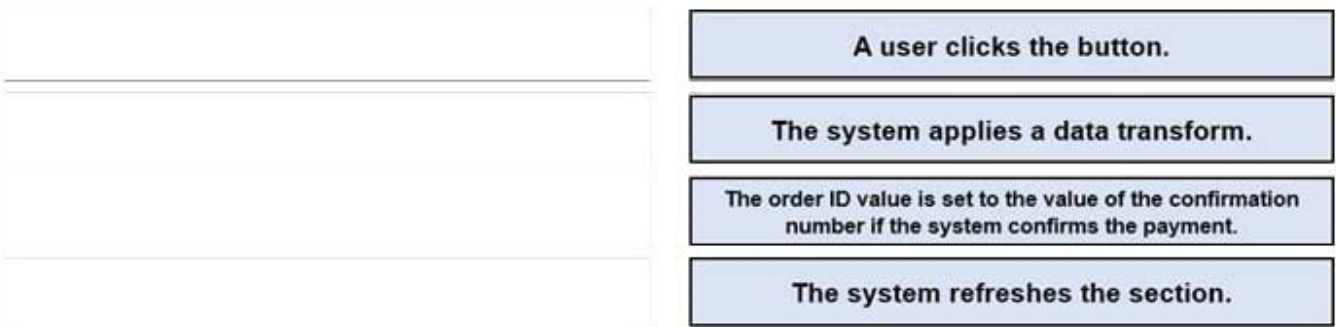

A developer configures a button with the action set as shown in the following image.

Select and Place:

Correct Answer:

### QUESTION 7

A manager requests a report that contains the following columns: Create Date, Case ID, Create Operator, and World Status. You must sort the cases so the case with the most recent create date appears at the top of the list and descends in order.

How do you design the report definition to support this requirement?

- A. Select Lowest to Highest sort type for Create Date.
- B. Add a filter condition where Create Date is greater than the current date.
- C. Select Highest to Lowest sort type for Create Date.
- D. Make the Create Date the first column in the report.

Correct Answer: C

### QUESTION 8

Users must provide values to certain fields before submitting a job application form. Which configuration adds asterisks to indicate the mandatory fields on the form?

- A. Use an Edit Validate rule to verify if each of the mandatory properties has a value.
- B. Configure the mandatory fields as Always Required on the form at runtime.

- C. Use a Validate rule to verify the mandatory fields have a value.
- D. Configure a Disable when condition on the mandatory fields at runtime.

Correct Answer: B

---

#### QUESTION 9

You create an application for employees to submit timesheets. Employees enter work, vacation, and sick time for a particular week. On the entry form, employees see a summary of the total hours entered. After the employee submits the timesheet, the application displays remaining vacation and sick time for the employee. You configure the user view that displays remaining vacation and sick time. The balance calculates by subtracting the vacation time and sick time for the week from the current vacation and sick time balances.

Which configuration option is used to summarize the remaining vacation and sick time?

- A. Use a When rule. When the application references the remaining vacation and sick time, each value calculates.
- B. Use declarative processing. Whenever the vacation time or sick time entries change, the remaining vacation and sick time calculate.
- C. Use pyDefault and pySetFieldDefaults. When the process invokes the data transforms, the remaining vacation and sick time calculate.
- D. Use procedural processing with a data transform. Remaining vacation and sick time calculate after the user submits a timesheet.

Correct Answer: B

---

#### QUESTION 10

A hotel booking application allows customers to change rooms after making a reservation. Each room's status in each hotel is stored on a data page sourced from an external database table.

Which two configuration options, when applied in combination, do you use to update the database table when a customer changes rooms? (Choose Two)

- A. A savable data page that contains the room information
- B. A when rule to trigger the database update
- C. A data transform to copy updates to the data page
- D. An editable data page that contains the room information

Correct Answer: AC

---

#### QUESTION 11

An order fulfillment case type allows a customer to update user profile information during the order placement stage. The user profile consists of the following three pages:

Account ID and password Customer contact information A list of open orders with the status of each order. How do you configure the case type to allow customers to update any of the user profile pages at any time during case processing?

- A. Add an optional process to the case workflow.
- B. Add a button for each profile page to each assignment.
- C. Add an alternate stage to the case life cycle.
- D. Add a set of optional actions to the case workflow

Correct Answer: D

---

#### QUESTION 12

Which two options can you configure for a mobile app channel? (Choose Two)

- A. Define security behavior for a mobile app such as biometric identifiers.
- B. Manage administrative functions such as access to log files.
- C. Define the UI behavior for each view in a case type when the case is displayed on a mobile device.
- D. Design how UI elements render across different mobile devices.

Correct Answer: AC

---

#### QUESTION 13

As part of the case design, after someone completes a purchase, the application should send a confirmation email. How do you design the case life cycle to send the email?

- A. As part of the stage configuration
- B. As an alternate stage
- C. As part of the case configuration
- D. As a separate process step

Correct Answer: A

---

#### QUESTION 14

You are building a new booking application in pega platform with a case type that displays a customer's various accounts and allows them to make banking transactions. The transaction data object allows customers to dispute a transaction. The system provides a drop-down list of reasons for the dispute, which are collected along with the transaction ID. According to pega best practices, which option do you use to source the transaction data object?

- A. External system of record
- B. A data page
- C. Pega platform system of record
- D. No system of record

Correct Answer: C

### QUESTION 15

Customer on a hotel booking application can add additional amenities to their reservation. The application displays a view with the available amenities and .. To reduce scrolling, you want to organize content so that amenity details display when the amenity is selected in a drop down menu.

<b>Spa Amenities</b>	<b>Monday to Thursday prices</b>	<b>Weekend &amp; Holiday prices</b>
Custom Massage 60 / 95 Minutes	\$210/250	\$230/275
Aromatherapy 80 / 95 Minutes	\$210/250	\$230/275
Balancing Hot Stone 80 / 95 Minutes	\$210/250	\$230/275
Restorative Himalayan Salt Stone 80 / 95 Minutes	\$210/250	\$230/275
In-Room Massage 60 / 90 Minutes	\$250/375	\$275/415

How do you configure the user interface improve access to the content and achieve the business requirement described?

- A. Configure a layout group to separate each amenity into individual panels and set the layout to a menu format.
- B. Configure a visible when condition on each field to allow access when the associated amenity is selected on the drop-down control.
- C. Configure a repeating dynamic layout with an embedded section for each amenity and set the layout format to grouped.
- D. Configure a visible when condition on each field when the associated amenity is selected.

Correct Answer: B
