100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Palo Alto Networks Official Exam Center

- ⚙️ **Instant Download** After Purchase
- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

In which step of the Five-Step Methodology for implementing the Zero Trust model is the Kipling Method relevant?

- A. Step 3: Architect a Zero Trust network
- B. Step 5: Monitor and maintain the network
- C. Step 4: Create the Zero Trust policy
- D. Step 2: Map the transaction flows

Correct Answer: C

QUESTION 2

What is a benefit of the Palo Alto Networks secure access service edge (SASE) solution's ability to provide insight into SD-WAN and network security metrics while highlighting critical issues across all managed tenants?

- A. It rearchitects the way signatures are delivered, performing updates and streaming them to the firewall within seconds after the analysis is done.
- B. It helps protect inbound, outbound, and east-west traffic between container workload types in Kubernetes environments without slowing development speed.
- C. It simplifies workflows and instantly automates common use cases with hundreds of prebuilt playbooks.
- D. It helps managed service providers (MSPs) accelerate troubleshooting and meet service level agreements (SLAs) for all their customers.

Correct Answer: D

QUESTION 3

What is a disadvantage of proxy secure access service edge (SASE) when compared to an inline SASE solution?

- A. Proxies force policy actions to be treated as business decisions instead of compromises due to technical limitations.
- B. Teams added additional tools to web proxies that promised to solve point problems, resulting in a fragmented and ineffective security architecture.
- C. Proxy solutions require an unprecedented level of interconnectivity.
- D. Exclusive use of web proxies leads to significant blind spots in traffic and an inability to identify applications and threats on non-standard ports or across multiple protocols.

Correct Answer: D

QUESTION 4

Which component of the secure access service edge (SASE) solution provides complete session protection, regardless of whether a user is on or off the corporate network?

- A. Zero Trust
- B. threat prevention
- C. single-pass architecture (SPA)
- D. DNS Security

Correct Answer: A

QUESTION 5

How does the secure access service edge (SASE) security model provide cost savings to organizations?

- A. The single platform reduces costs compared to buying and managing multiple point products.
- B. The compact size of the components involved reduces overhead costs, as less physical space is needed.
- C. The content inspection integration allows third-party assessment, which reduces the cost of contract services.
- D. The increased complexity of the model over previous products reduces IT team staffing costs.

Correct Answer: C

QUESTION 6

How does the Palo Alto Networks secure access service edge (SASE) solution enable Zero Trust in a customer environment?

- A. It stops attacks that use DNS for command and control or data theft.
- B. It feeds threat intelligence into an automation engine for rapid and consistent protections.
- C. It classifies sites based on content, features, and safety.
- D. It continuously validates every stage of a digital interaction.

Correct Answer: D

QUESTION 7

A customer currently uses a third-party proxy solution for client endpoints and would like to migrate to Prisma Access to secure mobile user internet-bound traffic.

Which recommendation should the Systems Engineer make to this customer?

- A. With the explicit proxy license add-on, set up GlobalProtect.

- B. With the mobile user license, set up explicit proxy.
- C. With the explicit proxy license, set up a service connection.
- D. With the mobile user license, set up a corporate access node.

Correct Answer: B

QUESTION 8

What is an advantage of the Palo Alto Networks cloud-based security infrastructure?

- A. It provides comprehensive, scalable cloud security with flexible licensing options.
- B. It backhauls traffic to the corporate network.
- C. It allows for the elimination of data centers within five years of implementation.
- D. It increases the footprint of the security solution.

Correct Answer: A

QUESTION 9

Which two prerequisites must an environment meet to onboard Prisma Access mobile users? (Choose two.)

- A. Zoning must be configured to require a user ID for the mobile users trust zone.
- B. Mapping of trust and untrust zones must be configured.
- C. BGP must be configured so that service connection networks can be advertised to the mobile gateways.
- D. Mobile user subnet and DNS portal name must be configured.

Correct Answer: AD

QUESTION 10

Which action protects against port scans from the internet?

- A. Apply App-ID Security policy rules to block traffic sourcing from the untrust zone.
- B. Assign Security profiles to Security policy rules for traffic sourcing from the untrust zone.
- C. Apply a Zone Protection profile on the zone of the ingress interface.
- D. Assign an Interface Management profile to the zone of the ingress surface.

Correct Answer: C

QUESTION 11

What is a benefit of deploying secure access service edge (SASE) with a secure web gateway (SWG) over a SASE solution without a SWG?

- A. A heartbeat connection between the firewall peers ensures seamless failover in the event that a peer goes down.
- B. It prepares the keys and certificates required for decryption, creating decryption profiles and policies, and configuring decryption port mirroring.
- C. Protection is offered in the cloud through a unified platform for complete visibility and precise control over web access while enforcing security policies that protect users from hostile websites.
- D. It creates tunnels that allow users and systems to connect securely over a public network as if they were connecting over a local area network (LAN).

Correct Answer: C

QUESTION 12

Which three decryption methods are available in a security processing node (SPN)? (Choose three.)

- A. SSL Outbound Proxy
- B. SSHv2 Proxy
- C. SSL Forward Proxy
- D. SSL Inbound Inspection
- E. SSH Inbound Inspection

Correct Answer: BCD

QUESTION 13

Which product leverages GlobalProtect agents for endpoint visibility and native Prisma SD- WAN integration for remote sites and branches?

- A. Cloud-Delivered Security Services (CDSS)
- B. WildFire
- C. CloudBlades:
- D. Autonomous Digital Experience Management (ADEM)

Correct Answer: A

QUESTION 14

Which App Response Time metric measures the amount of time it takes to transfer incoming data from an external server to a local client?

- A. UDP Response Time (UDP-TRT)
- B. Server Response Time (SRT)
- C. Network Transfer Time (NTTn)
- D. Round Trip Time (RTT)

Correct Answer: D

QUESTION 15

In the aggregate model, how are bandwidth allocations and interface tags applied beginning in Prisma Access 1.8?

- A. License bandwidth is allocated to a CloudGenix controller; interface tags are set with a compute region.
- B. License bandwidth is allocated to a compute region; interface tags are set with a CloudGenix controller.
- C. License bandwidth is allocated to a compute region; interface tags are set with a Prisma Access location.
- D. License bandwidth is allocated to a Prisma Access location; interface tags are set with a compute region.

Correct Answer: C
